FAKHAR STEM SPHERE

Pakistan Studies Complete Model Paper Answers

Federal Board SSC-II | Curriculum 2022-23

Sections B and C - every main question and every alternative

SECTION	COMPLETE COVERAGE	MARKS
B - Q.2 (i-x)	20 answers: ten main + ten OR	5 marks per answer
C - Q.3, Q.4, Q.5	6 answers: both columns covered	10 marks per answer

How this solution is organized

Each Section B answer has five numbered, explained points. Section C uses developed explanations under headings. Q.4 on the press has exactly five developed points; its alternative has exactly ten numbered points.

Contents

Pages	Answers
2-11	Section B: Q.2 (i) through Q.2 (x), one main/OR pair per page.
12-13	Q.3: youth unemployment; geopolitical importance of neighbouring states.
14-15	Q.4: free and fair press; ten strategic-location points.
16-17	Q.5: British colonialism; media, education, and language integration.
18	References and question-reading notes.

The source paper allocates 50 marks to Section B and 30 to Section C. This guide answers both alternatives for preparation; students should follow the printed choice instructions in their examination. These are model answers, not an official FBISE marking key.

Section B - Q.2 (i)

MAIN QUESTION | 5 MARKS

Explain how the ideology of Pakistan was linked with the basic teachings of Islam. (Any five points)

1. **Islamic identity:** The ideology sought a separate homeland where Muslims could preserve their faith and organize individual and collective life according to the Quran and Sunnah.
2. **Equality and human dignity:** Islam teaches that people should not be considered superior because of race, caste, or wealth. Pakistan's ideology therefore emphasized equal dignity and fair opportunities.
3. **Social and economic justice:** Islam condemns exploitation and encourages care for the disadvantaged. Muslim demands reflected the desire to overcome economic deprivation and create a more just society.
4. **Brotherhood and unity:** The Islamic idea of brotherhood united Muslims across differences of language, region, and ethnicity, strengthening their common identity and collective political struggle.
5. **Freedom and self-determination:** Muslims wanted freedom to practise their religion and protect their cultural and political interests. A separate homeland was viewed as a way of securing these aims.

OR - ALTERNATIVE QUESTION | 5 MARKS

Explain in five points the importance of regional cooperation for the stability of Pakistan.

1. **Peaceful relations:** Regular dialogue and cooperation with neighbouring countries can reduce misunderstandings, manage disputes, and lower the danger of confrontation along Pakistan's borders.
2. **Economic security:** Trade, investment, and regional transport links create jobs and income. Stronger livelihoods reduce hardship and provide resources for Pakistan's social and economic development.
3. **Shared security challenges:** Exchanging information and coordinating lawful action against terrorism, trafficking, and organized crime can improve border management and protect communities across the region.
4. **Management of common problems:** Neighbours can cooperate on water, disasters, disease, refugees, and environmental pressures. Joint arrangements help prevent these problems from developing into wider instability.
5. **Confidence and constructive influence:** Cultural exchanges and dependable agreements build trust and give Pakistan a constructive regional role. Cooperation also allows greater attention and resources to be directed towards development.

Section B - Q.2 (ii)

MAIN QUESTION | 5 MARKS

What are the main features of Pakistan's relationship with China? Briefly explain its benefits for Pakistan.

1. **Long-standing strategic partnership:** The relationship is characterized by mutual trust and continuing diplomatic consultation. This gives Pakistan an important partner for discussing regional and international concerns.
2. **Economic and infrastructure cooperation:** CPEC and related investment support transport, energy, and industrial connectivity. Well-managed projects can reduce infrastructure constraints and encourage economic activity within Pakistan.
3. **Trade and investment:** Bilateral trade and business cooperation give Pakistan access to machinery, investment, and a large potential market. Competitive Pakistani production is necessary to realize export benefits.
4. **Defence and technical cooperation:** Cooperation in defence production, technology, and training supports Pakistan's capabilities and technical skills, while reducing dependence on a single external supplier.
5. **Educational and people-to-people links:** Scholarships, university exchanges, professional training, and cultural contacts develop skills and understanding. These links strengthen the human foundation of the wider partnership.

OR - ALTERNATIVE QUESTION | 5 MARKS

Describe the climatic zones of Pakistan by writing five points on temperature and different types of precipitation.

1. **Highland climate:** Northern and western uplands have cold winters and cooler summers. Higher mountains receive snowfall, while moist windward slopes receive relief rain; western systems bring important winter precipitation.
2. **Lowland climate:** The Indus Plain has hot summers and cooler winters. Summer monsoon rain is important, especially farther north, while some winter rain comes from western depressions.
3. **Arid and semi-arid conditions:** Deserts and dry inland areas receive little or unreliable rain, experience high evaporation, and often have a large daily temperature range. Irrigation is therefore important for cultivation.
4. **Coastal climate:** The Arabian Sea moderates coastal temperatures and increases humidity. Rain is generally limited, but monsoon spells and occasional tropical cyclones can bring heavy rain and strong winds.
5. **Rain-producing processes:** Monsoons bring seasonal moist winds; western depressions bring cyclonic rain and snow. Convectional rain forms when heated air rises, while relief rain forms when mountains force moist air upwards.

Section B - Q.2 (iii)

MAIN QUESTION | 5 MARKS

Discuss in five points the role of the Objectives Resolution in shaping Islamic principles in Pakistan's constitution.

1. **Sovereignty as a sacred trust:** The Resolution declared the sovereignty of Allah and treated state authority, exercised through the people within prescribed limits, as a trust rather than unlimited personal power.
2. **Representative authority:** It required the state to exercise power through elected representatives. This connected the proposed political order with popular representation rather than hereditary rule or arbitrary authority.
3. **Islamic democratic values:** Democracy, freedom, equality, tolerance, and social justice, as understood in Islam, were made guiding principles for future constitution-making and the conduct of public affairs.
4. **Islamic way of life:** It envisaged enabling Muslims to order their individual and collective lives according to the Quran and Sunnah, establishing a central religious orientation for the constitutional framework.
5. **Rights and safeguards:** It combined Islamic principles with fundamental rights, minority freedom of religion and culture, and an independent judiciary. These ideas guided later constitutions and the Resolution became their preamble.

OR - ALTERNATIVE QUESTION | 5 MARKS

Explain in five points how the quality of surface water varies in different regions of Pakistan.

1. **Mountain headwaters:** Water near snowmelt, glacier, and upland stream sources is often less affected by industrial waste, but it may carry sediment or become contaminated near settlements and tourist sites.
2. **Agricultural plains:** In intensively cultivated areas, runoff can carry fertilizers, pesticides, and salts into rivers and canals, reducing quality for drinking, aquatic habitats, and sometimes irrigation.
3. **Urban and industrial stretches:** Where rivers receive untreated sewage or factory effluent, biological and chemical contamination can be high. Water downstream of such discharges generally requires treatment before safe use.
4. **Dry inland regions:** Low rainfall, high evaporation, and limited river flow can concentrate dissolved salts and pollutants. Small reservoirs and seasonal streams may therefore have variable or deteriorating quality.
5. **Lower Indus and coastal areas:** Water can be affected by accumulated upstream pollution and, near the coast, saline intrusion where freshwater flow is insufficient. Flood runoff may also increase sediment and microbial contamination.

Section B - Q.2 (iv)

MAIN QUESTION | 5 MARKS

Interpret the impact of World War II on the political developments leading to Pakistan. (Five points)

1. **British resources weakened:** The war placed heavy financial and military pressure on Britain, reducing its capacity to maintain colonial control indefinitely and strengthening the need for a political settlement in India.
2. **Congress ministries resigned:** Congress objected to India's entry into the war without consultation and its ministries resigned in 1939. The League observed the Day of Deliverance on 22 December 1939.
3. **A clearer Muslim objective:** During the wartime period, the Lahore Resolution of 1940 gave the League a clearer territorial demand and helped consolidate support for a separate Muslim political future.
4. **Negotiations and political space:** Britain sought Indian support, producing initiatives such as the Cripps Mission of 1942. Wartime disagreements and Congress's Quit India campaign changed opportunities for the League to press its demands.
5. **Post-war mandate and transfer:** The League's electoral success in 1945-46 strengthened its representative claim. Britain's post-war weakness and unresolved political deadlock helped lead to negotiations and partition in 1947.

OR - ALTERNATIVE QUESTION | 5 MARKS

Demonstrate, in five points, the role of mystical orders in promoting unity among diverse communities in Pakistan.

1. **A shared ethical message:** Sufi orders stress love of Allah, humility, compassion, and human dignity. These teachings encourage respect across differences of wealth, ethnicity, language, and community background.
2. **Teaching in regional languages:** Poets such as Bulleh Shah and Shah Abdul Latif Bhittai expressed spiritual ideas in familiar local languages, making common moral themes accessible to different communities.
3. **Shared spiritual gatherings:** Shrines, Urs commemorations, poetry, and devotional gatherings bring people from several regions into common spaces and can create relationships beyond their immediate social groups.
4. **Service and charity:** Langar, charitable help, and care for people in need connect religious devotion with practical assistance. Shared service strengthens social trust and reduces feelings of exclusion.
5. **Tolerance and cultural links:** The inclusive teachings associated with Qadiri, Chishti, Naqshbandi, and Suhrawardi traditions can discourage prejudice while allowing regional customs to coexist within a wider spiritual heritage.

Section B - Q.2 (v)

MAIN QUESTION | 5 MARKS

Identify the importance of mountain ranges of Pakistan for economic development. (Five points)

1. **Water resources:** Mountain snow and glaciers supply meltwater to the Indus system. This water supports irrigated farming, households, and industries far beyond the mountain valleys themselves.
2. **Hydroelectric potential:** Fast-flowing rivers and steep gradients create suitable sites for hydropower. Carefully planned projects can supply electricity and support industrial and domestic development.
3. **Tourism and employment:** Peaks, scenery, valleys, and trekking routes attract visitors. Guides, hotels, transport operators, craftspeople, and other local businesses benefit from responsible mountain tourism.
4. **Agriculture, livestock, and forests:** Valleys and suitable slopes support orchards, terraced crops, grazing, and forest products. These activities provide food, raw materials, and income suited to local conditions.
5. **Minerals and connectivity:** Some mountain regions contain useful minerals, while passes and valleys provide trade routes. Improved access can expand markets, although extraction and construction require environmental and hazard safeguards.

OR - ALTERNATIVE QUESTION | 5 MARKS

Demonstrate, in five points, the obstacles that hindered UN involvement in resolving the Palestine conflict.

1. **Security Council vetoes:** Disagreement among permanent members and the use or threat of veto have blocked proposed measures, preventing a consistent and united Security Council response.
2. **Competing international interests:** States differ in their alliances, priorities, and preferred solutions. These divisions weaken common diplomatic pressure and make agreement on implementation more difficult.
3. **Limited enforcement:** The UN depends substantially on member states to implement decisions and provide political, financial, and operational support. Resolutions alone cannot guarantee compliance by the parties.
4. **Unresolved substantive disputes:** Disagreements over territory, settlements, Jerusalem, security, refugees, and statehood make a lasting settlement difficult. Repeated violence further reduces trust and space for negotiation.
5. **Access and cooperation problems:** Restrictions on movement and humanitarian access, insecurity, and lack of cooperation from relevant actors obstruct aid, monitoring, and mediation. These constraints limit action even when UN bodies are involved.

Section B - Q.2 (vi)

MAIN QUESTION | 5 MARKS

Name three surface water resources and two groundwater resources of Pakistan.

1. **Surface resource 1 - Indus River:** The Indus is the country's principal river and a major source of water for irrigation and other uses.
2. **Surface resource 2 - Jhelum River:** The Jhelum contributes to the Indus river system and supplies water used in irrigation and hydroelectric projects.
3. **Surface resource 3 - Chenab River:** The Chenab is another major surface-water resource supporting agriculture and settlements, particularly in Punjab.
4. **Groundwater resource 1 - Indus Basin aquifer:** Water stored in the water-bearing formations beneath the Indus Plain is tapped through wells and tube wells for farming and domestic use.
5. **Groundwater resource 2 - Balochistan aquifers:** Groundwater stored in Balochistan's basin and plateau aquifers is accessed through wells, springs, and karez systems where suitable conditions exist.

OR - ALTERNATIVE QUESTION | 5 MARKS

Interpret in five points Pakistan's initiatives for peace and stability in the Muslim World through the OIC.

1. **A forum for Muslim cooperation:** Pakistan has hosted and participated in OIC summits and ministerial meetings, helping member states consult and develop common positions on peace, development, and humanitarian concerns.
2. **Afghanistan humanitarian initiative:** Pakistan hosted the extraordinary OIC foreign ministers' session in Islamabad in December 2021 to mobilize assistance and prevent Afghanistan's humanitarian and economic crisis from worsening.
3. **Support for relief mechanisms:** Pakistan supported the Afghanistan Humanitarian Trust Fund and related assistance arrangements, linking relief, food security, and cooperation with efforts to improve conditions for vulnerable people.
4. **Advocacy on Palestine:** Pakistan uses OIC platforms to support Palestinian rights, a just political settlement, protection of civilians, and humanitarian assistance, encouraging coordinated diplomatic attention to the conflict.
5. **Dialogue and collective diplomacy:** Pakistan promotes Muslim solidarity, peaceful settlement of disputes, and consultation through OIC forums. These efforts seek to reduce tensions and strengthen common action, rather than guarantee immediate resolution of conflicts.

Section B - Q.2 (vii)

MAIN QUESTION | 5 MARKS

Illustrate in five points the significance of the Simla Conference (1945) in shaping political negotiations.

1. **A proposed political transition:** Viceroy Lord Wavell called the conference to discuss a reconstituted Executive Council, bringing major Indian political leaders into negotiations about greater participation in government.
2. **Representation became central:** The key dispute concerned who could nominate Muslim members. Jinnah insisted on the Muslim League's claim, while Congress and others rejected its exclusive right to represent Muslims.
3. **Limits of compromise exposed:** The failure to agree showed that distributing offices would not by itself settle the deeper dispute over community representation and political authority.
4. **Electoral proof became important:** After the deadlock, elections became a means of testing representative claims. The League's strong performance in 1945-46 subsequently gave greater weight to its position.
5. **Influence on later negotiations:** The conference strengthened the importance of recognizing Muslim political demands in future settlements and prepared the context for the Cabinet Mission negotiations and the eventual partition debate.

OR - ALTERNATIVE QUESTION | 5 MARKS

Discuss in five points the effects of rural-urban migration on population distribution.

1. **Urban concentration:** Movement from villages increases the number and proportion of people living in cities, concentrating population in places offering jobs and services.
2. **Expansion at city edges:** As central housing becomes scarce or expensive, migrants settle in peripheral areas, extending the built-up area and sometimes creating overcrowded informal settlements.
3. **Uneven regional distribution:** Large commercial and industrial centres attract more migrants than less developed regions, widening differences in population concentration between areas.
4. **Changes in rural communities:** Some villages lose working-age residents, altering the local labour supply and household composition. The extent depends on whether migration is temporary, seasonal, or permanent.
5. **Pressure on receiving areas:** Concentrated growth increases demand for housing, transport, schools, water, and healthcare. Balanced investment in smaller towns and rural services can distribute opportunities more evenly.

Section B - Q.2 (viii)

MAIN QUESTION | 5 MARKS

Interpret in five points the cultural variations among communities living in different landforms of Pakistan.

1. **Mountain communities:** Cold weather and difficult slopes influence warm clothing, housing, terraced farming, and pastoral traditions. Valley languages, crafts, and seasonal movement reflect local conditions.
2. **Indus Plain communities:** Fertile irrigated land supports settled farming and dense settlements. Harvest activities, crop-related customs, food traditions, and market gatherings form important parts of community life.
3. **Dry plateau communities:** In parts of Balochistan, scarce water and dispersed settlement encourage livestock-based livelihoods, mobility, and strong kinship networks, alongside distinctive embroidery, music, and other traditions.
4. **Desert communities:** Limited water and seasonal grazing encourage herding and adapted settlement patterns. Crafts, textiles, oral traditions, and local celebrations reflect the environment and inherited community practices.
5. **Coastal communities:** Fishing, boat-related work, maritime trade, and seafood influence daily life and customs. Landforms shape opportunities, but history, language, and social interaction also explain cultural differences.

OR - ALTERNATIVE QUESTION | 5 MARKS

Describe, in five points, the shared principles of Sufi teachings across different regions of Pakistan.

1. **Love and devotion to Allah:** Sufi traditions emphasize divine love and sincere worship as the centre of spiritual life, encouraging people to seek closeness to Allah through faith and good conduct.
2. **Purification of the self:** Tazkiyah involves reducing pride, greed, and harmful desires while developing humility, sincerity, patience, and self-discipline.
3. **Remembrance and reflection:** Dhikr, prayer, reflection, and other spiritual practices help followers maintain awareness of Allah and connect religious understanding with everyday behaviour.
4. **Compassion and service:** Tolerance, generosity, kindness, and care for the needy express respect for humanity and can reduce divisions based on wealth, region, or social position.
5. **Spiritual guidance and ethical life:** The Murshid guides the Mureed in spiritual development. Although orders differ in practice, guidance is intended to encourage moral conduct, personal responsibility, and spiritual growth.

Section B - Q.2 (ix)

MAIN QUESTION | 5 MARKS

Assess in five points how population policies influence youth development and dependency ratios in Pakistan.

1. **Balanced family size:** Voluntary, informed family-planning and maternal-health services can moderate rapid growth. Over time, fewer births relative to the working-age population can reduce child dependency.
2. **Education and skills:** Investment in schooling and vocational training develops young people's capabilities, helping them move from being dependants to becoming productive workers and responsible participants in society.
3. **Employment opportunities:** Policies encouraging productive jobs and enterprise help turn a large youth population into a demographic dividend. A favourable age structure alone does not guarantee an economically independent population.
4. **Health and women's participation:** Better nutrition, healthcare, girls' education, and fair access to work improve household well-being and expand productive participation, supporting both youth development and family economic security.
5. **Long-term age balance:** Lower fertility can reduce child dependency initially, but population ageing may later increase old-age dependency. Policies therefore need employment, savings, healthcare, and support for older people as well as children.

OR - ALTERNATIVE QUESTION | 5 MARKS

Demonstrate, in five points, how the 1973 Constitution established Pakistan's parliamentary system.

1. **Prime Minister as head of government:** The parliamentary design places the Prime Minister at the centre of government and executive decision-making, distinguishing the head of government from the President as head of state.
2. **National Assembly support:** The Prime Minister derives authority from the National Assembly and must retain its confidence. Government therefore depends on support in the elected representative chamber.
3. **Cabinet responsibility:** The Prime Minister leads the Cabinet, whose policies and actions are subject to parliamentary scrutiny. Ministers answer for government performance through the parliamentary process.
4. **President and ministerial advice:** The President ordinarily acts on the advice of the Prime Minister or Cabinet, subject to the Constitution, rather than independently directing everyday administration.
5. **Legislative checks:** Parliament debates legislation, approves public finances, and questions government. The National Assembly's no-confidence mechanism allows removal of a Prime Minister who loses the required parliamentary support.

Section B - Q.2 (x)

MAIN QUESTION | 5 MARKS

Identify the measures, in five points, to prevent water shortage and wastage in Pakistan.

1. **Improve irrigation efficiency:** Use suitable drip or sprinkler systems, crop-based scheduling, and field levelling to supply water when and where crops need it, avoiding excessive application.
2. **Repair distribution systems:** Maintain canals, watercourses, pipes, and household fittings to reduce avoidable leakage. Measure supplies and improve allocation so water reaches users more efficiently and fairly.
3. **Harvest and store water:** Collect rainwater and develop appropriately planned storage and recharge systems. These measures save wet-season supplies for drier periods and help replenish groundwater.
4. **Regulate extraction and pollution:** Monitor groundwater pumping and discourage over-extraction. Treat wastewater and control contamination so that existing supplies remain usable; safely treated water can serve suitable non-drinking purposes.
5. **Promote conservation and suitable crops:** Teach households, farmers, and industries to conserve water, reuse it safely, and select water-efficient practices. Match crop choices to local availability rather than expanding demand beyond sustainable supplies.

OR - ALTERNATIVE QUESTION | 5 MARKS

Identify in five points the guiding principles of Pakistan's foreign policy.

1. **Sovereignty and national interests:** Foreign policy seeks to protect Pakistan's independence, territorial integrity, security, and development while respecting the sovereign equality of other states.
2. **Peaceful coexistence and non-interference:** Pakistan advocates non-aggression, respect for other countries' independence, and non-interference in their internal affairs as foundations for stable international relations.
3. **Peaceful settlement of disputes:** Dialogue, negotiation, and other peaceful means should resolve international disagreements, consistent with international law and the principles of the United Nations Charter.
4. **Friendship and international cooperation:** Goodwill towards nations and practical cooperation in trade, development, education, and other fields are intended to advance peace, prosperity, and mutually beneficial relationships.
5. **Muslim solidarity and support for rights:** Pakistan seeks strong fraternal relations with Muslim countries and support for oppressed peoples' legitimate rights, while promoting wider international peace and security.

Section C - Q.3 | Main question

10 MARKS

Discuss the social and economic difficulties caused by youth unemployment in Pakistan and propose sustainable solutions.

Introduction

Youth unemployment means that young people who are able and willing to work cannot obtain suitable employment. It creates hardship for individuals and prevents Pakistan from using an important source of energy, skills, and productive potential.

1. Poverty and dependence

Unemployed young people cannot earn a stable income and remain dependent on parents or other relatives. Households must support more non-earners, reducing the resources available for food, education, healthcare, and future investment.

2. Loss of production and public revenue

Unused labour reduces the goods and services the economy could produce. Low incomes weaken purchasing power and tax receipts, while public demand for assistance rises. This makes development more difficult for both families and government.

3. Frustration and social strain

Long periods without work can create anxiety, loss of confidence, and feelings of exclusion. Financial pressure can delay independent family life and deepen social tensions. Some young people become vulnerable to exploitation, although unemployment does not automatically cause criminal behaviour.

4. Migration and loss of skills

Young people may leave villages or the country to search for work. Migration can bring income, but the departure of trained workers can weaken local services and waste investment in education when suitable opportunities are unavailable at home.

5. Relevant education and practical training

Improve schooling, technical education, apprenticeships, and career guidance in cooperation with employers. Training should match actual demand in agriculture, industry, digital services, and other sectors so that qualifications lead to useful and adaptable skills.

6. Productive employment and enterprise

Reliable energy, maintained infrastructure, predictable procedures, and support for small businesses encourage job creation. Suitable finance, mentoring, and market access can help capable young people establish enterprises instead of depending only on public-sector vacancies.

7. Inclusion and coordinated support

Expand opportunities for women, rural youth, and persons with disabilities through safe access, suitable facilities, and targeted assistance. Government, employers, and NGOs should coordinate programmes and monitor durable employment outcomes rather than count training enrolments alone.

Conclusion

Sustainable solutions combine employable skills with real demand for labour and fair access to opportunity. This converts youth from a financially dependent group into a source of household security and national development.

Section C - Q.3 | Alternative question

10 MARKS

Illustrate how Pakistan's proximity to India, China, Afghanistan, and Iran enhances its geopolitical relevance.

Introduction

Pakistan lies at the meeting point of South Asia, routes towards Central Asia, and connections with the Middle East. Its four land neighbours give it both commercial opportunities and important security responsibilities.

1. India: South Asian security and economic potential

The long eastern border places Pakistan at the centre of South Asian politics. The Kashmir dispute and the nuclear capabilities of both states attract international attention to regional security. Peaceful relations could also expand trade, travel, and cooperation between large neighbouring markets.

2. China: strategic and economic connectivity

The north-eastern border connects Pakistan with a major world economy. The Karakoram Highway and CPEC-related infrastructure create opportunities for trade, investment, and access between western China and the Arabian Sea. The partnership also increases Pakistan's importance in regional strategic calculations.

3. Afghanistan: access towards Central Asia

Pakistan provides important routes between landlocked Afghanistan and seaports. Afghanistan also forms part of Pakistan's potential overland connection towards Central Asia. Border management, refugees, terrorism, and political instability make peaceful conditions across the western frontier important for the wider region.

4. Iran: Middle Eastern links and energy opportunities

The south-western border connects Pakistan with Iran and the wider Middle Eastern region. Border trade, transport, and possible energy cooperation give the relationship economic significance. Secure borders and careful diplomacy are needed because wider regional tensions can affect these opportunities.

5. Combined significance and practical limits

These neighbours allow Pakistan to function as a potential bridge between different regional markets and transport systems. Its Arabian Sea ports reinforce this position. However, geographical proximity becomes an advantage only when supported by peaceful relations, reliable infrastructure, secure movement, and commercially viable cooperation.

Conclusion

Pakistan's relevance arises from the combination of location, neighbours, sea access, and security concerns. Constructive diplomacy and domestic development are necessary to turn strategic importance into lasting benefits for its population.

Section C - Q.4 | Main question

10 MARKS

Name in five points the advantages of maintaining a free and fair press.

1. Informed citizens

A free and fair press provides reliable information about public affairs, government decisions, the economy, and community problems. Access to verified facts helps citizens form independent opinions and participate meaningfully in public life. Fair reporting distinguishes evidence from rumour and allows readers to understand competing viewpoints.

2. Accountability and exposure of wrongdoing

Independent journalism investigates corruption, misuse of public money, and failures in services. When officials know that their decisions may receive public scrutiny, there is greater pressure to explain actions and correct mistakes. Responsible investigation therefore strengthens accountability and protects the public interest.

3. Representation and protection of rights

The press gives space to people whose concerns may otherwise be ignored, including disadvantaged communities and minorities. Reporting injustice or abuse can draw attention to the need for remedies. Fair coverage should respect human dignity, avoid discrimination, and provide an opportunity for affected parties to respond.

4. Open debate and better policies

Media discussion allows different groups to explain needs, question proposals, and suggest alternatives. Governments can learn about public concerns and the effects of their policies. Debate based on evidence can improve decisions and create peaceful channels for expressing disagreement instead of allowing grievances to remain unheard.

5. Public trust and social cohesion

Accurate, balanced journalism can challenge misinformation, reduce misunderstanding, and report emergencies clearly. By presenting different communities fairly, the press can strengthen trust and national integration. Freedom should be accompanied by verification and professional responsibility, since sensationalism and false allegations undermine these benefits.

Section C - Q.4 | Alternative question

10 MARKS

Identify in ten points the strategic importance of Pakistan's position on the world map for regional and global politics.

1. Junction of major regions

Pakistan links South Asia with routes towards Central Asia and the Middle East, placing it at an important intersection of regional political and economic interests.

2. Arabian Sea access

Its southern coast opens onto the Arabian Sea and the Indian Ocean, connecting inland territory with international maritime routes and making coastal access strategically valuable.

3. Near Gulf energy routes

Pakistan is situated near sea routes serving the Persian Gulf, a major energy-producing region. Developments affecting those routes therefore influence its economy and regional strategic importance.

4. Gateway for landlocked Afghanistan

Afghanistan's use of routes through Pakistan for access to seaborne trade gives Pakistan an important transit role and makes stable cross-border arrangements politically significant.

5. Potential Central Asian connectivity

Routes through neighbouring territory can connect Central Asian markets and resources with Pakistan's ports. This creates opportunities for regional transit, trade, and diplomatic cooperation.

6. Connection with China

The north-eastern frontier and overland transport links connect Pakistan to China. CPEC strengthens attention to Pakistan's position in wider infrastructure, investment, and strategic networks.

7. South Asian security

The eastern border with India and the unresolved Kashmir dispute place Pakistan at the centre of South Asian security concerns. Both countries' nuclear capabilities increase global interest in stability.

8. Links with Iran and the Muslim world

The Iranian frontier and proximity to the Middle East connect Pakistan with important Muslim states and markets, giving it opportunities for border commerce, dialogue, and regional cooperation.

9. Ports and international supply chains

Karachi, Port Qasim, and Gwadar link maritime movement with inland routes. Their effectiveness can influence trade access, investment decisions, and the commercial interests of regional partners.

10. Importance in managing shared risks

Its location near conflict-affected areas makes cooperation on terrorism, refugees, trafficking, and humanitarian issues significant to other states. Constructive diplomacy can turn this responsibility into a contribution to regional stability.

Section C - Q.5 | Main question

10 MARKS

Define British colonialism. Explain its impacts on the Indo-Pak subcontinent with reference to the economy, social structure, and political system.

Definition

British colonialism was the political and economic domination of the subcontinent by Britain for imperial interests. It developed through East India Company expansion and continued as direct British Crown rule from 1858 until independence in 1947.

1. Economic exploitation and trade

The colonial economy supplied raw materials and a market for British manufactured goods. These arrangements benefited imperial trade and placed pressure on many local crafts and producers. Revenue demands and unequal access to land and capital contributed to hardship in different communities.

2. Infrastructure with unequal benefits

Railways, ports, roads, and communication systems expanded and connected markets. They created some new opportunities but were also designed to facilitate administration, military movement, and extraction. Their benefits were uneven and did not remove poverty or establish equal economic opportunity throughout the subcontinent.

3. Social structure and education

English education and new professional institutions helped create an educated middle class, but access was limited and unequal. Communities with less modern education faced disadvantages in employment and public life. Land arrangements and powerful intermediaries could deepen rural dependence and differences between social groups.

4. Culture and community relations

Colonial institutions changed language use, status, and access to authority. Policies and political arrangements that treated communities separately could intensify rivalries. Muslims' educational disadvantages, cultural anxieties, and reduced political influence encouraged reform movements and demands for collective safeguards.

5. Political institutions and restricted participation

Britain established centralized bureaucracy, courts, and later representative institutions, while retaining decisive authority. Repression and limited Indian control of major decisions generated opposition. Debate about representation, minority protection, and self-government encouraged organized political activity, including the Muslim League and the wider independence struggle.

Conclusion

British rule introduced institutional and infrastructural changes while preserving imperial control and unequal benefits. Its economic, social, and political effects contributed to demands for reform, self-determination, and ultimately the establishment of Pakistan.

Section C - Q.5 | Alternative question

10 MARKS

Highlight the influence of media and education in bridging language differences for national integration.

Introduction

Pakistan's many languages express its cultural diversity. National integration requires people to communicate across these differences while respecting the languages through which communities preserve identity, literature, and knowledge.

1. A shared means of communication

Urdu-language programmes and education can provide a common medium between people with different first languages. A shared language helps people obtain public information, cooperate at work, and discuss national concerns without requiring every community to abandon its own language.

2. Recognition through regional media

Radio, television, print, and digital content in regional languages give communities a voice and improve access to information. Fair representation reduces feelings of neglect. Subtitles, translation, and bilingual presentation allow content from one linguistic community to reach audiences elsewhere.

3. Inclusive language learning

Schools can develop competence in a common language while supporting mother tongues and respect for regional literature. Inclusive teaching treats multilingual ability as an asset. Students learn that linguistic difference does not make any group less entitled to belonging or participation.

4. Shared cultural understanding

Textbooks, dramas, documentaries, poetry, and stories can introduce learners and audiences to the experiences of other regions. Teaching contributions from several linguistic traditions challenges stereotypes and shows how different communities contribute to a common national heritage.

5. Interaction and critical media use

Debates, student exchanges, joint projects, and online learning give people opportunities to practise communication across language groups. Media literacy helps them question prejudiced messages and misinformation. These activities turn respect for diversity into everyday habits of listening and cooperation.

Conclusion

Media and education strengthen integration when they combine common communication with equal respect for regional identities. Suppressing languages can create resentment; inclusion and practical multilingual contact make shared national belonging more durable.

References and question-reading notes

Primary source for the questions

FBISE_Model_Paper_Sec_B_C.pdf, supplied by the user: PDF page 1 contains Section B and PDF page 2 contains Section C. The numbering and all alternatives have been checked against both pages.

Textbook basis

NBF Pakistan Studies Grade 9, National Curriculum 2022-23: ideological basis, establishment of Pakistan, landforms, climate, water resources, and population chapters. NBF Pakistan Studies Grade 10: society and culture and constitutional development. The previously consulted scans support the relevant textbook concepts; foreign-policy and international-organization examples were checked against the official references below. Answers are original paraphrases and explanations.

Official checks for constitutional and international topics

National Assembly: constitutional role and the parliamentary system

National Assembly: history, including the Objectives Resolution

Ministry of Foreign Affairs: guiding principles and objectives

Ministry of Foreign Affairs: Pakistan-China relations

OIC Islamabad Declaration: Afghanistan assistance and cooperation

United Nations: Security Council and the Question of Palestine

United Nations: Security Council deadlock and limits of action

Reading notes

1. In Q.2 (ii), the word "conventional" is interpreted as "convectional" rainfall, which is the geographical process intended by the question. Western depressions and tropical cyclones are distinguished rather than treated as identical weather systems.

2. Q.2 (vi) asks for three surface resources and two groundwater resources. The answer names rivers and aquifers; wells and tube wells are extraction methods, not separate aquifer resources.

3. Q.5 has a second-column question but no printed OR label. Both questions have been answered as requested.

4. Q.2 (ix) is answered despite the earlier revision-bank exclusion because it appears in this model paper. The parliamentary-system answer explains the core 1973 constitutional design rather than cataloguing later amendments.

Exam presentation

Use the exact number of points requested. Explain causes, effects, and benefits where the command requires them. Underline key terms, keep each point relevant, and use headings for long answers. A five-point list earns credit through accurate explanation, not numbering alone.
