Subject: Request for Better Sports Equipment

Respected Sir,

I am a student of Class IX at your school. I am writing to request better sports equipment for our students.

Our sports equipment is old and damaged. Some cricket bats are broken, footballs are worn out, and badminton rackets have damaged strings. There is also not enough equipment for all students. This makes it difficult for us to practise regularly and prepare for competitions.

Sports keep us healthy and active. They also teach us teamwork, discipline and confidence. Proper equipment will encourage more students to take part in games and improve their skills.

I kindly request you provide new bats, balls, footballs, badminton rackets and nets. Please also arrange for the repair of equipment that can still be used.

I shall be grateful for your kind consideration.

Yours sincerely,
X.Y.Z.

Subject: Drawbacks of Excessive Use of Social Media by Youth

Sir,

Through the columns of your newspaper, I wish to draw public attention to the excessive use of social media by young people.

Many students spend hours watching videos and scrolling through posts. This wastes their time and affects their studies. They often neglect homework and find it difficult to concentrate. Using phones late at night also reduces their sleep and makes them tired during school hours.

Moreover, excessive use of social media leaves little time for exercise and family life. Cyberbullying and comparison with others can cause stress and lower confidence. Young people may also believe and share false information.

Parents and teachers should guide students towards responsible use of social media. Students should limit their screen time and take part in sports, reading and other useful activities.

Please highlight this issue in your newspaper to raise public awareness.

Yours sincerely,
X.Y.Z.
