FAKHAR STEM SPHERE

Pakistan Studies Exam Question Bank

SSC-II / Class 10 - Federal Board

Selected summative syllabus for the APS send-up revision requested by Fakhar Abbas.

SHORT ANSWERS	LONG ANSWERS	SOLVED MCQs
114 questions 5 marks each Five explained points	39 questions 10 marks each Five developed headings	82 questions Four options each Answer and reason

39 included SLOs | 11 textbook units

Grade 9: Units 1-9, filtered to the included summative SLOs.
Grade 10: Society and Culture of Pakistan; Recreation - Sports.

Study order: understand the answer, practise recall, then use the priority lists at the end for final revision.

Original model answers in English, checked against the NBF textbook chapters and the combined FBISE assessment framework. These are practice answers, not an official APS marking key.

Scope, exclusions, and how to use this bank

The attached three-page document contains the Grade 10 SLOs. The combined FBISE Grade X framework was also consulted to classify the Grade 9 material. Only the 39 included summative SLOs are used in this bank.

Excluded formative Grade 9 SLOs

SLO	Excluded question focus
PS-09-A1-08	Individual contributions of political leaders, women, and minorities to the making of Pakistan.
PS-09-B1-03	Significance of individual major cities from their geographical location.
PS-09-B3-02	Interpretation of climatic-zone data and its geographical impacts.
PS-09-C2-01	Population-growth trends, density/structure, demographic transition models, and population pyramids.
PS-09-C4-02	Dry ports: concept, advantages, and export handling.

Your additional exclusions

No questions are set on Grade 10 constitutional development, the Objectives Resolution, the Constitutions of 1956/1962/1973, citizenship and sustainable society, foreign policy, diplomatic relations, or international organizations. Grade 10 Domains E and F are excluded throughout, including the MCQs.

Important scope distinctions

Pre-1947 events and proposals remain within the included history SLOs; they are not questions on Pakistan's later constitutional development. Similarly, geographical location, CPEC and commercial routes remain within the included Grade 9 geography/trade SLOs. Youth support and NGOs are included only under Grade 9 C2-03, not as Grade 10 citizenship questions.

Marks and answer technique

Short answers follow your requested 5-mark allocation: write all five numbered, relevant points and explain them in sentences. Long answers follow your requested 10-mark allocation: use the headings and developed paragraphs. These allocations do not claim to reproduce an independently verified APS paper or marking scheme.

Coverage limitation: question wording can be varied indefinitely. This bank covers the principal distinct question patterns across every included SLO; it cannot guarantee every possible wording, exact APS questions, or full marks.

Contents and source guide

Unit	Short / long	Page
G9 Unit 1: Ideological Basis of Pakistan	10 / 3	4
G9 Unit 2: Establishment of Pakistan	23 / 6	9
G9 Unit 3: Land of Pakistan	4 / 1	19
G9 Unit 4: Natural Topography and Vegetation	10 / 3	21
G9 Unit 5: Climate and Environmental Hazards	8 / 3	26

Sources and referencing

1. Supplied file: FBISE_Pak_Studies_SCC_II_Summative_and_Formative_Topics.pdf, pp. 1-3. The included Grade 10 content is PS-10-D1-01 to D1-07 and PS-10-D2-01 to D2-02.

2. FBISE: Pakistan Studies SSC-II Assessment Framework and Model Question Paper, Scheme of Studies 2024, 100 marks; framework PDF pp. 7-15. Open combined FBISE framework. Accessed 29 October 2026.

3. NBF model textbook: Pakistan Studies Grade 9, National Curriculum 2022-23, first-edition impression April 2024, 158-page scan. Consulted textbook copy.

4. NBF: Pakistan Studies Grade 10, National Curriculum 2022-23, consulted 130-page scan, Units 1-2 only (pp. 6-36). Consulted textbook copy.

Page references use PDF page numbers of the consulted scans. Chapter references apply to the questions within that chapter; SLO labels beside each question identify its assessment basis. Some application answers develop the textbook principles into original examples and reasoned recommendations rather than repeat a book passage.

Accuracy notes: the correct Day of Deliverance date is 22 December 1939. Summer monsoon flow is explained through relatively low pressure over strongly heated land. Clear scan/printing slips are not repeated. Changing production percentages, current rankings, and questionable squash title totals are deliberately not used as memorization questions.

Grade 9 - Unit 1: Ideological Basis of Pakistan

NBF Grade 9, PDF pp. 5-20

Included scope: PS-09-A1-01 to PS-09-A1-04

Short questions - 5 marks each

S001. Explain five reasons why an ideology is important for a nation.

PS-09-A1-01 | 5 marks | Five explained points

1. **Shared purpose:** An ideology gives people common aims and a clear direction for collective action.
2. **National unity:** Shared beliefs connect people despite differences of language, region, and social background.
3. **Identity:** It explains the values and historical experiences that distinguish a community.
4. **Guidance:** It provides principles for judging social, political, and economic policies.
5. **Motivation:** It encourages commitment, cooperation, and sacrifice to achieve national goals.

S002. Explain the ideological basis of Pakistan in five points.

PS-09-A1-01 | 5 marks | Five explained points

1. **Islamic identity:** Muslims sought a homeland where they could preserve their religious and cultural identity.
2. **Islamic principles:** Equality, justice, brotherhood, and human dignity provided the movement's moral foundation.
3. **Freedom of religious life:** Muslims wanted to practise their beliefs without domination or discrimination.
4. **Political safeguards:** Separate political authority was sought to protect collective interests and representation.
5. **Economic improvement:** A homeland offered the opportunity to address deprivation and build a fairer society.

S003. How did economic deprivation encourage the demand for Pakistan?

PS-09-A1-01 | 5 marks | Five explained points

1. **Land insecurity:** Unequal landholding and heavy rents weakened many Muslim peasants and increased dependence on landlords.
2. **Educational disadvantage:** Limited access to modern education reduced opportunities for skilled work and advancement.
3. **Employment discrimination:** Underrepresentation in government and administration restricted income and influence.
4. **Limited finance:** Poor access to credit made it difficult to invest in farming and business.
5. **Demand for change:** These hardships strengthened support for political safeguards and a homeland offering economic justice.

S004. Describe the social and political difficulties faced by Muslims under British rule.

PS-09-A1-01 | 5 marks | Five explained points

1. **Political decline:** Muslims lost the position they had previously held in government and administration.
2. **Educational barriers:** Reluctance or inability to obtain modern education reduced access to important occupations.
3. **Cultural insecurity:** Language disputes, including the Urdu-Hindi controversy, created fears about cultural survival.
4. **Inadequate representation:** Muslims demanded effective participation rather than decisions being imposed without their consent.
5. **Communal tension:** Conflict and exclusion deepened insecurity and encouraged demands for protection of collective rights.

S005. How did Islamic values support the demand for a separate homeland?

PS-09-A1-01 | 5 marks | Five explained points

1. **Equality:** Islam rejects superiority based on race, wealth, or lineage, supporting equal treatment for all.
2. **Justice:** Muslims linked their demand to fair access to political authority and economic opportunity.
3. **Brotherhood:** Shared faith helped unite people across regional and linguistic differences.
4. **Religious freedom:** A separate homeland was viewed as a means of living according to Islamic teachings.
5. **Self-determination:** Muslims wished to shape their collective future rather than remain dependent on a permanent majority.

S006. Explain Pakistan's ideology with reference to Quaid-e-Azam's vision.

PS-09-A1-02 | 5 marks | Five explained points

1. **Distinct nationhood:** Quaid-e-Azam regarded Muslims as a nation with their own religion, culture, and social traditions.
2. **Representative government:** He supported democratic institutions and accountable leadership rather than arbitrary personal rule.
3. **Equality:** He emphasized justice and equal treatment of citizens regardless of caste, creed, or background.
4. **Religious freedom:** His 11 August 1947 address affirmed freedom of worship and equal citizenship.
5. **Progress and unity:** He stressed national cohesion and economic development to make independence meaningful.

S007. Explain five ideas of Allama Iqbal that influenced Pakistan's ideology.

PS-09-A1-02 | 5 marks | Five explained points

1. **Islamic identity:** Iqbal emphasized Islam as a source of collective identity and moral guidance.
2. **Self-realization:** His concept of Khudi encouraged confidence, character, and purposeful individual development.
3. **Unity:** He urged Muslims to overcome ethnic and linguistic divisions through a shared spiritual outlook.

4. **Self-determination:** He supported political arrangements that allowed Muslims to safeguard their collective interests.
5. **Social justice:** He advocated spiritual renewal, economic fairness, and thoughtful application of Islamic principles to modern problems.

S008. Define British colonialism and explain four of its effects on the subcontinent.

PS-09-A1-03 | 5 marks | Five explained points

1. **Meaning:** British colonialism was foreign political and economic control over the subcontinent, including direct Crown rule from 1858 to 1947.
2. **Economic control:** Raw materials and markets were organized largely to serve imperial commercial interests.
3. **Administrative change:** Centralized bureaucracy, new laws, and institutions altered the operation of government.
4. **Educational change:** English education created opportunities but unequal access widened social and occupational differences.
5. **Political awakening:** Exploitation and exclusion encouraged organized movements seeking representation and independence.

S009. Explain five contributions of Sir Syed Ahmad Khan's reform movement.

PS-09-A1-04 | 5 marks | Five explained points

1. **Modern education:** He encouraged Muslims to study science and English alongside their own religious and cultural learning.
2. **Scientific Society:** Established in 1864, it promoted translation and the spread of scientific knowledge.
3. **MAO College:** The college established at Aligarh in 1877 became a centre of Muslim educational advancement.
4. **Social reform:** His writings encouraged rational discussion and challenged attitudes that obstructed learning and progress.
5. **Political preparation:** The educated community developed through Aligarh later contributed leadership and organization to Muslim political movements.

S010. How did the Aligarh Movement prepare Muslims for political advancement?

PS-09-A1-04 | 5 marks | Five explained points

1. **Educational skills:** Modern learning improved Muslims' ability to compete for professional and administrative employment.
2. **Confidence:** Education helped a disadvantaged community recover self-respect after the upheaval of 1857.
3. **Public debate:** Publications and discussion encouraged awareness of social problems and collective interests.
4. **Leadership networks:** Institutions brought students and reformers together and developed organizational skills.
5. **Long-term influence:** Educated Muslims later helped articulate demands for representation and supported the Pakistan Movement.

Long questions - 10 marks each

L001. Explain how Islamic values and Muslim deprivation together formed the ideological basis of Pakistan.

PS-09-A1-01 | 10 marks | Use headings and developed explanation

1. Religious and cultural identity

Pakistan's ideology developed around the view that Muslims possessed a distinct religious and social identity. They wanted conditions in which Islamic beliefs, cultural practices, and community institutions could be preserved and developed freely.

2. Islamic principles

Equality, justice, brotherhood, and human dignity supplied the movement's ethical foundation. These principles encouraged the demand for a society where political influence and economic opportunity would not depend on inherited privilege or discrimination.

3. Economic deprivation

Many Muslims experienced weak access to modern education, employment, credit, and productive resources. Poverty and insecure livelihoods helped make economic advancement a collective political concern, rather than merely a matter of individual effort.

4. Social and political insecurity

Underrepresentation, communal tensions, and controversy over language increased fears about future safeguards. Muslim leaders argued that numerical majority alone could not adequately protect the interests of a distinct community.

5. Demand for self-determination

The ideological and practical concerns reinforced each other: preservation of identity required effective political protection, while independence offered a chance to improve social and economic conditions. This connection helped turn community grievances into support for a separate homeland.

L002. Evaluate Pakistan's ideology in the light of Quaid-e-Azam's and Allama Iqbal's ideas.

PS-09-A1-02 | 10 marks | Use headings and developed explanation

1. Distinct Muslim identity

Both leaders emphasized the significance of Muslim religious and cultural identity in the subcontinent. Their arguments supported political arrangements through which Muslims could protect their interests and determine their collective future.

2. Iqbal's spiritual and intellectual contribution

Iqbal stressed Khudi, spiritual renewal, Muslim unity, and purposeful action. He linked individual self-development with collective progress and encouraged Muslims to respond thoughtfully to changing social conditions rather than remain passive.

3. Quaid-e-Azam's political interpretation

Quaid-e-Azam translated the demand for safeguards into an organized political movement. He argued for Muslim nationhood and representative authority, while stressing unity and disciplined effort in the achievement and development of Pakistan.

4. Justice and equal citizenship

The vision involved social justice, opportunity, and respect for human dignity. Quaid-e-Azam's address of 11 August 1947 affirmed freedom of worship, providing an important basis for understanding the protection of religious minorities within the new state.

5. Practical national development

The ideas call for education, economic improvement, cooperation, and responsible leadership. Their significance lies in connecting national identity to the welfare of people; independence should enable a society that treats citizens fairly and advances their material and moral well-being.

L003. Assess Sir Syed Ahmad Khan's role as a reformer and the Aligarh Movement's contribution to Muslim advancement.

PS-09-A1-04 | 10 marks | Use headings and developed explanation

1. Historical need for reform

After 1857, many Muslims faced political decline and educational disadvantage. Sir Syed believed that recovery required learning, confidence, and a constructive understanding of the institutions and knowledge shaping the modern world.

2. Modern and scientific learning

He promoted English, science, and rational inquiry so that Muslims could compete in professional life. The Scientific Society, founded in 1864, helped make useful knowledge available through translation and discussion.

3. Educational institutions

The Muhammadan Anglo-Oriental College at Aligarh, established in 1877, became the institutional centre of his educational programme. It brought students together and developed skills needed for employment, leadership, and public participation.

4. Social and intellectual reform

His writings and publications encouraged reasoned debate, social improvement, and educational ambition. He sought to reduce mistrust and remove attitudes that kept Muslims isolated from modern opportunities, while preserving a sense of community identity.

5. Influence on later politics

Aligarh created educated networks, stronger self-confidence, and a clearer understanding of collective interests. Sir Syed died before the Muslim League's creation, but the movement he inspired helped prepare the social and intellectual ground for later Muslim political organization.

Grade 9 - Unit 2: Establishment of Pakistan

NBF Grade 9, PDF pp. 21-41

Included scope: PS-09-A1-05 to PS-09-A1-07; individual leaders under A1-08 excluded

Short questions - 5 marks each

S011. Explain the significance of the Simla Deputation of 1906.

PS-09-A1-05 | 5 marks | Five explained points

1. **Organized representation:** A Muslim delegation led by Aga Khan met Viceroy Lord Minto at Simla on 1 October 1906.
2. **Separate electorates:** It requested arrangements allowing Muslims to choose their own representatives.
3. **Adequate weight:** It argued that Muslim representation should reflect political importance as well as population.
4. **Service safeguards:** It sought fair access to government appointments and public institutions.
5. **Political impact:** Collective presentation of demands encouraged confidence and helped prepare the ground for Muslim political organization.

S012. Why was the All-India Muslim League established in 1906?

PS-09-A1-05 | 5 marks | Five explained points

1. **Protection of interests:** Muslim leaders wanted an organization able to defend their community's political rights.
2. **Representation:** They needed a common platform to present demands to the British government.
3. **Cultural safeguards:** Anxiety about language, religion, and identity encouraged organized political action.
4. **Growing differences:** Developments surrounding Bengal's partition increased concern that Congress did not adequately represent Muslim interests.
5. **Coordinated politics:** The League, founded at Dhaka on 30 December 1906, linked leaders for collective consultation and action.

S013. Explain the importance of separate electorates for Muslims.

PS-09-A1-05 | 5 marks | Five explained points

1. **Independent choice:** Muslim voters could elect representatives belonging to their own community.
2. **Minority protection:** Their representation would not depend entirely on the votes of a larger community.
3. **Political voice:** Elected members could raise Muslim educational, cultural, and economic concerns.
4. **Confidence:** The arrangement offered assurance that Muslim interests would have an organized place in legislatures.
5. **Historical recognition:** The Morley-Minto Reforms of 1909 recognized separate Muslim electorates and encouraged further political participation.

S014. Describe five important features or results of the Lucknow Pact of 1916.

PS-09-A1-05 | 5 marks | Five explained points

1. **Joint agreement:** Congress and the Muslim League agreed on a programme of political reforms.
2. **Separate electorates:** Congress accepted the principle of separate Muslim electorates.
3. **Central representation:** Muslims were to receive one-third of the seats in the central legislature.
4. **Minority safeguards:** The arrangement provided protection against measures opposed by a substantial majority of a community's representatives.
5. **Political importance:** The pact demonstrated temporary Hindu-Muslim cooperation and strengthened demands for greater Indian participation in government.

S015. Explain the aims and importance of the Khilafat Movement.

PS-09-A1-05 / PS-09-A1-06 | 5 marks | Five explained points

1. **Immediate aim:** Indian Muslims sought to protect the Ottoman Caliph's position after the First World War.
2. **Religious concern:** They wanted respect for the institution associated with Muslim unity and important holy places.
3. **Mass participation:** Public meetings, fundraising, and campaigns drew ordinary Muslims into political activity.
4. **Cooperation:** The movement temporarily brought many Muslim leaders and Congress supporters into a shared agitation.
5. **Political learning:** Mobilization strengthened experience of organization and protest, even though the movement did not achieve its original aim.

S016. Why did the Khilafat Movement decline?

PS-09-A1-06 | 5 marks | Five explained points

1. **Repression:** Arrests and official restrictions weakened leadership and public mobilization.
2. **Economic sacrifice:** Boycotts and disruption created difficulties for participants and reduced sustained support.
3. **Hijrat setback:** Migration to Afghanistan caused hardship and disappointment for many families.
4. **Loss of cooperation:** Gandhi's withdrawal of the Non-Cooperation Movement in 1922 weakened the wider joint campaign.
5. **Change in Turkey:** The Turkish abolition of the Caliphate in 1924 removed the institution the movement sought to preserve.

S017. Why did Muslims reject the Nehru Report of 1928?

PS-09-A1-06 | 5 marks | Five explained points

1. **Joint electorates:** Its proposals threatened the separate electorates regarded as essential safeguards by many Muslim leaders.
2. **Central influence:** Muslims considered the proposed central representation inadequate for protecting their political position.
3. **Strong centre:** A centralized arrangement raised fears that Muslim-majority provinces would lose effective autonomy.
4. **Safeguards dispute:** Muslim leaders believed the report did not satisfactorily secure cultural and political interests.

5. **Political consequence:** Its rejection encouraged Quaid-e-Azam to formulate the Fourteen Points as a programme of Muslim demands.

S018. Explain any five main demands of Quaid-e-Azam's Fourteen Points.

PS-09-A1-06 | 5 marks | Five explained points

1. **Federal structure:** A future federation should leave residuary powers with the provinces.
2. **Provincial autonomy:** Provinces should have meaningful authority over their own affairs.
3. **Central representation:** Muslims should receive at least one-third representation in the central legislature.
4. **Separate electorates:** Community representation should continue unless a community voluntarily accepted joint electorates.
5. **Cultural protection:** Safeguards should protect Muslim religion, language, education, culture, and charitable institutions.

S019. What was the significance of the Allahabad Address of 1930?

PS-09-A1-06 | 5 marks | Five explained points

1. **Political vision:** Iqbal presented a clear case for Muslim political consolidation in north-western India.
2. **Regional focus:** He discussed bringing Punjab, NWFP, Sindh, and Balochistan together in a Muslim political unit.
3. **Identity:** The address connected political arrangements with the preservation of Muslim religious and cultural life.
4. **Direction:** It gave later Muslim political discussion an influential statement of territorial and collective aspirations.
5. **Historical place:** It became a major intellectual milestone leading towards the demand for Pakistan.

S020. Explain the purpose and outcome of the Round Table Conferences.

PS-09-A1-06 | 5 marks | Five explained points

1. **Purpose:** Britain convened the conferences in London to discuss India's future political arrangements.
2. **Participation:** Representatives of British India, communities, and princely states presented different demands.
3. **Key questions:** Federal arrangements, provincial government, and minority protection were major issues.
4. **Disagreement:** Conflicting claims and the lack of agreement on representation prevented a satisfactory common settlement.
5. **Outcome:** The discussions influenced later proposals but failed to resolve the Muslim demand for secure political safeguards.

S021. Why was the Day of Deliverance observed on 22 December 1939?

PS-09-A1-06 | 5 marks | Five explained points

1. **Background:** Congress ministries had governed several provinces after the elections of 1937.
2. **Muslim grievances:** Muslim leaders criticized policies they believed threatened religious, educational, and cultural interests.

3. **Resignations:** Congress ministries resigned in 1939 after disputes over India's involvement in the Second World War.
4. **Call by Jinnah:** Quaid-e-Azam asked Muslims to mark relief from the ministries' rule peacefully.
5. **Political meaning:** The observance demonstrated deepening distrust and strengthened the demand for dependable Muslim political safeguards.

S022. State five important aspects of the Lahore Resolution of 1940.

PS-09-A1-07 | 5 marks | Five explained points

1. **Place and date:** The Muslim League met at Lahore, and the resolution was presented on 23 March 1940.
2. **Presenter:** A. K. Fazlul Huq moved the resolution during the League's annual session.
3. **Territorial principle:** It proposed grouping geographically contiguous Muslim-majority areas in north-western and eastern India.
4. **Autonomy and protection:** It envisaged autonomous and sovereign constituent units together with safeguards for minorities.
5. **Historical significance:** It gave the Muslim movement a territorial goal that developed into the demand for Pakistan.

S023. Why did the Cripps Mission of 1942 fail?

PS-09-A1-07 | 5 marks | Five explained points

1. **Delayed settlement:** Its main promises concerned arrangements after the Second World War rather than immediate independence.
2. **Limited transfer:** British control during wartime did not satisfy those demanding effective authority at once.
3. **Congress objections:** Congress opposed important limitations and did not accept the proposals as an adequate transfer of power.
4. **League objections:** The Muslim League considered the proposals insufficiently clear in recognizing its demand for Pakistan.
5. **Lack of agreement:** The main parties' conflicting objectives prevented a mutually accepted political settlement.

S024. Why did the Gandhi-Jinnah Talks of 1944 fail?

PS-09-A1-07 | 5 marks | Five explained points

1. **Different starting points:** Jinnah insisted that Muslims constituted a separate nation, while Gandhi did not accept that claim in the same sense.
2. **Timing dispute:** They differed over whether partition should be settled before or after independence.
3. **Territorial disagreement:** They could not agree on the areas and procedures through which a separate state might be created.
4. **Representative claim:** Gandhi attended in a personal capacity, which limited the authority of a negotiated settlement.
5. **Result:** Without agreement on the basis of Pakistan, the talks ended without resolving the central dispute.

S025. Explain the importance of the elections of 1945-46 for the Pakistan Movement.

PS-09-A1-07 | 5 marks | Five explained points

1. **Clear campaign:** The Muslim League made the demand for Pakistan central to its election message.
2. **Central success:** It won all 30 Muslim seats in the central legislative assembly.
3. **Provincial support:** Its strong performance in Muslim constituencies demonstrated widespread support for its programme.
4. **Representative claim:** The results strengthened the League's position as the principal political representative of Indian Muslims.
5. **Negotiating power:** Britain and Congress had to take the demand for Pakistan more seriously in subsequent negotiations.

S026. State five main features of the Cabinet Mission Plan of 1946.

PS-09-A1-07 | 5 marks | Five explained points

1. **Indian union:** It proposed a union including British Indian provinces and princely states.
2. **Limited central subjects:** The union would control defence, foreign affairs, and communications, with finance needed for those functions.
3. **Provincial groups:** Provinces were arranged in three groups, including Muslim-majority groupings in the north-west and east.
4. **Provincial powers:** Provinces would retain substantial authority over subjects outside the union's limited responsibilities.
5. **Interim arrangements:** A constituent process and interim government were proposed, but conflicting interpretations prevented a durable settlement.

S027. Explain five provisions or consequences of the 3 June Plan of 1947.

PS-09-A1-07 | 5 marks | Five explained points

1. **Partition decision:** The plan provided a route for dividing British India and transferring power.
2. **Punjab and Bengal:** Procedures allowed their legislatures to decide on partition of the provinces.
3. **NWFP and Sylhet:** Referendums were provided to determine the choices of the people in these areas.
4. **Sindh and British Balochistan:** Representative bodies were to decide their future according to the announced procedures.
5. **Consequence:** Acceptance of partition led to the legal arrangements establishing India and Pakistan in August 1947.

S028. Why was the Simon Commission opposed in India?

PS-09-A1-06 | 5 marks | Five explained points

1. **Appointment:** Britain appointed the commission in 1927 to review the working of earlier reforms.
2. **Composition:** All its members were British, with no Indian included in the body.
3. **Representation:** Many Indians objected to outsiders deciding their political future without equal Indian participation.
4. **Protest:** Opposition produced public demonstrations and the slogan Simon Go Back.
5. **Political result:** The controversy stimulated competing Indian proposals for future arrangements and exposed continuing disputes over community safeguards.

S029. Explain five important aspects of the Communal Award of 1932.

PS-09-A1-06 | 5 marks | Five explained points

1. **Announcement:** British Prime Minister Ramsay MacDonald announced the award after the failure to agree on minority representation.
2. **Community representation:** It provided separate electoral arrangements for several communities in British India.
3. **Reserved seats:** Seats were allocated to different groups in legislative institutions.
4. **Continuing dispute:** Muslim leaders remained concerned about representation and majority status in Punjab and Bengal.
5. **Historical place:** The award demonstrated the difficulty of producing a settlement accepted by all major political communities.

S030. Explain five historical features of the Government of India Act 1935.

PS-09-A1-06 | 5 marks | Five explained points

1. **Proposed federation:** The Act envisaged a federation involving British Indian provinces and princely states.
2. **Provincial autonomy:** It increased elected provincial government's authority, while governors retained important reserve powers.
3. **Division of subjects:** Federal, provincial, and concurrent lists allocated different areas of responsibility.
4. **Federal Court:** It provided a court to interpret and deal with specified constitutional questions.
5. **Historical result:** Its provincial provisions enabled the elections of 1937, while the planned all-India federation did not come into operation.

S031. Why did the Simla Conference of 1945 fail?

PS-09-A1-07 | 5 marks | Five explained points

1. **Purpose:** Lord Wavell convened leaders to discuss new executive arrangements before a lasting political settlement.
2. **Muslim representation:** Jinnah insisted that the Muslim League should nominate the Muslim representatives.
3. **Congress position:** Congress rejected the implication that it could not represent Muslims.
4. **Other claims:** Groups outside the League also claimed a right to places allocated to Muslims.
5. **Deadlock:** Failure to agree on who could nominate representatives prevented acceptance of the proposed executive arrangement.

S032. Explain five important aspects of the Indian Independence Act 1947 as a historical event.

PS-09-A1-07 | 5 marks | Five explained points

1. **Legal authority:** The British Parliament enacted the measure creating the legal basis for independence and partition.
2. **Two dominions:** It provided for India and Pakistan to become separate dominions in August 1947.
3. **End of control:** British authority over the governments of British India was brought to an end.
4. **Legislative power:** Each dominion's legislature received authority to make laws for its own territory.

5. **Consequences:** The transfer established Pakistan but also required urgent division of assets, administration, and institutions.

S033. What political lessons did Muslims draw from developments between 1906 and 1947?

PS-09-A1-05 / PS-09-A1-06 / PS-09-A1-07 | 5 marks | Five explained points

1. **Organization:** The Muslim League showed the value of a platform capable of coordinating demands across regions.
2. **Safeguards:** Disputes over representation encouraged insistence on arrangements that could effectively protect minority interests.
3. **Limits of agreement:** Lucknow and later negotiations demonstrated both the possibilities and difficulties of cooperation.
4. **Electoral mandate:** The elections of 1945-46 strengthened the League's authority by demonstrating support among Muslim voters.
5. **Clear objective:** The Lahore Resolution and subsequent campaigning helped unite political action around the goal of Pakistan.

Long questions - 10 marks each

L004. Analyze the major political developments from the Simla Deputation to the Lucknow Pact.

PS-09-A1-05 | 10 marks | Use headings and developed explanation

1. Simla Deputation, 1906

Muslim leaders collectively presented their demands to Lord Minto on 1 October 1906. Their call for separate electorates and adequate representation reflected concern that numerical minority status could leave their community without an effective political voice.

2. Formation of the Muslim League

The All-India Muslim League was founded at Dhaka on 30 December 1906. It provided a common organization to protect Muslim interests, communicate demands, and coordinate political activity across different regions of the subcontinent.

3. Reforms of 1909

The Morley-Minto Reforms recognized separate Muslim electorates. Although the reforms did not establish full self-government, the recognition gave Muslim leaders an institutional safeguard and encouraged further participation in representative politics.

4. Changing political expectations

The reversal of Bengal's partition in 1911 disappointed Muslim opinion. Such developments increased the perceived need for a dependable political organization and clearer protections rather than reliance on assurances alone.

5. Lucknow Pact, 1916

Congress and the Muslim League temporarily cooperated on reform proposals. Congress accepted separate electorates, and the agreement envisaged one-third Muslim representation at the centre. The pact was significant both as cooperation and as recognition of the need for community safeguards.

L005. Discuss the Khilafat Movement: aims, activities, causes of decline, and political importance.

PS-09-A1-05 / PS-09-A1-06 | 10 marks | Use headings and developed explanation

1. Origins and aims

After the First World War, Indian Muslims feared that the Ottoman settlement would undermine the Caliphate. The movement sought protection of the Caliph's position and respect for important Muslim religious concerns and places.

2. Mobilization and leadership

The Ali brothers and other leaders organized meetings, publicity, fundraising, and political action. The campaign brought people beyond the educated elite into public life, giving participants experience of leadership, organization, and sacrifice.

3. Cooperation and difficulties

The movement was associated with Gandhi's Non-Cooperation campaign and a period of Hindu-Muslim cooperation. Boycotts and the Hijrat initiative also imposed serious economic and social costs, exposing the limits of prolonged mass agitation.

4. Reasons for decline

Government repression weakened organization, and the withdrawal of Non-Cooperation in 1922 reduced joint momentum. Most decisively, political change within Turkey resulted in the abolition of the Caliphate in 1924, ending the institution's continued existence.

5. Historical importance

Despite failing in its immediate aim, the campaign broadened Muslim political awareness and organizational experience. Its difficulties also encouraged reflection about political alliances and the need for lasting safeguards for Muslim collective interests.

L006. Explain how political developments between 1927 and 1930 strengthened Muslim demands for safeguards.

PS-09-A1-06 | 10 marks | Use headings and developed explanation

1. Simon Commission

The appointment of an all-British commission in 1927 provoked objections because Indians were not included. The controversy encouraged Indian parties to debate their own proposals for future political arrangements and community representation.

2. Nehru Report

The 1928 report proposed a political settlement that many Muslim leaders regarded as insufficient. Disputes over joint electorates, representation, and provincial powers revealed that agreement on minority safeguards remained a central obstacle.

3. Quaid-e-Azam's response

Jinnah attempted to secure changes protecting Muslim interests. When compromise failed, he formulated the Fourteen Points in 1929, turning a range of grievances into a clear programme for political negotiations.

4. Principal safeguards

The points demanded federal arrangements, provincial autonomy, separate electorates, at least one-third Muslim representation at the centre, and protection of religious and cultural institutions. Together they aimed to prevent permanent political dependence on a majority.

5. Allahabad Address

Iqbal's 1930 address added an influential territorial dimension by discussing Muslim political consolidation in the north-west. The sequence of events showed that Muslim demands were moving beyond general assurances towards effective institutions and political autonomy.

L007. Why did the experience of Congress ministries strengthen Muslim political separatism between 1937 and 1939?

PS-09-A1-06 | 10 marks | Use headings and developed explanation

1. Election background

The elections of 1937 brought Congress into office in several provinces. The Muslim League's limited success initially exposed organizational weaknesses and encouraged it to improve contact with Muslim voters and local leaders.

2. Concern over political dominance

Muslim leaders feared that a strong majority party could govern without adequate respect for Muslim interests. Their criticism focused on whether constitutional safeguards would be effective in practice, rather than merely present in written arrangements.

3. Cultural and educational grievances

League accounts criticized the compulsory use of symbols, songs, and educational policies viewed as reflecting majority culture. Such controversies heightened insecurity about the future of Muslim language, religious identity, and community institutions.

4. Resignation and response

Congress ministries resigned in 1939 during the dispute over India's wartime involvement. Jinnah called for the peaceful observance of the Day of Deliverance on 22 December 1939, expressing relief and publicizing Muslim grievances.

5. Political consequences

The experience strengthened the League's appeal and reduced confidence that a united political system would automatically protect Muslims. It helped create the context in which the Lahore Resolution's demand for a distinct territorial settlement gained greater support.

L008. Trace the progress of the Pakistan Movement from the Lahore Resolution to the elections of 1945-46.

PS-09-A1-07 | 10 marks | Use headings and developed explanation

1. Lahore Resolution, 1940

The resolution called for a new territorial arrangement for Muslim-majority areas in the north-west and east. It made the League's political objective clearer and provided a focus for subsequent campaigning and organization.

2. Cripps proposals, 1942

Britain offered a future constituent process and dominion status after the war. The proposals failed because the principal parties disagreed over immediate authority, the political structure, and whether the Muslim demand had been adequately recognized.

3. Gandhi-Jinnah Talks, 1944

The talks brought the dispute over nationhood and partition into direct discussion. They ended without agreement because the two sides differed over the basis, timing, and territorial implications of creating Pakistan.

4. Simla Conference, 1945

The conference failed over representation in the proposed executive arrangements. The League insisted on its representative claim in relation to Muslims, making electoral evidence of that claim increasingly important for future negotiations.

5. Elections and mandate

In 1945-46 the League campaigned on Pakistan, won all Muslim central seats, and achieved strong provincial results. Its success transformed the demand into a powerful electoral claim that Britain and Congress could no longer easily disregard.

L009. Explain the final stages leading to the establishment of Pakistan during 1946-47.

PS-09-A1-07 | 10 marks | Use headings and developed explanation

1. Cabinet Mission Plan

The 1946 mission proposed a union with limited central responsibilities and groups of provinces. It attempted to reconcile a united India with substantial provincial and group autonomy, but conflicting interpretations prevented a stable agreement.

2. Political deadlock

The League and Congress disagreed over grouping, authority, and the future political settlement. Participation in interim arrangements did not remove the central dispute over Muslim self-determination, and communal tensions worsened the situation.

3. Mountbatten's negotiations

In 1947 the new Viceroy consulted major political leaders about transferring power. The failure of earlier compromise made partition the accepted route towards ending British rule, despite serious disagreement over its details and consequences.

4. 3 June Plan

The plan announced procedures for deciding the future of provinces and disputed choices, including referendums in NWFP and Sylhet. Punjab and Bengal faced partition, while other relevant representative bodies were to decide their position.

5. Independence and outcome

The Indian Independence Act provided the legal mechanism for two dominions and the end of British authority. Pakistan emerged in August 1947, achieving the League's demand, although partition also involved displacement, violence, and major administrative challenges.

Grade 9 - Unit 3: Land of Pakistan

NBF Grade 9, PDF pp. 42-50; major-city section excluded

Included scope: PS-09-B1-01 and PS-09-B1-02

Short questions - 5 marks each

S034. Describe Pakistan's geographical location in five points.

PS-09-B1-01 | 5 marks | Five explained points

1. **World region:** Pakistan lies in South Asia, in the Northern and Eastern Hemispheres.
2. **Coordinates:** The textbook gives its approximate extent as 24-37 degrees north latitude and 61-77 degrees east longitude.
3. **Eastern side:** India lies to the east of Pakistan.
4. **Northern and western sides:** China lies to the north-east, Afghanistan to the west and north-west, and Iran to the south-west.
5. **Southern side:** The Arabian Sea, part of the Indian Ocean, lies along Pakistan's southern coast.

S035. Explain five economic advantages of Pakistan's location.

PS-09-B1-02 | 5 marks | Five explained points

1. **Maritime access:** The Arabian Sea connects Pakistan with major international shipping routes and overseas markets.
2. **Transit potential:** Pakistan can provide routes between landlocked Afghanistan or Central Asia and seaports.
3. **Regional link:** Routes through the north connect Pakistan with China and support overland commercial exchange.
4. **Energy access:** Proximity to the Middle East gives access to an important region supplying oil and gas.
5. **Coastal opportunities:** Ports, fisheries, shipping services, and coastal tourism create employment and business opportunities.

S036. Explain the importance of the Arabian Sea for Pakistan.

PS-09-B1-02 | 5 marks | Five explained points

1. **Trade gateway:** It provides sea routes for importing machinery, fuel, and other goods and exporting Pakistani products.
2. **Ports:** Karachi, Port Qasim, and Gwadar connect the national economy with international shipping.
3. **Fisheries:** Coastal waters provide food, employment, and exportable marine products.
4. **Regional access:** Sea connections link Pakistan with the Middle East, East Africa, and other Indian Ocean regions.
5. **Economic services:** Shipping, cargo handling, boat building, and tourism support livelihoods along the coast.

S037. How can Pakistan's location benefit landlocked neighbouring regions?

PS-09-B1-02 | 5 marks | Five explained points

1. **Meaning:** Landlocked countries do not possess their own direct coastline for maritime trade.

2. **Sea access:** Routes through Pakistan can link Afghanistan and Central Asian markets with the Arabian Sea.
3. **Connectivity:** Roads, rail links, and efficient border procedures can connect inland producers to ports.
4. **Mutual benefits:** Transit business can create transport, warehousing, and service employment within Pakistan.
5. **Conditions:** Reliable infrastructure, reasonable costs, and secure commercial movement are necessary to realize these advantages.

Long questions - 10 marks each

L010. Explain Pakistan's location and assess its geographical and economic importance.

PS-09-B1-01 / PS-09-B1-02 | 10 marks | Use headings and developed explanation

1. Location and boundaries

Pakistan lies in South Asia, approximately between 24-37 degrees north and 61-77 degrees east as given in the textbook. India lies to its east, China to the north-east, Afghanistan to the west and north-west, and Iran to the south-west.

2. Access to the Arabian Sea

The southern coastline opens onto the Arabian Sea and therefore the Indian Ocean. Ports enable international trade in goods that would be costly or difficult to move entirely by land, especially fuel, machinery, and bulk cargo.

3. Regional transit potential

Pakistan can connect inland Afghanistan and Central Asian markets with seaports. Road and rail services can generate business and employment, although efficient border handling and dependable infrastructure are needed to turn geographical proximity into actual commercial benefits.

4. Links with China and the Middle East

Northern routes support overland connections with China, while sea access gives links to Middle Eastern markets and energy supplies. This location offers possibilities for investment, processing, transport services, and a broader range of trading relationships.

5. Coastal resources and evaluation

Fishing, shipping, port services, and tourism increase the value of Pakistan's position. Location alone does not guarantee growth: maintaining transport, protecting coastal resources, improving skills, and reducing delays are necessary to use these opportunities effectively.

Grade 9 - Unit 4: Natural Topography and Vegetation

NBF Grade 9, PDF pp. 52-70

Included scope: PS-09-B2-01 to PS-09-B2-04

Short questions - 5 marks each

S038. Identify five major physical regions of Pakistan and state one feature of each.

PS-09-B2-01 / PS-09-B2-02 | 5 marks | Five explained points

1. **Northern mountains:** The Himalaya, Karakoram, and Hindu Kush contain high peaks, glaciers, and deep valleys.
2. **Western mountains:** Ranges such as the Sulaiman and Kirthar form rugged land with limited cultivation.
3. **Balochistan Plateau:** This dry south-western region contains uplands, basins, and mineral resources.
4. **Potwar Plateau and Salt Range:** The northern Punjab uplands have uneven relief, rainfed farming, and important mineral deposits.
5. **Indus Plain:** The extensive alluvial lowland along the Indus system supports irrigated agriculture and dense settlement.

S039. Explain the importance of the northern mountains for Pakistan.

PS-09-B2-01 / PS-09-B2-04 | 5 marks | Five explained points

1. **Water supply:** Stored snow and glacier ice contribute meltwater to rivers supporting households and agriculture.
2. **Hydropower:** Steep gradients and river flows provide opportunities for generating electricity.
3. **Tourism:** Peaks, valleys, and scenery attract visitors and support guiding, accommodation, and transport employment.
4. **Natural habitats:** Mountain ecosystems support forests, pastures, and distinctive wildlife that need protection.
5. **Local livelihoods:** Forestry products, livestock, orchard cultivation, and handicrafts provide income where terrain permits.

S040. Compare life in mountainous areas with life in the Indus Plain.

PS-09-B2-03 | 5 marks | Five explained points

1. **Relief:** Steep slopes and narrow valleys restrict cultivation in mountains, while flatter plains allow larger fields.
2. **Climate:** Highland conditions are generally cooler, whereas lowland summers are hotter.
3. **Farming:** Terracing, orchards, and livestock are common mountain activities; extensive irrigated crops dominate much of the plain.
4. **Transport:** Mountain roads are costly and vulnerable to blockage, while flat terrain facilitates wider road and rail networks.
5. **Settlement:** People concentrate in suitable mountain valleys, whereas accessible fertile plains support more continuous and dense settlement.

S041. Describe five characteristics of the Balochistan Plateau.

PS-09-B2-02 / PS-09-B2-03 | 5 marks | Five explained points

1. **Position:** It occupies much of south-western Pakistan and contains highlands, valleys, and inland basins.
2. **Dry conditions:** Low and irregular rainfall restricts natural vegetation and rainfed agriculture.
3. **Water management:** Groundwater, springs, and traditional karez systems support cultivation where water is available.
4. **Livelihoods:** Livestock, orchards, mining, and local trade are important economic activities.
5. **Development limits:** Water scarcity, rugged terrain, and widely dispersed settlements increase the cost of services and transport.

S042. Explain the economic importance of the Indus Plain.

PS-09-B2-02 / PS-09-B2-04 | 5 marks | Five explained points

1. **Fertile soils:** River-deposited alluvium provides a productive base for growing many crops.
2. **Irrigation:** Canals and other water infrastructure support farming where rainfall is insufficient.
3. **Population and labour:** Agricultural and industrial settlements create large labour forces and markets.
4. **Transport:** Relatively level ground makes roads and railways easier to build than in rugged mountains.
5. **Industrial linkages:** Cotton, wheat, rice, and sugarcane support textiles, milling, processing, and commercial services.

S043. Explain how vegetation differs across Pakistan's landforms.

PS-09-B2-03 | 5 marks | Five explained points

1. **Mountain forests:** Cooler, sufficiently moist slopes support coniferous trees and other highland vegetation.
2. **Alpine areas:** Above the tree line, short grasses and shrubs occur during the brief growing season.
3. **Dry uplands:** Low rainfall supports sparse shrubs, grasses, and drought-tolerant trees rather than dense forest.
4. **Indus Plain:** Riverine vegetation and cultivated trees occur alongside fields where moisture is available.
5. **Coastal belt:** Mangroves occur in suitable saline, tidal environments, especially around the Indus Delta.

S044. How do landforms affect transport and economic activity in Pakistan?

PS-09-B2-03 / PS-09-B2-04 | 5 marks | Five explained points

1. **Construction costs:** Steep slopes require bridges, tunnels, and cuttings, making transport expensive.
2. **Accessibility:** Passes and valleys channel movement, while remote areas can remain difficult to reach.
3. **Agriculture:** Flat fertile land supports mechanized crops; uplands often favour terraces, orchards, or grazing.
4. **Hazards:** Landslides, erosion, and snow can interrupt mountain roads and isolate settlements.
5. **Economic opportunities:** Landforms also provide minerals, hydropower sites, scenic tourism, and locations for specialized local production.

S045. Suggest five ways to use Pakistan's topography for sustainable development.

PS-09-B2-04 | 5 marks | Five explained points

1. **Responsible tourism:** Develop trails and accommodation while controlling waste and protecting fragile slopes.
2. **Suitable energy:** Evaluate hydropower sites carefully and protect downstream water needs and affected communities.
3. **Soil protection:** Use terracing, controlled grazing, and tree planting to reduce erosion and maintain productive land.
4. **Local enterprise:** Support orchards, handicrafts, and carefully regulated mineral extraction suited to local conditions.
5. **Resilient access:** Build and maintain roads with drainage and slope protection so development does not increase hazard exposure.

S046. Describe five features or economic uses of the Potwar Plateau and Salt Range.

PS-09-B2-02 / PS-09-B2-03 | 5 marks | Five explained points

1. **Position:** These uplands lie in northern Punjab, between important river valleys and south of the Himalayan foothills.
2. **Relief:** Uneven, dissected ground distinguishes the plateau from the broad alluvial plain farther south.
3. **Farming:** Rainfed or barani cultivation is important where soils and rainfall permit it.
4. **Minerals:** The Salt Range is especially associated with rock salt and other mineral-based activity.
5. **Management:** Water conservation, suitable cultivation, and control of soil erosion are important for sustained local livelihoods.

S047. Explain five characteristics of Pakistan's desert regions.

PS-09-B2-02 / PS-09-B2-03 | 5 marks | Five explained points

1. **Examples:** Thar, Cholistan, Thal, and Kharan are important desert areas discussed in the textbook.
2. **Moisture:** Low or unreliable rainfall and high evaporation limit water availability.
3. **Vegetation:** Drought-resistant shrubs and grasses are more typical than dense forest.
4. **Livelihoods:** Livestock, crafts, and limited cultivation around reliable water sources support local households.
5. **Development needs:** Safe water, controlled grazing, suitable crops, and carefully managed tourism can improve income without degrading scarce resources.

Long questions - 10 marks each

L011. Describe Pakistan's major landforms and explain their economic importance.

PS-09-B2-01 / PS-09-B2-02 / PS-09-B2-04 | 10 marks | Use headings and developed explanation

1. Northern and north-western mountains

The Himalaya, Karakoram, and Hindu Kush include high peaks, glaciers, and deeply cut valleys. They store water, offer hydropower sites, and attract tourism. Steep terrain and harsh winters nevertheless restrict farming and make transport costly.

2. Western mountain ranges

Ranges including the Sulaiman and Kirthar form rugged western terrain. Grazing and limited farming occur where water is available, while passes support movement. Mineral resources create opportunities, but extraction and transport require investment and environmental care.

3. Balochistan Plateau

This south-western upland contains dry basins and irregular relief. Livestock, orchards, minerals, and groundwater-supported cultivation are important. Water scarcity limits growth, so development must be matched to local supplies and sustainable extraction rates.

4. Potwar Plateau and Salt Range

The uneven uplands of northern Punjab support rainfed cultivation, settlements, and mineral-based activity. Soil erosion and unreliable rainfall create difficulties, making water conservation, suitable land management, and careful infrastructure planning particularly important.

5. Indus Plain, deserts, and coast

The alluvial plain supports intensive irrigation, settlement, industry, and transport. Deserts favour drought-adapted livelihoods and require careful water use. The southern coast supports fishing and ports, while protection of mangroves and other habitats helps preserve long-term economic value.

L012. Compare the environment and lifestyles of mountain, plain, and dry-plateau regions.

PS-09-B2-03 | 10 marks | Use headings and developed explanation

1. Relief and settlement

Mountain settlements concentrate in valleys because steep slopes leave limited usable land. Plains permit wider and denser settlement. Dry plateaus have more dispersed communities, often located around reliable water sources, routes, and productive land.

2. Climate and vegetation

Mountains are generally cooler, with vegetation changing by altitude and moisture. Plains have hotter summers and support extensive cultivation where irrigation exists. Dry plateau vegetation is sparse and adapted to water shortage, with grazing dependent on seasonal conditions.

3. Agriculture and water

Mountain farmers may cultivate terraces and orchards and keep livestock. Plains support broad areas of wheat, rice, cotton, and sugarcane through canals and wells. Plateau cultivation relies more heavily on groundwater, springs, karez, and careful selection of suitable crops.

4. Transport and employment

Level ground permits cheaper and denser transport networks and therefore supports larger markets and processing industries. Mountains and uplands face high construction costs and closures; tourism, mining, handicrafts, and localized trade provide alternative opportunities.

5. Seasonal adaptation and sustainability

Highland herders may move livestock between summer and winter pastures. Dry-region communities adjust activity to pasture and water availability. Across all regions, development succeeds when roads, farming methods, and services suit the environment instead of exceeding its resources.

L013. Assess the potential and limits of Pakistan's topography for future development.

PS-09-B2-04 | 10 marks | Use headings and developed explanation

1. Water and energy potential

Mountain rivers offer opportunities for water storage and hydroelectricity. These can support homes and industry, but site selection should consider sediment, downstream flows, ecological impacts, displacement, and the long-term reliability of water supplies.

2. Agriculture and grazing

Fertile plains support major crops, while uplands offer orchards, terraces, and grazing. Improving production requires matching land use to soils, slope, and available water. Overgrazing and unsuitable cultivation can otherwise damage the productive resource itself.

3. Tourism and cultural enterprise

Scenery, wildlife, mountains, deserts, and coastal environments provide varied tourism opportunities. Local guides, accommodation providers, and craftspeople can benefit, particularly when visitors' spending remains within communities and waste and habitat disturbance are controlled.

4. Minerals and connectivity

Plateaus and mountains contain valuable resources, and routes through suitable passes connect regions. Economic gains depend on safe extraction, reliable transport, skills, and investment. Rugged relief and widely dispersed settlements make infrastructure and public services expensive.

5. Balanced evaluation

Topography creates opportunities but also imposes limits through water scarcity, erosion, landslides, and fragile habitats. Sustainable development combines local participation, hazard-aware construction, conservation, and appropriate technology so that present income does not destroy future livelihoods.

Grade 9 - Unit 5: Climate and Environmental Hazards

NBF Grade 9, PDF pp. 71-92; climate-data interpretation excluded

Included scope: PS-09-B3-01, PS-09-B3-03 and PS-09-B3-04

Short questions - 5 marks each

S048. Describe the main climatic zones of Pakistan.

PS-09-B3-01 / PS-09-B3-03 | 5 marks | Five explained points

1. **Highland:** Northern and western uplands generally experience cooler conditions, with cold winters and snowfall at suitable elevations.
2. **Lowland:** The Indus Plain has hot summers, cooler winters, and rainfall that varies substantially from north to south.
3. **Arid:** Deserts and dry parts of Balochistan receive little, unreliable rain and experience considerable evaporation.
4. **Coastal:** The Arabian Sea moderates temperature near the coast, where humidity and sea breezes are important.
5. **Within-zone variation:** Altitude, relief, and distance from moist winds produce wetter, semi-arid, or rain-shadow conditions within broad zones.

S049. Explain five factors that cause temperature differences within Pakistan.

PS-09-B3-01 / PS-09-B3-03 | 5 marks | Five explained points

1. **Latitude:** Southern areas generally receive stronger solar heating than areas farther north.
2. **Altitude:** Higher places are usually cooler because air temperature generally falls with increasing elevation.
3. **Distance from sea:** Inland places experience greater temperature extremes than coastal places moderated by water.
4. **Cloud cover:** Clouds influence incoming sunlight and night-time heat loss, changing daily temperature conditions.
5. **Seasonal conditions:** Changing solar angle, winds, and rainfall alter heating and cooling during the year.

S050. Explain how summer monsoon rainfall develops and affects Pakistan.

PS-09-B3-01 / PS-09-B3-04 | 5 marks | Five explained points

1. **Unequal heating:** In summer, land heats rapidly and develops relatively low pressure compared with surrounding seas.
2. **Moist winds:** Air carrying moisture moves towards the subcontinent from the Arabian Sea and Bay of Bengal.
3. **Uplift:** Rising warm moist air cools, allowing condensation, cloud formation, and rainfall.
4. **Water benefits:** Rain supports crops, replenishes reservoirs, and contributes to groundwater recharge.
5. **Hazard risk:** Excessive or concentrated rain can cause flooding, erosion, landslides, and disruption of transport.

S051. Why are western depressions important for Pakistan?

PS-09-B3-01 / PS-09-B3-04 | 5 marks | Five explained points

1. **Origin:** They are weather systems moving eastwards from the Mediterranean region towards western South Asia.
2. **Season:** They are especially important during the cooler part of the year.
3. **Rainfall:** They provide winter precipitation to northern and western Pakistan and parts of the plains.
4. **Snow storage:** Mountain snowfall becomes an important source of meltwater during warmer months.
5. **Agricultural value:** Winter rain can support Rabi crops, although heavy rain or snow may also damage crops and block roads.

S052. Distinguish between convectional rainfall and relief rainfall in five points.

PS-09-B3-01 | 5 marks | Five explained points

1. **Initial cause:** Convectional rain begins with strong surface heating; relief rain begins when mountains force moist air upwards.
2. **Air movement:** Convection produces rising columns of warm air, whereas relief produces uplift along a slope.
3. **Condensation:** In both types, uplifted air cools, allowing water vapour to condense into cloud droplets.
4. **Distribution:** Convectional showers are often localized; relief rain is associated with windward mountain slopes.
5. **Pakistani examples:** Early-summer thunderstorms can occur around northern Punjab, while mountain slopes receive rain where moist winds are forced upwards.

S053. Explain five causes of river flooding in Pakistan.

PS-09-B3-04 | 5 marks | Five explained points

1. **Heavy rain:** Intense or prolonged monsoon rainfall increases runoff and river discharge.
2. **Snow and glacier melt:** High temperatures can add meltwater to rivers already carrying large flows.
3. **Deforestation:** Loss of vegetation reduces interception and increases rapid surface runoff.
4. **Channel limitations:** Sediment, obstructed drainage, and insufficient channel capacity reduce the space available for floodwater.
5. **Floodplain encroachment:** Building on natural drainage routes and floodplains obstructs flow and exposes more people and property.

S054. Explain five effects of drought on Pakistan's economy.

PS-09-B3-03 / PS-09-B3-04 | 5 marks | Five explained points

1. **Crop losses:** Insufficient moisture reduces yields and can destroy crops, lowering farm incomes.
2. **Livestock stress:** Scarce drinking water and fodder weaken animals and reduce milk and meat production.
3. **Water shortage:** Households and industries face difficulty obtaining dependable supplies for essential use.
4. **Employment loss:** Reduced farm output and processing activity cut work and increase rural hardship.

5. **Migration and costs:** Families may move in search of income, while pumping, food, and emergency support become more expensive.

S055. Suggest five measures to reduce damage from floods, storms, and droughts.

PS-09-B3-04 | 5 marks | Five explained points

1. **Early warning:** Forecasting and timely public alerts allow evacuation and protective action before severe weather.
2. **Safer land use:** Keep buildings away from high-risk floodplains, unstable slopes, and exposed coastal locations.
3. **Infrastructure:** Maintain drainage, embankments, roads, and water-storage facilities with suitable hazard protection.
4. **Water conservation:** Harvest rainwater and use efficient irrigation and drought-tolerant crops to reduce dry-season vulnerability.
5. **Prepared communities:** Practise response plans, protect livestock and supplies, and organize emergency shelter and medical support.

Long questions - 10 marks each

L014. Compare Pakistan's climatic regions and explain how they shape human activity.

PS-09-B3-01 / PS-09-B3-03 | 10 marks | Use headings and developed explanation

1. Highland climate

Northern and western mountains generally have colder winters than the plains, with snow at higher elevations. Shorter growing seasons, difficult winter access, and slope conditions encourage adapted farming, livestock management, and seasonal tourism rather than uniform year-round activity.

2. Lowland climate

The Indus Plain experiences hot summers and cooler winters. Rainfall varies across the region and between seasons, so irrigation is essential in many areas. Warm conditions allow multiple crops where water and other inputs are adequate.

3. Arid and semi-arid conditions

Dry regions experience low or unreliable rainfall and high evaporation. Sparse vegetation limits grazing and rainfed production. Groundwater, karez systems, water storage, and drought-adapted crops are important, while over-extraction can make livelihoods less secure.

4. Coastal climate

The sea moderates temperatures and raises humidity along the coast. Fishing, port services, and coastal recreation benefit from maritime access, but communities also face storm surges, cyclones, and the need to protect fragile coastal habitats.

5. Reasons for variation

Altitude, latitude, relief, distance from the sea, and exposure to moisture-bearing winds explain the differences. These factors can also create wet slopes and dry rain shadows within one broad zone, so development and agriculture must respond to local conditions.

L015. Explain Pakistan's main sources of rainfall and their seasonal importance.

PS-09-B3-01 / PS-09-B3-04 | 10 marks | Use headings and developed explanation

1. Summer monsoon

During summer, rapid land heating creates pressure conditions that draw in moisture-bearing winds. The Arabian Sea and Bay of Bengal branches contribute rainfall, especially where air is lifted. Monsoon water supports crops and storage but excessive rainfall creates flood risk.

2. Western depressions

Weather systems moving from the Mediterranean region bring important cool-season rain and mountain snow. Winter precipitation supports Rabi cultivation in suitable areas, while accumulated snow contributes to later river flows. Heavy snow can also close highland routes.

3. Convectional rainfall

Strong heating makes air rise, cool, and condense into clouds. Localized heavy showers and thunderstorms may occur, particularly in early summer in northern areas. Such rain can briefly relieve dry conditions but may also bring hail and damaging winds.

4. Relief rainfall

Mountains force moist air upwards; cooling and condensation then produce rain or snow on windward slopes. Leeward areas can remain comparatively dry, creating rain-shadow conditions. Relief therefore helps explain why nearby places can receive very different precipitation.

5. Coastal storms and overall importance

Tropical cyclones can bring intense rain, high winds, and storm surges to coastal areas. The combined sources influence crop choice, river flow, and water supply, but their uneven distribution makes storage, drainage, and efficient water use necessary.

L016. Assess the effects of seasonal weather and hazards on Pakistan's economy and suggest responses.

PS-09-B3-04 | 10 marks | Use headings and developed explanation

1. Agriculture and livestock

Useful rain supports crop growth and grazing, but badly timed floods, hail, heat, and drought can destroy harvests and livestock. Farmers lose income and food supplies become less secure. Suitable crop varieties, forecasts, drainage, and efficient irrigation reduce these risks.

2. Industry and energy

Damage to roads, power infrastructure, and water supplies can interrupt manufacturing. Industries using farm inputs also suffer when crops fail. More resilient infrastructure, emergency planning, and diversified supplies help reduce disruption to production and employment.

3. Transport and communication

Snow, ice, landslides, river floods, and storms can close roads, damage bridges, and isolate settlements. Proper drainage, slope protection, maintenance, and advance warnings improve reliability and allow essential movement during difficult conditions.

4. Settlements and households

Floodwater and cyclones damage homes and drinking-water systems; drought creates shortages and may force migration. Hazard-aware siting, evacuation routes, shelters, safe water, and rapid medical assistance protect lives and reduce the long-term costs of disasters.

5. Sustainable management

Combine early warning with watershed protection, water conservation, maintained flood infrastructure, and community training. No measure removes every risk, so planning should address prevention, emergency response, and recovery together rather than relying only on relief after damage occurs.

Grade 9 - Unit 6: Water Resources

NBF Grade 9, PDF pp. 93-105

Included scope: PS-09-C1-01 to PS-09-C1-03

Short questions - 5 marks each

S056. Describe five important water resources of Pakistan.

PS-09-C1-01 | 5 marks | Five explained points

1. **Indus system:** The Indus and its tributaries form the main surface-water network supporting irrigation and human use.
2. **Rivers and streams:** Flowing water supplies farms, settlements, industry, and suitable hydropower projects.
3. **Reservoirs:** Structures such as Tarbela on the Indus and Mangla on the Jhelum store water for later use.
4. **Groundwater:** Aquifers, especially beneath the Indus Plain, supply water through wells and tube wells.
5. **Local sources:** Springs, lakes, and collected rainwater help communities where major river or canal supplies are limited.

S057. Explain seasonal changes in the availability and quality of water.

PS-09-C1-01 | 5 marks | Five explained points

1. **Rainfall contribution:** Monsoon rainfall increases runoff, river flow, and reservoir replenishment during the wet season.
2. **Meltwater contribution:** Warmer conditions increase snow and glacier melt, adding water to rivers draining mountain regions.
3. **Cool-season conditions:** Reduced melting and generally lower rainfall in many areas can reduce flows and increase dependence on storage.
4. **Flood contamination:** Heavy runoff can carry sewage, agricultural chemicals, and sediment into water sources.
5. **Low-flow concentration:** During dry periods, less dilution and over-extraction can worsen pollution and water-supply problems locally.

S058. State five advantages of Pakistan's irrigation system.

PS-09-C1-02 | 5 marks | Five explained points

1. **Reliable cultivation:** Irrigation supplies moisture where rainfall is low or unreliable.
2. **Higher output:** Better water availability supports increased yields and, where suitable, more than one crop cycle.
3. **Food security:** Irrigated wheat, rice, and other food crops help meet the needs of the population.
4. **Economic links:** Farm output supports rural employment, food processing, textiles, and export earnings.
5. **Livelihood stability:** Dependable water reduces exposure to rainfall failure and supports crop diversification and livestock supplies.

S059. Explain five problems associated with extensive irrigation.

PS-09-C1-02 | 5 marks | Five explained points

1. **Waterlogging:** Excess application and inadequate drainage raise water levels and reduce air around plant roots.
2. **Salinity:** Evaporation and poor drainage leave salts in soil, lowering fertility and crop yields.
3. **Water losses:** Leaking channels and inefficient field application waste water before crops can use it.
4. **Unequal access:** Head-end use, weak management, and water theft can disadvantage farmers farther along channels.
5. **Environmental costs:** Diversions, pollution, and excessive groundwater pumping can damage habitats and reduce downstream or future supplies.

S060. Suggest five sustainable ways to reduce water shortage and pollution.

PS-09-C1-02 | 5 marks | Five explained points

1. **Efficient irrigation:** Drip or sprinkler systems, suitable scheduling, and field levelling can reduce avoidable losses.
2. **Maintained channels:** Repair leaks and improve canal and watercourse management while considering groundwater recharge needs.
3. **Safe waste disposal:** Treat sewage and industrial effluent before discharge and control harmful agricultural runoff.
4. **Storage and recharge:** Harvest rainwater and use suitable local storage and aquifer-recharge measures.
5. **Responsible use:** Monitor groundwater extraction, distribute water fairly, and teach users to conserve and protect supplies.

S061. Distinguish the functions of dams, barrages, canals, and reservoirs.

PS-09-C1-03 | 5 marks | Five explained points

1. **Dam:** A barrier across a river can raise water levels and create storage for planned releases.
2. **Reservoir:** A stored body of water holds supplies for dry periods and other managed uses.
3. **Barrage:** Gates regulate river levels and divert water into canals, usually with much less storage than a major dam.
4. **Canal:** An artificial channel carries water from its source towards farms and other users.
5. **Combined system:** These structures work together to store, regulate, and distribute water and, at suitable dams, generate electricity.

S062. Explain five benefits and costs of large water-storage projects.

PS-09-C1-03 | 5 marks | Five explained points

1. **Irrigation benefit:** Stored water supports crops when natural flows or rainfall are inadequate.
2. **Energy benefit:** Suitable dams generate hydroelectricity and can reduce reliance on imported fuel.
3. **Flow management:** Managed storage can moderate some floods, although it cannot prevent every damaging flood.
4. **Social cost:** Reservoir construction may displace families and require fair compensation and rehabilitation.

5. **Environmental cost:** Altered flows, sediment accumulation, and disturbed habitats require assessment and continuing management.

Long questions - 10 marks each

L017. Evaluate Pakistan's irrigation system and suggest sustainable improvements.

PS-09-C1-02 | 10 marks | Use headings and developed explanation

1. Importance for production

Much of Pakistan has insufficient or unreliable rainfall, making irrigation essential for farming. Canals and wells support food crops, cash crops, rural work, and industries using agricultural raw materials. Reliable supplies also make crop diversification and planned cultivation more feasible.

2. Problems of inefficient use

Leaking channels, unsuitable irrigation methods, and poor scheduling waste valuable water. Unequal distribution means that head-end users may receive more than those farther away. Transparent allocation, measurement, maintenance, and cooperation among users can improve fairness and efficiency.

3. Waterlogging and salinity

Excess watering with inadequate drainage raises the water table, reduces root aeration, and encourages salt accumulation. These conditions lower yields and can remove productive land from cultivation. Better drainage and appropriate application help protect soil quality.

4. Pollution and groundwater pressure

Untreated waste and farm chemicals can contaminate irrigation and drinking supplies. Excessive pumping also lowers groundwater levels and increases costs. Treatment, pollution control, monitoring, and limits suited to local aquifer conditions are needed to prevent lasting damage.

5. Practical sustainable solutions

Use suitable drip or sprinkler methods, land levelling, crop choices matched to available water, and repaired infrastructure. Combine these with rainwater harvesting, carefully planned storage, public education, and fair management so that improved output does not depend on exhausting future supplies.

L018. Explain the role of dams, barrages, canals, and reservoirs, including their benefits and adverse effects.

PS-09-C1-03 | 10 marks | Use headings and developed explanation

1. Storage and regulation

Dams can impound water in reservoirs, while barrages regulate levels and divert flows into canals. Reservoirs store supplies and canals distribute them. Together they reduce dependence on the immediate flow of a river, although each structure performs a different function.

2. Irrigation and food security

Stored and diverted water supports cultivation during dry periods and enables farmers to plan production. This increases the reliability of food and industrial crops, supports rural incomes, and supplies related processing and transport activities.

3. Electricity and industry

Suitable dams use falling water to generate hydroelectricity. Reliable power and water support industrial production, households, and services. Barrages should not automatically be described as large storage or electricity-generating structures; their principal role is often diversion and regulation.

4. Flood management and limits

Available reservoir storage can reduce some downstream flood peaks. However, capacity, sediment, forecasts, and operating decisions influence effectiveness. Poorly timed releases and extreme inflows can still produce dangerous downstream conditions, so warning and land-use planning remain necessary.

5. Social and environmental safeguards

Projects can displace settlements, alter fish habitats and downstream flows, and trap sediment. Sound assessment, compensation, rehabilitation, environmental-flow provision, and continuing monitoring help balance economic benefits against costs imposed on people and ecosystems.

Grade 9 - Unit 7: Population - Included Migration and Youth Topics

NBF Grade 9, PDF pp. 110-117; C2-01 material excluded

Included scope: PS-09-C2-02 and PS-09-C2-03

Short questions - 5 marks each

S063. Explain five causes of rural-to-urban migration.

PS-09-C2-02 | 5 marks | Five explained points

1. **Rural unemployment:** Limited local work pushes people towards places offering more varied employment.
2. **Low farm income:** Small holdings, poor yields, and insecure earnings encourage families to seek alternative livelihoods.
3. **Environmental pressures:** Drought, floods, and degraded land can make remaining in rural areas difficult.
4. **Urban services:** Better access to education, healthcare, housing, and utilities attracts migrants.
5. **Social networks:** Relatives and existing community contacts in cities can help migrants find information, accommodation, and work.

S064. Explain five consequences of rapid rural-to-urban migration.

PS-09-C2-02 | 5 marks | Five explained points

1. **Housing pressure:** Demand can exceed affordable housing supply, encouraging overcrowding and informal settlements.
2. **Service shortages:** Water, sanitation, electricity, schools, and healthcare may struggle to meet rapid growth in demand.
3. **Transport problems:** More movement and vehicles can increase congestion, journey times, and pollution.
4. **Employment mismatch:** Migrants without suitable skills may face unemployment or insecure low-paid work.
5. **Uneven development:** Rural areas can lose workers while cities gain labour and markets, making balanced planning important.

S065. Explain seasonal migration with suitable examples.

PS-09-C2-02 | 5 marks | Five explained points

1. **Meaning:** Seasonal migration is repeated movement related to changing work, climate, or resource conditions during the year.
2. **Transhumance:** Highland herders move livestock to higher pastures in summer and lower, warmer areas in winter.
3. **Farm labour:** Workers travel temporarily for labour-intensive tasks such as harvesting, cotton picking, or crop transport.
4. **Resource search:** Herding communities may move when water and grazing become scarce, although not all nomadic movement follows a fixed seasonal route.
5. **Economic importance:** Movement helps households use available resources and earn income, but can disrupt children's schooling and access to services.

S066. Suggest five ways to reduce the harmful effects of rural-to-urban migration.

PS-09-C2-02 | 5 marks | Five explained points

1. **Rural employment:** Develop local enterprises and agricultural processing so people have viable income options near home.
2. **Better rural services:** Improve schools, healthcare, water, electricity, and connectivity to reduce forced migration.
3. **Training:** Provide skills and reliable job information so migrants can enter productive employment.
4. **Planned urban growth:** Expand affordable housing, sanitation, transport, and other services in areas receiving migrants.
5. **Regional investment:** Support smaller towns and rural market centres so opportunities are distributed more evenly.

S067. Identify five problems faced by young and dependent people and suggest responses.

PS-09-C2-03 | 5 marks | Five explained points

1. **Education gaps:** Children and young people need accessible, good-quality schooling and opportunities to complete their studies.
2. **Unemployment:** Job-oriented training, apprenticeships, and enterprise support can help young people move into productive work.
3. **Healthcare needs:** Children, older people, and persons with disabilities require affordable treatment and appropriate care.
4. **Financial dependence:** Targeted assistance can protect vulnerable households when dependants cannot earn their own income.
5. **Social exclusion:** Safe recreation, counselling, inclusive facilities, and support against exploitation help people participate with dignity.

S068. How can government and NGOs develop Pakistan's human resources?

PS-09-C2-03 | 5 marks | Five explained points

1. **Education:** Expand equitable access to schools and adult literacy so more people gain essential capabilities.
2. **Technical skills:** Offer training linked to actual employment needs and practical work experience.
3. **Health and nutrition:** Improve preventive care, treatment, safe water, and nutrition to support learning and productivity.
4. **Targeted support:** Assist disadvantaged youth and dependants through scholarships, rehabilitation, and appropriate welfare services.
5. **Coordinated delivery:** Government planning and NGO community outreach can complement each other if results are monitored and support reaches those most in need.

Long questions - 10 marks each

L019. Analyze rural-urban and seasonal migration in Pakistan, including causes, consequences, and responses.

PS-09-C2-02 | 10 marks | Use headings and developed explanation

1. Rural push factors

Low farm income, scarce employment, unreliable services, and environmental stress can encourage migration. When local land or jobs cannot support a household, moving becomes a livelihood response rather than simply a preference for urban life.

2. Urban pull factors

Cities offer larger labour markets and often better educational, medical, and transport services. Existing family networks can reduce the difficulty of moving. However, expectations may exceed reality when migrants lack the skills or resources needed for secure urban employment.

3. Seasonal movement

Highland transhumance follows changing pasture and weather, with movement towards lower ground in winter. Farm workers also move for harvests and other peak labour periods. These movements help use seasonal opportunities but can interrupt schooling, healthcare, and family stability.

4. Consequences

Migrants can supply labour, create demand, and send income to rural families. Rapid unmanaged movement nevertheless increases pressure on housing, water, sanitation, transport, and jobs. Some rural places lose workers while receiving areas must expand infrastructure faster than planned.

5. Balanced solutions

Improve rural schools, healthcare, water, roads, and non-farm employment while planning urban housing and public transport. Training, portable services for seasonal families, and investment in smaller towns can reduce hardship without assuming that all migration is undesirable or preventable.

L020. Discuss the problems of youth and dependent people and measures for sustainable human-resource development.

PS-09-C2-03 | 10 marks | Use headings and developed explanation

1. Educational and skill barriers

Unequal access to good schooling limits young people's future employment and participation. Poorly matched training can leave qualifications disconnected from available work. Schools, technical institutes, and employers should coordinate to develop useful literacy, technical, and problem-solving skills.

2. Employment and economic insecurity

Young people may face joblessness or insecure work, while children, older people, and persons unable to work depend on others. Apprenticeships, enterprise support, and suitable social assistance reduce hardship and help capable people develop greater economic independence.

3. Health and nutrition needs

Illness, malnutrition, disability barriers, and inadequate care weaken learning and earning capacity. Affordable healthcare, preventive services, safe water, rehabilitation, and appropriate support for older people protect well-being and improve the effectiveness of educational investment.

4. Government's responsibilities

Public authorities should expand services fairly, protect vulnerable groups, support job creation, and improve the connection between education and employment. Programmes need clear targeting and monitoring so that spending produces real access and results rather than only announced schemes.

5. NGOs and long-term development

NGOs can identify local needs, provide outreach, counselling, training, scholarships, and assistance, and complement public provision. Sustainable development requires cooperation, inclusion of girls and disadvantaged groups, and continued investment that builds capabilities instead of creating permanent dependence.

Grade 9 - Unit 8: Agriculture, Livestock and Fisheries

NBF Grade 9, PDF pp. 118-141

Included scope: PS-09-C3-01 to PS-09-C3-04

Short questions - 5 marks each

S069. Explain agriculture as a system of inputs, processes, and outputs.

PS-09-C3-01 | 5 marks | Five explained points

1. **Natural inputs:** Land, soil, water, sunlight, and suitable climate provide the physical basis of farming.
2. **Human inputs:** Labour, capital, machinery, seed, fertilizer, and knowledge influence the scale and efficiency of production.
3. **Crop processes:** Preparing soil, sowing, irrigating, weeding, harvesting, and threshing convert inputs into useful products.
4. **Animal processes:** Feeding, breeding, milking, and veterinary care produce and maintain livestock output.
5. **Outputs:** Grain, fruit, vegetables, milk, meat, eggs, fibre, and hides meet consumer needs or supply processing industries.

S070. Compare subsistence farming with commercial farming.

PS-09-C3-01 | 5 marks | Five explained points

1. **Purpose:** Subsistence farming mainly meets a household's own needs; commercial farming primarily produces for sale.
2. **Scale:** Subsistence holdings are often smaller, while commercial production commonly operates on a larger scale.
3. **Labour:** Subsistence farms rely heavily on family work; commercial farms may employ more hired and specialized labour.
4. **Inputs:** Commercial farms generally use more purchased inputs, investment, and machinery, although conditions vary.
5. **Marketing:** Subsistence farmers sell a surplus if available; commercial farmers depend more directly on prices, buyers, and transport.

S071. Distinguish Rabi and Kharif crops and give examples.

PS-09-C3-02 | 5 marks | Five explained points

1. **Rabi season:** Crops are generally sown during the cooler part of the year and harvested towards spring.
2. **Rabi examples:** Wheat, gram, and barley are important examples of winter-season crops.
3. **Kharif season:** Crops grow mainly during the warmer part of the year, often drawing on summer rain or irrigation.
4. **Kharif examples:** Rice, cotton, and maize are familiar examples, though local sowing schedules vary.
5. **Planning importance:** Matching crop and sowing time to temperature and water availability improves yield and reduces weather-related losses.

S072. Explain the distinction between food crops and cash crops.

PS-09-C3-02 | 5 marks | Five explained points

1. **Food crops:** These principally supply food, such as wheat, rice, maize, and pulses.
2. **Cash crops:** These are cultivated primarily for sale and income, such as cotton, sugarcane, and tobacco.
3. **Overlap:** A crop such as rice can provide food and also earn cash through domestic sales or exports.
4. **Industrial link:** Cash crops supply raw materials for textiles, sugar production, and other processing activities.
5. **Classification principle:** Purpose, market use, and economic importance should be considered rather than treating the categories as always exclusive.

S073. Describe the growing requirements and main producing areas of wheat.

PS-09-C3-02 | 5 marks | Five explained points

1. **Season:** Wheat is a major Rabi crop and Pakistan's principal staple cereal.
2. **Temperature:** It benefits from relatively cool growing conditions, followed by warmer, dry weather for ripening and harvest.
3. **Soil:** Fertile, well-drained loamy soil supports root development and productive growth.
4. **Water:** Moderate rainfall or reliable irrigation is needed, especially at important growth stages.
5. **Areas:** Punjab and Sindh are major producing provinces; wheat is also grown in suitable areas of Khyber Pakhtunkhwa and Balochistan.

S074. Describe the requirements, producing areas, and importance of rice.

PS-09-C3-02 | 5 marks | Five explained points

1. **Season and heat:** Rice is mainly a Kharif crop requiring warm growing conditions.
2. **Water:** A dependable and substantial water supply is important, usually through rainfall combined with irrigation.
3. **Land:** Level fields and soils capable of retaining adequate moisture help manage water and crop establishment.
4. **Areas:** Important regions include Punjab's Gujranwala, Sheikhupura, Hafizabad, and Sialkot areas and rice-growing districts of Sindh.
5. **Importance:** Rice supplies food, processing work, and export earnings; Basmati and coarse varieties serve different markets.

S075. Explain the economic importance and growing conditions of cotton and sugarcane.

PS-09-C3-02 | 5 marks | Five explained points

1. **Cotton conditions:** Cotton requires a warm growing season, suitable soil, irrigation where needed, and dry conditions around picking.
2. **Cotton areas:** Important cotton belts occur in southern Punjab and Sindh.
3. **Cotton uses:** Fibre supplies textiles and exports, while cottonseed contributes oil and other products.
4. **Sugarcane conditions:** A long warm season, fertile soil, and ample moisture or irrigation support production in Punjab, Sindh, and parts of Khyber Pakhtunkhwa.

5. **Sugarcane uses:** It supplies sugar mills, farm employment, and by-products used in related economic activities.

S076. Explain five contributions of agriculture to Pakistan's economy.

PS-09-C3-03 | 5 marks | Five explained points

1. **Food supply:** Farming provides cereals, vegetables, fruit, milk, meat, and other essential foods.
2. **Employment:** Cultivation, livestock care, harvesting, and associated activities provide rural livelihoods.
3. **Industrial materials:** Cotton, sugarcane, hides, and other products supply processing and manufacturing.
4. **Export earnings:** Agricultural and processed products help earn foreign exchange for purchases from abroad.
5. **Economic linkages:** Farm spending supports transport, storage, machinery, shops, and other services beyond the farm itself.

S077. Suggest five sustainable agricultural practices.

PS-09-C3-03 | 5 marks | Five explained points

1. **Crop rotation:** Alternating crops helps maintain soil fertility and reduces repeated pest and disease problems.
2. **Soil protection:** Cover crops and suitable land management reduce erosion and moisture loss.
3. **Organic matter:** Compost and properly managed manure improve soil structure and nutrient supply.
4. **Integrated pest management:** Monitoring and biological controls reduce dependence on indiscriminate chemical application.
5. **Efficient water use:** Field levelling, appropriate irrigation, and crop choices matched to local conditions conserve water and protect output.

S078. Identify five agricultural challenges and match each with a solution.

PS-09-C3-04 | 5 marks | Five explained points

1. **Water shortage:** Improve irrigation efficiency, maintenance, scheduling, and storage suited to local conditions.
2. **Poor access to inputs:** Expand affordable credit, quality seeds, advice, and machinery-sharing opportunities for smaller farmers.
3. **Pests and soil damage:** Use suitable crop rotations, integrated pest management, drainage, and soil testing.
4. **Post-harvest losses:** Improve roads, storage, cold chains, processing, and access to reliable markets.
5. **Loss of farmland:** Guide housing towards suitable land and enforce planning that protects productive agricultural areas.

S079. Compare nomadic, settled, and transhumant livestock farming.

PS-09-C3-01 | 5 marks | Five explained points

1. **Nomadic system:** Herders move between places to find pasture and water, especially in dry environments.
2. **Settled system:** Animals are maintained around permanent farms, with more dependable access to fodder and water.

3. **Transhumance:** Herds move seasonally between higher summer pastures and lower winter areas.
4. **Economic outputs:** These systems provide meat, milk, wool, hides, manure, and income in different proportions.
5. **Environmental fit:** The suitable system depends on seasonal pasture, terrain, water, market access, and the resources available to households.

S080. Explain five ways in which livestock contributes to the economy.

PS-09-C3-03 | 5 marks | Five explained points

1. **Food and nutrition:** Milk, meat, and eggs provide protein and other important dietary nutrients.
2. **Household income:** Selling animals and animal products gives families earnings beyond crop harvests.
3. **Industrial inputs:** Hides, wool, milk, and meat support leather, textile, dairy, and food-processing industries.
4. **Farm support:** Manure improves soil fertility, and some animals provide transport or draught power.
5. **Rural employment:** Breeding, feeding, veterinary services, collection, processing, and marketing create linked employment opportunities.

S081. Describe inland fisheries, marine fisheries, and aquaculture in five points.

PS-09-C3-01 | 5 marks | Five explained points

1. **Inland fisheries:** Fish are harvested from freshwater rivers, lakes, reservoirs, and other suitable inland waters.
2. **Marine fisheries:** Fishing takes place in sea waters along the Sindh and Makran coasts.
3. **Aquaculture:** Fish are bred and raised under managed conditions in ponds or other controlled water systems.
4. **Examples:** Tarbela and Mangla reservoirs support inland fishing, while Karachi and Gwadar are important coastal centres.
5. **Economic role:** All three supply food, employment, processing work, and opportunities for domestic sales and export earnings.

S082. Suggest five measures for sustainable development of fisheries.

PS-09-C3-03 / PS-09-C3-04 | 5 marks | Five explained points

1. **Control catches:** Set and enforce suitable limits so fishing does not remove stocks faster than they reproduce.
2. **Protect breeding:** Observe closed seasons and avoid catching immature fish to allow populations to recover.
3. **Safer equipment:** Restrict destructive methods and gear that damage habitats or kill fish indiscriminately.
4. **Clean water:** Treat waste and protect aquatic environments, including coastal nursery habitats.
5. **Better handling:** Improve boats, landing facilities, ice, cold storage, training, and processing to reduce waste and raise value.

S083. Describe the importance and producing areas of maize, tobacco, and minor crops.

PS-09-C3-02 | 5 marks | Five explained points

1. **Maize uses:** Maize provides human food, feed, and industrial raw material, linking cereal production with livestock and processing.
2. **Maize areas:** Punjab and Khyber Pakhtunkhwa contain important maize-producing regions.
3. **Tobacco:** It is a commercial crop particularly associated with districts such as Swabi, Mardan, Nowshera, and Charsadda.
4. **Minor crops:** Gram, barley, pulses, oilseeds, and vegetables add food diversity, income, and raw materials.
5. **Economic value:** Diverse crops reduce dependence on one product and allow farmers to respond to local conditions and demand.

S084. Explain five aspects of the importance and development of fruit farming.

PS-09-C3-02 / PS-09-C3-03 | 5 marks | Five explained points

1. **Regional suitability:** Different climates support citrus, mangoes, dates, apples, grapes, and other fruit crops.
2. **Examples:** Sargodha is associated with citrus, southern Punjab and Sindh with mangoes, and highland regions with suitable temperate fruits.
3. **Employment:** Orchards create work in planting, maintenance, harvesting, packing, processing, and transport.
4. **Market earnings:** Good-quality fruit supplies domestic demand and can earn foreign exchange through exports.
5. **Improvement:** Suitable varieties, advice, pest management, careful handling, and cold storage reduce losses and increase farmers' returns.

Long questions - 10 marks each

L021. Explain agriculture as a system and compare the principal farming categories in Pakistan.

PS-09-C3-01 | 10 marks | Use headings and developed explanation

1. Natural and human inputs

Agriculture combines land, soil, water, and climate with labour, capital, seed, machinery, and knowledge. The quality and availability of these inputs influence the crops or animals that can be produced and the efficiency with which a farm operates.

2. Production processes

Crop farming includes land preparation, sowing, irrigation, weeding, pest management, and harvesting. Livestock farming involves feeding, breeding, health care, and milking. Good management coordinates these activities so that inputs produce useful output without unnecessary waste.

3. Outputs and connections

Outputs include food, fibre, milk, meat, eggs, hides, and other materials. Some are consumed directly, while others enter textile, leather, sugar, dairy, or other processing industries. Farming is therefore linked with transport, storage, trade, and employment beyond the farm.

4. Subsistence and commercial production

Subsistence farming concentrates on household requirements and often uses family labour on smaller holdings. Commercial farming produces mainly for the market and usually depends more on purchased inputs, investment, and marketing. Real farms can combine features of both categories.

5. Livestock and fisheries

Animal production may be settled, nomadic, or transhumant depending on resources and seasons. Fisheries include marine and inland capture and managed aquaculture. These activities diversify income and nutrition, showing that agriculture is broader than the cultivation of field crops alone.

L022. Discuss Pakistan's major food and cash crops, their requirements, areas, and economic significance.

PS-09-C3-02 | 10 marks | Use headings and developed explanation

1. Wheat

Wheat is the main staple cereal and a major Rabi crop. Cool growing conditions, fertile soil, and adequate moisture support its production. Punjab and Sindh are major producers, with suitable areas in the other provinces also contributing to food supply and flour-milling activity.

2. Rice

Rice is mainly a warm-season Kharif crop requiring a dependable water supply and suitable level fields. Punjab and Sindh contain important producing areas. Basmati and coarse varieties serve food markets, while exports and processing provide employment and foreign exchange.

3. Cotton

Cotton is a major cash crop associated particularly with Punjab and Sindh. Warm conditions, suitable water management, and dry picking weather are important. Fibre supports the textile industry, while seed and by-products add value beyond the harvested lint.

4. Sugarcane

Sugarcane requires a long warm season and substantial moisture, with major cultivation in Punjab, Sindh, and parts of Khyber Pakhtunkhwa. It supplies sugar mills and supports farm labour, transport, and by-product industries, but its water needs require careful management.

5. Other crops and classification

Maize provides food and animal feed, while gram, barley, oilseeds, tobacco, vegetables, and fruit add diversity. Food and cash categories can overlap: rice and wheat can both feed people and generate income. Crop choice should match local conditions, demand, and available resources.

L023. Evaluate agriculture's economic role and propose sustainable ways to improve output.

PS-09-C3-03 / PS-09-C3-04 | 10 marks | Use headings and developed explanation

1. Food, jobs, and industrial inputs

Agriculture supplies essential food and provides livelihoods through crops, livestock, and fisheries. Cotton, sugarcane, hides, and other materials support processing industries. These connections mean that farm improvements can also benefit transport, storage, manufacturing, and local markets.

2. Water and soil management

Water shortage, salinity, waterlogging, and erosion limit production. Efficient irrigation, suitable drainage, land levelling, and soil-conserving practices protect productive resources. Raising output should depend on improved management, rather than simply applying more water or exhausting the soil.

3. Knowledge and affordable inputs

Farmers need reliable seed, relevant advice, credit, veterinary support, and appropriate machinery. Training and shared services can make improvements accessible to smaller producers, while research and extension help farmers respond to pests, changing weather, and local production problems.

4. Sustainable production practices

Crop rotation, composting, cover crops, and biological pest controls can maintain fertility and reduce harmful effects. Organic approaches need sound nutrient and pest management rather than the simple removal of chemicals. Suitable practices should be selected according to local conditions and evidence.

5. Farmland, markets, and value

Protect productive agricultural land from unplanned housing expansion. Better roads, cold storage, processing, and fair market information reduce losses and improve returns. Combining resource protection with market access makes higher production more useful to both farmers and consumers.

L024. Explain the importance, problems, and sustainable development of Pakistan's fisheries.

PS-09-C3-01 / PS-09-C3-03 / PS-09-C3-04 | 10 marks | Use headings and developed explanation

1. Types and locations

Marine fishing takes place along the Sindh and Makran coasts, while inland fishing uses rivers, lakes, and reservoirs. Aquaculture raises fish under controlled conditions. The different systems rely on suitable water, habitats, skills, and links to markets.

2. Economic and nutritional value

Fisheries provide protein, household income, exportable products, and jobs in catching, handling, processing, and transport. Their importance extends beyond fishing crews to boat repair, equipment, ice production, storage, and commercial services.

3. Main constraints

Overfishing can deplete stocks, while pollution and habitat loss reduce survival and reproduction. Poor equipment, weak landing facilities, and inadequate cold chains cause waste and lower product quality. Environmental change can further disturb aquatic conditions and fishermen's livelihoods.

4. Conserving the resource

Enforce appropriate catch limits, protect breeding seasons, restrict destructive methods, and reduce capture of immature fish. Control industrial, domestic, and agricultural pollution, and preserve important nursery habitats so that future catches remain possible.

5. Improving value and management

Training, safer equipment, ice, refrigeration, processing, and dependable marketing can raise earnings without increasing pressure on stocks. Well-managed aquaculture can supplement supply, but clean water, suitable stocking, and disease control are necessary to avoid creating new environmental problems.

Grade 9 - Unit 9: Transport and Trade

NBF Grade 9, PDF pp. 142-157; dry-port section excluded

Included scope: PS-09-C4-01 and PS-09-C4-03 to PS-09-C4-06

Short questions - 5 marks each

S085. Explain why transport networks are unevenly distributed within Pakistan.

PS-09-C4-01 | 5 marks | Five explained points

1. **Relief:** Flat plains permit cheaper construction, whereas steep mountains require expensive engineering.
2. **Population:** Densely populated places generate greater demand for passenger and freight services.
3. **Economic activity:** Industrial, agricultural, and commercial centres need strong links with suppliers and markets.
4. **Resources and investment:** Available finance, maintenance, energy, and existing infrastructure influence network growth.
5. **Climate and hazards:** Snow, landslides, flooding, and harsh conditions can restrict access and raise operating costs in difficult regions.

S086. Compare road and rail transport in five points.

PS-09-C4-03 | 5 marks | Five explained points

1. **Access:** Roads can provide door-to-door service, while rail depends on tracks, stations, and onward connections.
2. **Load:** Rail is well suited to heavy bulk freight; roads suit smaller or flexible consignments.
3. **Cost:** Rail can be economical over long distances with large loads, while road costs depend strongly on fuel and distance.
4. **Reliability:** Roads face congestion and accidents; rail depends on track condition, scheduling, and dependable operations.
5. **Environment:** Well-used rail services generally move large loads with lower emissions per unit than many road vehicles.

S087. Compare air and sea transport in five points.

PS-09-C4-03 | 5 marks | Five explained points

1. **Speed:** Air is much faster, making it useful for urgent travel and time-sensitive goods.
2. **Cost:** Air freight is expensive, while sea transport is generally cheaper for large international consignments.
3. **Capacity:** Ships carry heavy and bulky loads that would be uneconomic to move by aircraft.
4. **Access:** Air requires airports, while sea transport depends on ports and onward inland links.
5. **Limitations:** Air travel has high emissions per passenger or cargo unit; shipping is slower and can also create pollution and habitat pressures.

S088. Explain five benefits of trade for Pakistan's economy.

PS-09-C4-04 | 5 marks | Five explained points

1. **Foreign exchange:** Exports earn currency used to pay for imports and other overseas obligations.

2. **Employment:** Production for trade creates jobs in farming, manufacturing, transport, finance, and marketing.
3. **Larger markets:** Overseas buyers allow firms to sell beyond the limits of domestic demand.
4. **Technology and inputs:** Imports provide machinery, knowledge, and materials that can raise productive capacity.
5. **Competition and choice:** Exposure to international markets can encourage quality improvements and give consumers more options.

S089. Explain the commercial importance of CPEC, Gwadar, and Karachi Port.

PS-09-C4-05 | 5 marks | Five explained points

1. **CPEC connection:** The corridor links transport, energy, and related development with the aim of improving commercial connectivity.
2. **Gwadar location:** Access to the Arabian Sea offers potential links between inland routes and important regional shipping markets.
3. **Karachi Port:** Established handling facilities connect Pakistan's existing production and trading networks with overseas buyers and suppliers.
4. **Transit opportunities:** Efficient links may help Afghanistan and Central Asian markets reach seaborne trade.
5. **Conditions for success:** Actual benefits depend on functioning infrastructure, demand, costs, security, and reliable commercial administration.

S090. Explain five factors that influence Pakistan's international trade.

PS-09-C4-05 | 5 marks | Five explained points

1. **Market demand:** Buyers' needs, tastes, and purchasing power determine which products can be sold abroad.
2. **Price and quality:** Competitive costs and dependable standards affect whether Pakistani goods attract repeat orders.
3. **Transport costs:** Reliable ports and inland links reduce delays, damage, and delivery expenses.
4. **Tariffs and agreements:** Import duties and trading arrangements influence access and the final price in foreign markets.
5. **Stability and security:** Consistent policy and safe movement increase confidence among buyers, producers, and investors.

S091. Identify five internal trade challenges and give a solution for each.

PS-09-C4-06 | 5 marks | Five explained points

1. **Weak infrastructure:** Improve electricity, roads, port links, logistics, and maintenance to reduce cost and delay.
2. **Administrative delay:** Simplify procedures and use transparent digital customs and documentation systems.
3. **Limited skills:** Expand technical training and business knowledge related to product quality and export requirements.
4. **Financial constraints:** Improve suitable finance and advisory support for smaller exporters and new enterprises.
5. **Narrow competitiveness:** Encourage innovation, dependable standards, market research, and product diversification to reduce dependence on a few exports.

Long questions - 10 marks each

L025. Compare Pakistan's main modes of transport and explain their regional distribution.

PS-09-C4-01 / PS-09-C4-03 | 10 marks | Use headings and developed explanation

1. Road transport

Roads offer flexible routes and door-to-door delivery, making them useful for passengers and smaller consignments. Congestion, fuel costs, accidents, and emissions are disadvantages. Routes concentrate where population and economic activity justify investment and where relief permits affordable construction.

2. Rail transport

Railways can carry large passenger numbers and heavy freight efficiently over long distances. Their disadvantages include fixed routes and dependence on maintained track, stations, scheduling, and connections. Flatter, economically active regions are generally easier to serve than rugged uplands.

3. Air transport

Air travel provides rapid movement over long distances and difficult terrain and suits urgent, valuable, or perishable cargo. High costs limit its use for bulk goods. Airports require substantial investment and generally serve places with sufficient passenger or commercial demand.

4. Sea transport

Ships carry large international consignments relatively cheaply, linking Pakistan with overseas markets through ports. Sea movement is slow and depends on cargo handling and inland connections. Port pollution and marine impacts require control, even where emissions per unit of bulk cargo are comparatively low.

5. Regional pattern and selection

Relief, settlement, economic activity, investment, and hazards explain uneven networks. Plains support wider road and rail coverage; mountains face costly construction and closures. Selecting a mode requires comparing speed, access, cost, reliability, and environmental effects for the particular journey or consignment.

L026. Assess trade's role in Pakistan's economy and the significance of its major commercial routes.

PS-09-C4-04 / PS-09-C4-05 | 10 marks | Use headings and developed explanation

1. Trade and economic activity

Buying and selling connect Pakistani producers with domestic and overseas demand. Export activity supports employment and foreign-exchange earnings, while imports supply machinery, energy, and materials needed by local production and consumers.

2. Competition and productivity

Access to wider markets can encourage firms to improve standards, delivery, and efficiency. Imported technology and knowledge may raise productivity. Benefits are strongest when businesses build their capabilities rather than remain dependent on a narrow range of low-value products.

3. Karachi Port and established links

Karachi Port connects existing commercial and industrial networks to international shipping. Efficient handling and dependable road and rail links reduce delays and improve access for producers and consumers throughout the country.

4. Gwadar and CPEC potential

Gwadar offers an additional Arabian Sea gateway, while CPEC-related infrastructure aims to improve connectivity with China and inland regions. Transit links may also benefit regional markets, provided facilities, demand, and commercial arrangements support viable use.

5. Conditions and balanced assessment

Location and infrastructure create potential rather than guaranteed profits. Tariffs, agreements, transport charges, security, stable policy, market demand, and environmental protection influence outcomes. Effective administration and competitive production are essential to turn routes into sustained trade and employment.

L027. Analyze internal obstacles to export growth and propose sustainable solutions.

PS-09-C4-06 | 10 marks | Use headings and developed explanation

1. Infrastructure and energy

Unreliable electricity, weak roads, and inefficient logistics raise production and delivery costs. Investment in maintained, dependable infrastructure helps firms meet deadlines and reduces losses. Planning should connect factories and farming areas to actual markets and transport needs.

2. Administration and institutions

Complex documentation, slow customs, and inconsistent procedures make trade expensive and uncertain. Transparent rules, appropriate digital systems, trained staff, and simplified processes can reduce delays and opportunities for corruption while preserving necessary checks.

3. Skills, technology, and quality

A shortage of trained workers and limited innovation reduce competitiveness. Technical education, testing, improved machinery, and research help firms satisfy buyers' specifications. Exporters need dependable quality rather than relying only on low prices.

4. Finance and enterprise support

Smaller firms often struggle to obtain capital, insurance, and information about buyers. Suitable finance, business advice, and support with standards and marketing can help capable enterprises enter and remain in export markets.

5. Stability, diversification, and sustainability

Predictable policy and safe business conditions encourage long-term investment. Broader products and markets reduce dependence on a few sources of demand, while efficient resource use and responsible production help firms remain competitive without damaging the resources on which future trade depends.

Grade 10 - Unit 1: Society and Culture of Pakistan

NBF Grade 10, PDF/printed pp. 6-21; supplied SLO document pp. 1-2

Included scope: PS-10-D1-01 to PS-10-D1-07

Short questions - 5 marks each

S092. Explain five elements of culture with examples from Pakistan.

PS-10-D1-01 | 5 marks | Five explained points

1. **Language:** Urdu and regional languages transmit knowledge, stories, values, and a sense of identity.
2. **Beliefs:** Religious and ethical traditions influence customs, relationships, celebrations, and daily behaviour.
3. **Arts:** Music, poetry, visual art, and dances such as Bhangra or Attan express regional heritage.
4. **Customs and festivals:** Marriage practices, Eid, regional melas, and other celebrations connect communities and generations.
5. **Material and food traditions:** Clothing, crafts, architecture, and regional dishes reflect local history, environment, and social life.

S093. How can cultural diversity promote national unity?

PS-10-D1-01 / PS-10-D1-04 | 5 marks | Five explained points

1. **Recognition:** Respecting different customs helps communities feel included within a shared national identity.
2. **Cultural exchange:** Festivals and interregional visits reduce unfamiliarity and build personal connections.
3. **Shared participation:** Joint cultural events give people opportunities to cooperate without abandoning their own traditions.
4. **Education:** Learning about other regions challenges prejudice and encourages appreciation of different contributions.
5. **Inclusive belonging:** Unity becomes stronger when citizenship and national identity allow cultural difference rather than demanding uniformity.

S094. Explain five ways languages and dialects affect national integration.

PS-10-D1-02 | 5 marks | Five explained points

1. **Heritage:** Regional languages preserve traditions, literature, and community identity.
2. **Communication:** A shared language helps people from different regions exchange information and cooperate.
3. **Possible barriers:** When people cannot understand each other, misunderstanding and social separation can increase.
4. **Respect and inclusion:** Recognition of linguistic identities reduces feelings of neglect or cultural exclusion.
5. **Balanced policy:** Promoting Urdu alongside regional languages and multilingual learning supports both national communication and cultural diversity.

S095. Explain Urdu's role as a lingua franca without neglecting regional languages.

PS-10-D1-02 | 5 marks | Five explained points

1. **Common medium:** Urdu enables communication between people whose first languages differ.
2. **Public information:** National media and public discussion use it to reach audiences across regional boundaries.
3. **Shared literature:** Urdu poetry, drama, and other writing contribute to a common cultural space.
4. **Regional value:** Punjabi, Sindhi, Pashto, Balochi, and other languages preserve distinct knowledge and identities.
5. **Inclusive approach:** National integration is stronger when a common language connects people while regional languages receive respect and opportunities to develop.

S096. Explain the origin and development of Pakistani folklore.

PS-10-D1-03 | 5 marks | Five explained points

1. **Oral beginnings:** Stories, songs, customs, and proverbs developed through community life and were passed down orally.
2. **Historical influences:** Successive civilizations and cultural contacts added characters, themes, and storytelling forms.
3. **Regional identity:** Different communities developed tales reflecting their environment, heroes, relationships, and moral values.
4. **Continuity and adaptation:** Each generation retold inherited material, preserving traditions while adapting details to changing circumstances.
5. **Modern preservation:** Literature, performance, broadcasting, and cultural events help record and share folklore beyond its original communities.

S097. Give five examples showing the regional diversity of Pakistan's folklore.

PS-10-D1-03 | 5 marks | Five explained points

1. **Punjab:** Heer Ranjha and Sohni Mahiwal are well-known romantic tales associated with Punjabi tradition.
2. **Sindh:** Umar Marvi and Momal Rano express themes found in Sindhi literary and oral heritage.
3. **Khyber Pakhtunkhwa:** Adam Khan and Durkhanai is a familiar example from Pashto folklore.
4. **Balochistan:** Hani and Sheh Mureed is a celebrated Balochi tale linking love, loyalty, and honour.
5. **Northern traditions:** The legend of Shiri Badat in Gilgit-Baltistan illustrates the diversity of stories beyond the four provincial traditions.

S098. Explain five stages or influences in the development of drama in Pakistan.

PS-10-D1-03 | 5 marks | Five explained points

1. **Local performance:** Folk theatre, storytelling, and street performances formed an early popular foundation.
2. **Cultural interaction:** Persian, Arabic, and other regional narrative traditions influenced themes and styles.
3. **Colonial theatre:** Western dramatic techniques introduced further approaches to plot, dialogue, and performance.
4. **Broadcast growth:** Radio and the establishment of PTV in 1964 expanded audiences and opportunities for playwrights.

5. **Modern development:** Television, theatre, and digital platforms address family relationships, identity, and social problems through changing forms of storytelling.

S099. Explain five positive and negative effects of globalization on Pakistani culture.

PS-10-D1-04 | 5 marks | Five explained points

1. **Cultural exchange:** Access to different arts, foods, and ideas can broaden understanding and creativity.
2. **Knowledge and opportunity:** Global communication supports learning, collaboration, and exposure to new possibilities.
3. **Cultural pressure:** Dominant global styles can overshadow regional languages, crafts, and traditions.
4. **Unequal access:** People without technology or skills may benefit less, increasing existing social differences.
5. **Balanced response:** Cultural education, local creative work, and responsible use of global media can preserve identity while accepting useful change.

S100. Explain the changing position of women in Pakistani society.

PS-10-D1-05 | 5 marks | Five explained points

1. **Traditional expectations:** Women have often been associated mainly with domestic and caregiving roles.
2. **Educational progress:** Greater access to schooling has expanded knowledge, confidence, and employment possibilities.
3. **Public participation:** Women contribute through healthcare, education, business, politics, media, and other fields.
4. **Continuing barriers:** Discrimination, insecurity, restricted mobility, and unequal access to resources still limit opportunities.
5. **Further improvement:** Safe education and work, healthcare, fair treatment, and effective support can enable fuller participation in national development.

S101. Explain five effects of feudalism on Pakistani society.

PS-10-D1-05 | 5 marks | Five explained points

1. **Concentrated land:** Large holdings place an important productive resource under the control of a limited group.
2. **Economic dependence:** Landless or small tenants may depend on powerful owners for livelihoods and access to resources.
3. **Political influence:** Economic power can translate into influence over local decisions and public participation.
4. **Restricted mobility:** Unequal opportunities can keep poorer households in disadvantage across generations.
5. **Reform needs:** Fair access to education, productive resources, secure livelihoods, and accountable institutions can reduce dependence and inequality.

S102. Explain the positive and negative effects of tribalism.

PS-10-D1-05 | 5 marks | Five explained points

1. **Social identity:** Kinship and shared heritage can provide a strong sense of belonging.

2. **Mutual support:** Community networks may offer assistance during hardship and maintain inherited traditions.
3. **Local order:** Traditional arrangements can organize cooperation and settle some community disputes.
4. **Possible divisions:** Exclusive loyalties or intertribal conflict can weaken wider cooperation and national integration.
5. **Development challenges:** Inclusive education, healthcare, infrastructure, and fair public services are needed while respecting valuable cultural traditions.

S103. Explain social stratification and its effects on inequality.

PS-10-D1-06 | 5 marks | Five explained points

1. **Meaning:** Social stratification is the ranking of people and groups in layers according to resources, power, and status.
2. **Unequal opportunity:** Higher groups often have better access to education, healthcare, and influential networks.
3. **Economic difference:** Unequal income and wealth affect housing, security, and future prospects.
4. **Social mobility:** Education and opportunity can help people move between social levels, while barriers can keep disadvantage persistent.
5. **Collective effects:** Deep inequality can create resentment and weaken cooperation, making fair access and inclusive development important.

S104. Suggest five ways to reduce the harmful effects of social stratification.

PS-10-D1-06 | 5 marks | Five explained points

1. **Accessible education:** Good schooling and relevant skills give disadvantaged people stronger opportunities for advancement.
2. **Affordable healthcare:** Treatment and preventive services reduce inequalities caused by illness and medical costs.
3. **Productive work:** Fair access to employment and enterprise support improves incomes and independence.
4. **Inclusive services:** Housing, water, transport, and support should reach neglected communities as well as privileged groups.
5. **Fair institutions:** Transparent decisions and equal treatment reduce discrimination and prevent advantages from being reserved for powerful groups.

S105. State five common principles of Pakistan's Sufi mystical traditions.

PS-10-D1-07 | 5 marks | Five explained points

1. **Divine love:** Devotion to Allah gives spiritual practice its central purpose.
2. **Purification:** Tazkiyah encourages control of harmful desires and development of sincerity and humility.
3. **Remembrance:** Prayer, reflection, and Dhikr help followers strengthen spiritual awareness.
4. **Compassion:** Kindness, tolerance, generosity, and service to humanity connect belief with social behaviour.
5. **Guidance:** The relationship between Murshid and Mureed provides instruction and disciplined spiritual learning.

S106. Distinguish Pakistan's major Sufi orders in five points.

PS-10-D1-07 | 5 marks | Five explained points

1. **Qadiri:** Associated with Sheikh Abdul Qadir Gilani, this order emphasizes devotion, spiritual purification, and Islamic practice.
2. **Chishti:** Associated in South Asia with Khwaja Moinuddin Chishti, it is known for love, tolerance, and service.
3. **Naqshbandi:** Associated with Baha-ud-Din Naqshband, it particularly emphasizes silent Dhikr and disciplined inner reflection.
4. **Suhrawardi:** It combines spiritual training with learning and social engagement and is associated locally with Baha-ud-Din Zakariya of Multan.
5. **Shared purpose:** Although practices differ, these traditions connect spiritual development with ethical conduct and concern for others.

S107. Explain how Sufi traditions encourage unity in Pakistani society.

PS-10-D1-07 | 5 marks | Five explained points

1. **Accessible teachings:** Poetry in local languages makes spiritual and ethical ideas understandable across communities.
2. **Shared gatherings:** Urs and shrine-related activities bring people from different backgrounds into common spaces.
3. **Human dignity:** Teachings of compassion and humility discourage contempt based on wealth or social standing.
4. **Cultural expression:** Poetry and devotional music contribute to a shared heritage while retaining regional forms.
5. **Practical care:** Charity and service create relationships that can strengthen social trust and cooperation.

Long questions - 10 marks each

L028. Analyze how cultural elements and regional traditions can strengthen national integration.

PS-10-D1-01 / PS-10-D1-02 / PS-10-D1-04 | 10 marks | Use headings and developed explanation

1. Meaning and variety of culture

Culture includes language, beliefs, customs, arts, food, dress, and other shared practices. Pakistan's different communities contribute distinctive traditions. Diversity can enrich national life when people see these differences as contributions to a common heritage rather than grounds for exclusion.

2. Languages and communication

Regional languages preserve literature, memory, and identity, while Urdu offers a common medium between linguistic groups. An inclusive approach develops both functions. Promoting communication without dismissing local languages reduces cultural insecurity and supports wider participation.

3. Festivals, arts, and literature

Regional festivals, crafts, music, poetry, and food provide opportunities for exchange. Literary figures and artistic traditions introduce people to the experience of other communities. Joint participation makes cultural difference familiar and allows people to appreciate contributions beyond their own region.

4. Interregional contact

Student visits, cultural programmes, and collaborative projects can create direct relationships across provinces. These activities work best when participation is respectful and balanced, allowing communities to present their own traditions instead of being represented through stereotypes.

5. Unity with diversity

National integration means a shared sense of belonging and cooperation, not the disappearance of regional identity. Education, media, and public institutions should encourage mutual respect and fair recognition, so that cultural pride supports national attachment instead of becoming a source of hostility.

L029. Trace the origin and development of folklore and drama in Pakistan.

PS-10-D1-03 | 10 marks | Use headings and developed explanation

1. Folklore's oral foundations

Folklore developed through stories, songs, proverbs, legends, and customs passed between generations. It preserved community memories, moral lessons, ideas about bravery and love, and explanations of local experience before widespread written recording or modern broadcasting.

2. Regional and historical enrichment

Successive cultural contacts added themes and forms, while communities adapted inherited stories to local settings. Heer Ranjha, Umar Marvi, Adam Khan and Durkhanai, and Hani and Sheh Mureed illustrate different regional traditions within a wider literary heritage.

3. Early dramatic traditions

Storytelling, folk theatre, and street performance helped create traditions of public entertainment. Local practices interacted with Persian, Arabic, and other literary influences; later contact with Western theatre added further techniques of plot, dialogue, and staging.

4. Broadcast and modern growth

Radio and PTV, established in 1964, widened audiences and created opportunities for writers and performers. Playwrights including Ashfaq Ahmed, Bano Qudsia, A. Hameed, and Anwar Maqsood contributed to dramatic work addressing society, relationships, and cultural experience.

5. Cultural significance

Folklore and drama both preserve identity while interpreting change. Folklore keeps regional memories alive, and drama can examine contemporary tensions and assumptions. Recording, teaching, and responsible adaptation help these traditions remain meaningful to younger audiences without reducing them to commercial stereotypes.

L030. Evaluate the positive and negative effects of globalization on Pakistani society and culture.

PS-10-D1-04 | 10 marks | Use headings and developed explanation

1. Meaning and increased contact

Globalization expands connections through trade, migration, communication, and media. Pakistani society encounters more foreign ideas, styles, products, and information, changing opportunities and expectations in everyday life as well as in cultural expression.

2. Learning and creativity

Wider access to knowledge can improve education, professional skills, and collaboration. Interaction between creative traditions can generate new music, writing, food, and other expression, while overseas audiences provide opportunities for Pakistani cultural work to gain recognition.

3. Economic and social opportunities

Global links can open markets and employment possibilities and introduce debates about education and participation. Their benefits, however, are not automatic or equal; people need skills, resources, and suitable institutions to make constructive use of new connections.

4. Cultural and social risks

Dominant media and consumer styles can overshadow local languages and customs. Unequal access to technology may widen existing differences, while misinformation and unrealistic expectations can create tension. Local producers can also face competition they are poorly equipped to meet.

5. Balanced response

Support regional languages, cultural teaching, local artists, and critical evaluation of media while using global knowledge and opportunities. The aim should be confident exchange: preserve valuable heritage, adapt useful ideas, and widen access so that globalization's gains do not remain limited to privileged groups.

L031. Analyze how women's status, feudalism, tribalism, and social stratification affect Pakistani society.

PS-10-D1-05 / PS-10-D1-06 | 10 marks | Use headings and developed explanation

1. Women's participation

Restrictions on education, mobility, safety, and resources reduce women's opportunities and weaken society's use of talent. Improvements in schooling and professional participation create wider benefits, but progress needs to reach disadvantaged and rural women as well as those with existing advantages.

2. Feudal power

Concentrated landownership can create dependence between landless households and powerful landowners. Economic power may influence social and political choices, reducing opportunities for poorer people to improve their position. Fair access to resources, education, and secure livelihoods helps reduce such dependence.

3. Tribal structures

Kinship and shared heritage offer belonging, mutual support, and valued customs. Exclusive loyalties, intergroup conflict, or unequal access to services can nevertheless limit wider integration. Development should combine respectful engagement with accessible education, health, infrastructure, and fair treatment.

4. Social stratification

Societies rank groups through income, wealth, education, and power. Higher groups often obtain better opportunities and can pass advantages to the next generation, while lower groups face barriers to mobility. Persistent inequality can create frustration and weaken social trust.

5. Inclusive development

A stronger society expands quality education, healthcare, productive employment, and transparent access to services. Supporting women's participation and disadvantaged communities while reducing discrimination enables social mobility, improves cooperation, and connects development with the welfare of a broader population.

L032. Explain the major Sufi orders, their shared teachings, and their contribution to unity in Pakistan.

PS-10-D1-07 | 10 marks | Use headings and developed explanation

1. Qadiri and Chishti traditions

The Qadiri tradition emphasizes devotion, purification, humility, and Islamic practice. The Chishti tradition, strongly associated in South Asia with Khwaja Moinuddin Chishti, stresses love, tolerance, simplicity, and service to humanity. Their distinctive practices share an ethical and spiritual purpose.

2. Naqshbandi and Suhrawardi traditions

The Naqshbandi order is known especially for silent Dhikr and disciplined reflection. Suhrawardi teaching connects spiritual development with scholarship and social engagement; Baha-ud-Din Zakariya of Multan is an important Pakistani association. Both link inward cultivation to responsible conduct.

3. Common spiritual principles

Love of Allah, remembrance, self-purification, and guidance under a spiritual teacher are important shared ideas. Compassion and generosity encourage followers to connect spiritual aspiration with their treatment of others rather than viewing devotion as detached from ordinary social life.

4. Regional cultural influence

Poets such as Bulleh Shah, Shah Abdul Latif Bhittai, and Khwaja Ghulam Farid expressed teachings in accessible regional languages. Poetry, devotional music, and Urs gatherings became important cultural forms through which different communities encountered common ethical themes.

5. Social cohesion

Messages of humility, tolerance, charity, and human dignity can bring people across ethnic and social divisions. Shared gatherings and acts of care encourage cooperation, while respect for regional expression allows a common spiritual inheritance to coexist with Pakistan's cultural variety.

L033. Analyze social stratification, its causes and consequences, and ways to reduce inequality.

PS-10-D1-06 | 10 marks | Use headings and developed explanation

1. Meaning and bases

Social stratification is the division of society into ranked layers with different access to resources and influence. Income, wealth, education, occupation, and power help shape social position, affecting everyday choices and opportunities available to individuals and families.

2. Persistence of advantage

Families with better resources can provide stronger education, healthcare, networks, and security to their children. Disadvantaged groups face barriers that make advancement harder. Unequal opportunities can therefore reproduce existing differences even where individuals work hard to improve their circumstances.

3. Consequences for individuals

Social position affects housing, health, learning, employment, and the ability to cope with financial shocks. Restricted access to these essentials can lower confidence and prevent people from making full use of their abilities, reducing both independence and well-being.

4. Effects on society

Large gaps can weaken trust, encourage exclusion, and allow powerful groups to shape decisions disproportionately. Society also loses productive talent when opportunities are denied because of background rather than ability. Social mobility matters because it gives people realistic routes to advancement.

5. Reducing harmful inequality

Improve access to quality education, healthcare, skills, productive employment, and essential services. Fair institutions and transparent decisions help prevent discrimination and favouritism. Inclusive development should widen capabilities and opportunities rather than assuming that inequality disappears automatically with overall economic growth.

L034. Discuss changes in women's status and measures to improve their participation in Pakistani society.

PS-10-D1-05 | 10 marks | Use headings and developed explanation

1. Traditional roles and contributions

Women have long contributed to households, care, agriculture, and cultural continuity, although many contributions receive limited recognition. Social expectations have often restricted public participation, mobility, and the range of education or employment considered suitable for women.

2. Educational advancement

Wider schooling has improved literacy, confidence, and professional prospects for many women. Education also supports better informed decisions within families and strengthens participation in community life. Progress remains uneven, particularly where poverty, distance, insecurity, or restrictive attitudes limit attendance.

3. Economic and public participation

Women contribute through healthcare, teaching, business, agriculture, media, politics, and other fields. Fair access to employment and resources increases household resilience and allows the country to use a wider range of skills and ideas for national development.

4. Continuing barriers

Violence, discrimination, unsafe workplaces, limited transport, unequal access to finance, and unpaid care responsibilities can reduce opportunity. Improvements in formal provision may have little practical effect unless women can safely and realistically use the services and opportunities available.

5. Practical improvement

Provide safe schools and workplaces, affordable healthcare, suitable transport, training, and fair treatment in employment. Support disadvantaged women and encourage recognition of their contributions. Working with families, communities, public institutions, and employers helps turn educational and social progress into meaningful participation.

L035. Explain the origin, regional forms, and cultural importance of Pakistani folklore.

PS-10-D1-03 | 10 marks | Use headings and developed explanation

1. Origins in community life

Folklore grew through oral transmission of stories, proverbs, songs, beliefs, and customs. Communities used these forms to remember experience, entertain one another, explain events, and pass moral lessons before modern recording and mass communication became widespread.

2. Historical development

The region's successive civilizations and cultural contacts enriched storytelling. New themes and characters mixed with local traditions, while each generation adapted material to its own environment. Folklore is therefore both inherited and changing rather than a fixed collection created at one moment.

3. Regional examples

Punjab has tales such as Heer Ranjha and Sohni Mahiwal; Sindh includes Umar Marvi and Momal Rano. Pashto traditions include Adam Khan and Durkhanai, while Hani and Sheh Mureed is associated with Balochistan. Northern regions contribute additional legends and local narratives.

4. Themes and significance

Love, loyalty, bravery, morality, hardship, and the supernatural recur in different forms. The stories preserve language, values, and memory, allowing people to recognize their own heritage and appreciate experiences shared with communities elsewhere in the country.

5. Preservation and contemporary role

Recording, literature, teaching, performance, and cultural events can keep traditions accessible. Responsible adaptation introduces younger audiences to inherited narratives while respecting regional origins. This combination of continuity and exchange supports both cultural diversity and a shared national heritage.

L036. Trace the development of drama in Pakistan and explain its social significance.

PS-10-D1-03 | 10 marks | Use headings and developed explanation

1. Indigenous foundations

Storytelling, folk performance, and street theatre provided local traditions of presenting characters and conflict to audiences. These forms used familiar language and experience, creating a connection between performance, community entertainment, and the passing on of ideas and values.

2. Cultural and colonial influences

Persian, Arabic, and other narrative traditions interacted with local expression. Western theatre introduced further techniques during colonial rule. Writers and performers combined influences rather than simply replacing earlier forms, allowing new structures to carry local themes and concerns.

3. Radio and television

Broadcasting made drama available to much larger audiences. PTV's establishment in 1964 was especially important for television performance and writing. It created a platform where stories about family, work, identity, and social tensions could reach viewers across regions.

4. Writers and contemporary forms

Ashfaq Ahmed, Bano Qudsia, A. Hameed, Anwar Maqsood, and other writers contributed to the dramatic tradition. Stage, television, and digital media continue to develop different styles, bringing new audiences and opportunities alongside commercial and creative pressures.

5. Social and cultural importance

Drama entertains but also invites reflection on relationships, inequality, changing expectations, and moral choices. It can preserve language and cultural experience and encourage discussion of difficult issues. Its educational value depends on thoughtful writing, responsible representation, and the ability to question stereotypes.

Grade 10 - Unit 2: Recreation - Sports

NBF Grade 10, PDF/printed pp. 22-36; supplied SLO document pp. 1-2

Included scope: PS-10-D2-01 and PS-10-D2-02

Short questions - 5 marks each

S108. Explain five benefits of leisure activities for individuals and communities.

PS-10-D2-01 | 5 marks | Five explained points

1. **Physical health:** Active leisure helps maintain fitness, movement, and healthy routines.
2. **Mental well-being:** Enjoyable breaks can reduce stress and provide relief from daily pressures.
3. **Social connection:** Shared activities create friendships, cooperation, and a sense of belonging.
4. **Cultural continuity:** Storytelling, crafts, festivals, and traditional games transmit heritage to younger generations.
5. **Creativity and balance:** Reading, arts, and hobbies develop interests and make daily life more balanced and fulfilling.

S109. Describe five leisure activities common in rural Pakistan.

PS-10-D2-01 | 5 marks | Five explained points

1. **Traditional games:** Kabaddi, wrestling, and other open-air games provide recreation and physical activity.
2. **Community gatherings:** Chopal meetings and family celebrations allow conversation and strengthen social relationships.
3. **Storytelling and music:** Oral narratives and folk songs preserve community memories and values.
4. **Craft hobbies:** Pottery, weaving, and embroidery combine creative enjoyment with inherited skills.
5. **Village fairs:** Melas bring nearby communities together through games, food, music, and cultural exchange.

S110. Compare rural and urban leisure activities in five points.

PS-10-D2-01 | 5 marks | Five explained points

1. **Environment:** Rural leisure often uses open fields and village spaces; urban leisure uses parks, clubs, gyms, and other built facilities.
2. **Games:** Traditional local games are prominent in villages, while cities offer a wider range of organized sports and venues.
3. **Gatherings:** Both enjoy family celebrations, although urban communities may also use exhibitions, restaurants, and commercial entertainment.
4. **Cultural practice:** Storytelling and crafts remain important in rural life, while theatres, libraries, and media add options in cities.
5. **Access:** Income, facilities, time, and technology shape opportunities in both settings, so the distinction is not absolute.

S111. Explain five ways sports benefit young people and national life.

PS-10-D2-02 | 5 marks | Five explained points

1. **Fitness:** Regular participation develops strength, stamina, coordination, and healthier habits.

2. **Mental resilience:** Practice and competition encourage confidence, persistence, and coping with setbacks.
3. **Character:** Rules and fair play teach discipline, respect, honesty, and responsibility.
4. **Cooperation:** Team sports develop communication and shared effort across social and regional differences.
5. **National and economic value:** Sporting achievement builds pride, while coaching, equipment, events, and tourism create employment.

S112. Describe five traditional games or sports of Pakistan.

PS-10-D2-02 | 5 marks | Five explained points

1. **Kabaddi:** Players raid opponents' territory and try to return safely, combining agility, strength, and strategy.
2. **Kushti:** Traditional wrestling uses grappling skills and disciplined training, often associated with an akhara.
3. **Malakhra:** Sindhi wrestling involves gripping an opponent's belt and attempting to unbalance or throw the opponent.
4. **Rasa Kashi:** Tug of war requires two teams to pull a rope in opposite directions through coordinated strength.
5. **Kho-kho and other games:** Chasing and tagging games, along with local street games, provide inexpensive recreation and preserve shared traditions.

S113. Explain the importance of hockey, cricket, and squash in Pakistan.

PS-10-D2-02 | 5 marks | Five explained points

1. **Hockey identity:** The textbook identifies hockey as the national game, with a distinguished history of international success.
2. **Hockey achievements:** Pakistan won Olympic gold in 1960, 1968, and 1984 and four men's Hockey World Cups.
3. **Cricket following:** Cricket draws large audiences and creates shared national excitement across regions and communities.
4. **Cricket achievements:** The 1992 ODI World Cup, 2009 T20 World Cup, and 2017 Champions Trophy are major successes discussed in the book.
5. **Squash tradition:** Champions including Hashim Khan, Jahangir Khan, Jansher Khan, and Qamar Zaman brought Pakistan international recognition.

S114. Suggest five measures to develop traditional and modern sports in Pakistan.

PS-10-D2-02 | 5 marks | Five explained points

1. **Accessible facilities:** Provide safe grounds, equipment, and appropriate venues in schools and communities.
2. **Coaching:** Train coaches and establish structured opportunities for children to learn and improve.
3. **Fair selection:** Use transparent merit-based processes so talented players receive opportunities regardless of background.
4. **Inclusive participation:** Address barriers facing girls, rural communities, and people with disabilities.
5. **Sustained support:** Organize regular competitions, maintain facilities, and provide reliable funding and athlete welfare instead of occasional short-term publicity.

Long questions - 10 marks each

L037. Explain the importance of leisure and compare recreational activities in rural and urban Pakistan.

PS-10-D2-01 | 10 marks | Use headings and developed explanation

1. Physical and psychological well-being

Active recreation improves fitness, while enjoyable hobbies provide rest from daily pressures. Reading, arts, walking, games, and other activities can support confidence, creativity, and a healthier balance between responsibilities and personal enjoyment.

2. Social cohesion and culture

Shared leisure helps people form relationships and practise cooperation. Traditional games, storytelling, festivals, music, and crafts transmit heritage between generations. Participation creates a sense of belonging and introduces people to the experience and customs of others.

3. Rural recreation

Villages commonly use open spaces for kabaddi, wrestling, and local games. Chopal gatherings, folk music, storytelling, family celebrations, and melas connect communities. Crafts may serve as hobbies as well as occupations, preserving skills and local forms of expression.

4. Urban recreation

Cities offer parks, sports clubs, gyms, theatres, libraries, restaurants, and organized events. Television, social media, gaming, travel, and cultural exhibitions add options. Access varies by income, time, safety, and neighbourhood facilities, so urban residence does not ensure equal opportunity.

5. Balanced and inclusive provision

Both settings share family events, sport, and media use, and differences should not be treated as fixed. Safe facilities, affordable programmes, protection of cultural activities, and opportunities for girls and disadvantaged groups help communities gain wider benefits from leisure.

L038. Discuss the significance of sports and the different categories played in Pakistan.

PS-10-D2-02 | 10 marks | Use headings and developed explanation

1. Health and personal development

Sport builds strength, endurance, coordination, and concentration. Training develops discipline, persistence, and the ability to manage success and failure. Fair play and respect for rules encourage habits that can benefit learning, work, and relationships beyond the playing field.

2. Social and economic benefits

Teams and spectators bring people from different regions together, strengthening shared identity. Coaching, equipment manufacture, events, transport, and tourism create employment. These benefits increase when opportunities extend beyond a small elite and reach schools and local communities.

3. Traditional sports

Kabaddi, kushti, malakhra, and Rasa Kashi reflect inherited practices and local environments. They can require relatively simple facilities while developing strength, skill, and cooperation. Preserving them maintains a living connection between recreation and cultural heritage.

4. Nationally prominent and international sports

Hockey, cricket, and squash have brought important recognition to Pakistan. Football, boxing, tennis, and badminton also provide opportunities for participation and achievement. The categories overlap: an internationally played sport may also have strong national or traditional significance.

5. Newer opportunities and development

Martial arts, gymnastics, snooker, and athletics broaden recreational choice and potential success. Safe facilities, trained coaches, transparent selection, regular competition, and inclusive access are necessary to develop talent and make sport a sustained part of community life.

L039. Explain Pakistan's sporting heritage and propose measures to improve participation and performance.

PS-10-D2-02 | 10 marks | Use headings and developed explanation

1. Hockey heritage

Pakistan's hockey history includes Olympic gold medals in 1960, 1968, and 1984 and World Cup victories in 1971, 1978, 1982, and 1994. These achievements show the value of skill, teamwork, coaching, and sustained competitive preparation.

2. Cricket and squash

Cricket successes include the 1992 ODI World Cup, 2009 T20 World Cup, and 2017 Champions Trophy. Squash champions such as Hashim Khan, Jahangir Khan, Jansher Khan, and Qamar Zaman created another distinguished tradition that can inspire young athletes.

3. Wider sporting culture

Traditional wrestling and kabaddi remain important, while football, boxing, tennis, athletics, and other disciplines attract participants. Supporting a broad range of sports allows different abilities and interests to develop instead of concentrating all attention and resources on one game.

4. Grassroots investment

Schools and communities need safe facilities, equipment, qualified coaches, and regular competitions. Affordable access and programmes for girls and neglected areas widen the talent base and make sport useful for health and recreation even for those who never become professionals.

5. Performance and governance

Merit-based selection, reliable funding, athlete welfare, facility maintenance, and accountable administration improve continuity. Long-term development should connect local participation with higher-level training so that national achievement rests on a broad, fair, and sustainable foundation.

SLO coverage audit

Every included SLO has answered short and long coverage. A question can cover more than one SLO; repeated references show integration, not additional syllabus. All excluded SLO codes were checked against the bank.

Map-labelling practice guide

SLOs PS-09-B1-01 and PS-09-B2-01 include location and map labelling. Use the corresponding political and physical maps in your textbook as the base map. This guide is a location checklist, not a scale map or a question on individual cities.

Feature to locate	Position to remember
Arabian Sea	Along the southern coast.
China / Afghanistan / Iran / India	North-east / west and north-west / south-west / east respectively.
Karakoram	Far northern and north-eastern high mountains; K2 is in this range.
Hindu Kush	North-western highlands, including the Chitral region.
Himalaya / Nanga Parbat	Northern mountain system; Nanga Parbat is a Himalayan peak.
Sulaiman Range	Western side of the Indus region, adjoining eastern Balochistan.
Kirthar Range	Along the Sindh-Balochistan boundary region.
Balochistan Plateau	South-western upland of the country.
Potwar Plateau / Salt Range	Northern Punjab; the Salt Range forms the southern margin of the Potwar area.
Indus River / Indus Plain	The river runs south through Pakistan; the alluvial plain extends through Punjab and Sindh.
Jhelum / Chenab / Ravi / Sutlej	Eastern tributary system across the Punjab region; locate each on the textbook map.
Thal / Cholistan / Thar / Kharan	Thal in the Punjab interfluve between the Indus and Jhelum-Chenab system; Cholistan in southern Punjab; Thar in south-eastern Sindh; Kharan in Balochistan.
Indus Delta / Makran Coast	Delta near the Indus outlet in Sindh; Makran coast farther west in Balochistan.

Practice command: label any five requested features accurately, then explain each feature's geographical or economic significance where the question requires it. Naming five features alone does not answer a question asking for their importance.

Solved MCQ practice

All 82 MCQs are limited to the included summative syllabus. The correct option and a brief reason follow each item for rapid revision. Each question carries its SLO reference.

M001. What does the term ideology principally describe?

PS-09-A1-01

A. A weather pattern

B. A list of natural resources

C. A system of ideas, values, and aims

D. A transport network

Answer: C - A system of ideas, values, and aims. An ideology provides a framework of beliefs and goals for collective action.

M002. Which value best reflects the ideological demand for fair opportunities?

PS-09-A1-01

A. Economic exclusion

B. Social justice

C. Hereditary privilege

D. Racial superiority

Answer: B - Social justice. Social justice connects political independence with fair treatment and opportunity.

M003. Why did economic deprivation strengthen Muslim political demands?

PS-09-A1-01

A. It encouraged demands for representation and economic fairness

B. It guaranteed equal access to jobs

C. It removed educational disadvantage

D. It ended dependence on landowners

Answer: A - It encouraged demands for representation and economic fairness. Hardship created pressure for effective safeguards and improvement.

M004. Which idea is most closely associated with Iqbal's Khudi?

PS-09-A1-02

A. Inherited political office

B. Rejection of learning

C. Passive dependence

D. Self-realization and purposeful development

Answer: D - Self-realization and purposeful development. Khudi emphasizes development of the self rather than helplessness.

M005. Quaid-e-Azam's address of 11 August 1947 emphasized which principle?

PS-09-A1-02

A. Hereditary political power

B. Freedom of worship and equal citizenship

C. Denial of minority rights

D. Compulsory single-language households

Answer: B - Freedom of worship and equal citizenship. The address affirmed freedom to attend places of worship without discrimination.

M006. Direct British Crown rule in India began in which year?

PS-09-A1-03

A. 1858

B. 1906

C. 1935

D. 1757

Answer: A - 1858. Crown rule followed the upheaval of 1857 and the end of Company government.

M007. Sir Syed's Scientific Society was established in which year?

PS-09-A1-04

A. 1877

B. 1906

C. 1920

D. 1864

Answer: D - 1864. The society promoted translation and scientific learning.

M008. The Muhammadan Anglo-Oriental College at Aligarh was established in which year?

PS-09-A1-04

A. 1877

B. 1858

C. 1940

D. 1916

Answer: A - 1877. The college became a major institution of Sir Syed's educational movement.

M009. The Simla Deputation met which Viceroy in 1906?

PS-09-A1-05

A. Lord Minto

B. Lord Mountbatten

C. Lord Curzon

D. Lord Wavell

Answer: A - Lord Minto. The deputation presented Muslim demands to Lord Minto on 1 October 1906.

M010. Who led the Simla Deputation?

PS-09-A1-05

A. Motilal Nehru

B. Ramsay MacDonald

C. Aga Khan

D. Stafford Cripps

Answer: C - Aga Khan. Aga Khan led the delegation seeking representation and safeguards.

M011. Where was the All-India Muslim League founded?

PS-09-A1-05

A. Delhi

B. Lahore

C. Karachi

D. Dhaka

Answer: D - Dhaka. Its founding session was held at Dhaka on 30 December 1906.

M012. Which reforms recognized separate Muslim electorates in 1909?

PS-09-A1-05

A. Cabinet Mission Plan

B. Montagu-Chelmsford Reforms

C. 3 June Plan

D. Morley-Minto Reforms

Answer: D - Morley-Minto Reforms. The Morley-Minto reforms institutionalized separate Muslim electorates.

M013. The Lucknow Pact was concluded in which year?

PS-09-A1-05

A. 1946

B. 1916

C. 1906

D. 1928

Answer: B - 1916. The pact marked temporary agreement between Congress and the Muslim League.

M014. What share of central legislative seats did the Lucknow Pact envisage for Muslims?

PS-09-A1-05

A. One-third

B. Three-quarters

C. One-half

D. One-tenth

Answer: A - One-third. One-third central representation was an important agreed safeguard.

M015. The Khilafat Movement principally sought to protect which institution?

PS-09-A1-05 / PS-09-A1-06

A. The Ottoman Caliphate

B. The East India Company

C. The Indian Civil Service

D. The League of Nations

Answer: A - The Ottoman Caliphate. Its immediate concern was the future of the Ottoman Caliph after the war.

M016. What decisive change removed the Khilafat Movement's original institutional objective?

PS-09-A1-06

A. The Lahore Resolution

B. Abolition of the Caliphate in Turkey

C. Formation of the Muslim League

D. Creation of PTV

Answer: B - Abolition of the Caliphate in Turkey. Turkey abolished the Caliphate in 1924.

M017. Why was the Simon Commission widely opposed?

PS-09-A1-06

A. It had no British members

B. It included no Indian member

C. It immediately partitioned India

D. It abolished every legislature

Answer: B - It included no Indian member. Its all-British composition raised objections about Indian participation.

M018. Who chaired the committee associated with the Nehru Report of 1928?

PS-09-A1-06

A. Motilal Nehru

B. Jawaharlal Nehru

C. Lord Minto

D. Aga Khan

Answer: A - Motilal Nehru. The report is associated with the committee chaired by Motilal Nehru.

M019. Quaid-e-Azam presented his Fourteen Points in which year?

PS-09-A1-06

A. 1939

B. 1929

C. 1919

D. 1947

Answer: B - 1929. The points followed the dispute over the Nehru Report's safeguards.

M020. Iqbal delivered the Allahabad Address in which year?

PS-09-A1-06

A. 1930

B. 1924

C. 1906

D. 1946

Answer: A - 1930. The 1930 address became an important milestone in Muslim political thinking.

M021. The Day of Deliverance was observed on which date?

PS-09-A1-06

A. 22 December 1939

B. 1 October 1906

C. 14 August 1947

D. 23 March 1940

Answer: A - 22 December 1939. It followed the resignations of Congress ministries in 1939.

M022. Who moved the Lahore Resolution?

PS-09-A1-07

A. Ramsay MacDonald

B. Stafford Cripps

C. Lord Wavell

D. A. K. Fazlul Huq

Answer: D - A. K. Fazlul Huq. Fazlul Huq presented the resolution at the League's Lahore session.

M023. The Lahore Resolution was presented on which date?

PS-09-A1-07

A. 23 March 1940

B. 30 December 1906

C. 22 December 1939

D. 3 June 1947

Answer: A - 23 March 1940. The presentation on 23 March is the principal date associated with the resolution.

M024. How many Muslim central legislative seats did the League win in the 1945 election?

PS-09-A1-07

A. All 30

B. Only 5

C. Half of 30

D. None

Answer: A - All 30. The complete success strengthened the League's representative claim.

M025. Which plan proposed a limited union and three provincial groups in 1946?

PS-09-A1-07

A. Cabinet Mission Plan

B. Lucknow Pact

C. Simla Deputation

D. Communal Award

Answer: A - Cabinet Mission Plan. Provincial grouping was central to the Cabinet Mission proposals.

M026. Which Viceroy announced the 3 June Plan?

PS-09-A1-07

A. Lord Minto

B. Lord Ripon

C. Lord Mountbatten

D. Lord Curzon

Answer: C - Lord Mountbatten. Mountbatten announced the partition and transfer-of-power plan in 1947.

M027. Pakistan is situated in which hemispheres?

PS-09-B1-01

A. Northern and Western

B. Southern and Eastern

C. Northern and Eastern

D. Southern and Western

Answer: C - Northern and Eastern. Pakistan lies north of the Equator and east of the prime meridian.

M028. Which country lies to Pakistan's north-east?

PS-09-B1-01

A. China

B. Nepal

C. Iran

D. Sri Lanka

Answer: A - China. China borders Pakistan in the north-east.

M029. Which sea lies along Pakistan's southern coast?

PS-09-B1-01 / PS-09-B1-02

A. Arabian Sea

B. Red Sea

C. Mediterranean Sea

D. Caspian Sea

Answer: A - Arabian Sea. The Arabian Sea provides access to the Indian Ocean.

M030. Which feature separates Pakistan from Tajikistan?

PS-09-B1-02

A. Afghanistan's Wakhan Corridor

B. The Salt Range

C. The Indus Delta

D. The Thal Desert

Answer: A - Afghanistan's Wakhan Corridor. Pakistan has no direct border with Tajikistan because Afghan territory intervenes.

M031. K2 is located in which mountain range?

PS-09-B2-01

A. Kirthar

B. Sulaiman

C. Karakoram

D. Salt Range

Answer: C - Karakoram. K2 is a major peak of the Karakoram.

M032. Tirich Mir is associated with which range?

PS-09-B2-01

A. Makran Coast Range

B. Kirthar

C. Hindu Kush

D. Salt Range

Answer: C - Hindu Kush. Tirich Mir is a prominent Hindu Kush peak.

M033. Which physical region best supports extensive canal-irrigated cultivation?

PS-09-B2-02

A. Highest glacier zone

B. Indus Plain

C. Dry rocky ridge without water

D. Steep mountain summit

Answer: B - Indus Plain. Flat alluvial land and irrigation support large cultivated areas.

M034. Which vegetation is suited to saline tidal coastal environments?

PS-09-B2-03

A. Temperate orchard only

B. High-altitude conifers

C. Mangroves

D. Alpine meadow

Answer: C - Mangroves. Mangroves are adapted to suitable tidal and saline coastal conditions.

M035. Why do mountains increase transport construction costs?

PS-09-B2-04

A. They guarantee snow-free travel

B. They eliminate bridge requirements

C. They require difficult engineering and slope protection

D. They make every route straight and level

Answer: C - They require difficult engineering and slope protection. Steep terrain often requires cuttings, bridges, tunnels, and maintenance.

M036. Which factor generally lowers temperature in Pakistan's highlands?

PS-09-B3-01

A. Greater port capacity

B. Higher urban population alone

C. Greater distance below sea level

D. Increasing altitude

Answer: D - Increasing altitude. Air temperature generally decreases as elevation increases.

M037. What creates the summer monsoon's landward movement of moist air?

PS-09-B3-01

A. Higher summer pressure over hot land than cool sea

B. Rapid land heating and relatively low pressure over land

C. Permanent snow cover over the plains

D. Complete absence of evaporation

Answer: B - Rapid land heating and relatively low pressure over land. Differential heating establishes pressure conditions drawing moisture inland.

M038. Western depressions mainly bring which useful seasonal precipitation?

PS-09-B3-01

A. Only summer desert dust

B. No precipitation

C. Winter rain and mountain snow

D. Year-round tropical downpours everywhere

Answer: C - Winter rain and mountain snow. They are an important cool-season source of rain and snow.

M039. Relief rainfall is most directly caused by which process?

PS-09-B3-01

A. Moist air being forced up a mountain slope

B. Removal of all atmospheric moisture

C. Air sinking and warming throughout ascent

D. Underground water pumping

Answer: A - Moist air being forced up a mountain slope. Uplift cools moist air and can cause condensation and precipitation.

M040. Which condition is characteristic of an arid climate?

PS-09-B3-03

A. No evaporation

B. Daily heavy rain throughout the year

C. Permanent freezing at sea level

D. Low rainfall and high moisture shortage

Answer: D - Low rainfall and high moisture shortage. Arid regions receive insufficient reliable precipitation relative to moisture loss.

M041. Which action can increase flood runoff?

PS-09-B3-04

A. Protection of drainage routes

B. Carefully planned infiltration

C. Maintenance of vegetation cover

D. Deforestation

Answer: D - Deforestation. Vegetation loss reduces interception and can speed surface runoff.

M042. Which response best reduces drought vulnerability?

PS-09-B3-04

A. Unrestricted groundwater depletion

B. Wasting irrigation water

C. Water conservation and suitable drought-tolerant crops

D. Removing all storage

Answer: C - Water conservation and suitable drought-tolerant crops. Conservation and adapted crops reduce pressure on scarce supplies.

M043. Tarbela Dam is built on which river?

PS-09-C1-01 / PS-09-C1-03

A. Ravi

B. Jhelum

C. Sutlej

D. Indus

Answer: D - Indus. Tarbela is a major storage and hydropower project on the Indus.

M044. Mangla Dam is built on which river?

PS-09-C1-01 / PS-09-C1-03

A. Indus

B. Kabul

C. Jhelum

D. Ravi

Answer: C - Jhelum. Mangla stores water on the Jhelum.

M045. What is an aquifer?

PS-09-C1-01

A. A mountain pass

B. A water-bearing underground geological formation

C. A type of crop pest

D. A ship-loading machine

Answer: B - A water-bearing underground geological formation. Aquifers store and transmit groundwater tapped by wells.

M046. What commonly causes soil salinity in poorly drained irrigated land?

PS-09-C1-02

A. Permanent absence of irrigation

B. Increased root aeration alone

C. Accumulation of salts as water evaporates

D. Removal of every dissolved salt by evaporation

Answer: C - Accumulation of salts as water evaporates. Water evaporates but leaves dissolved salts behind.

M047. Which structure primarily raises river level to divert water into canals?

PS-09-C1-03

A. Cold store

B. Barrage

C. Mountain pass

D. Airport terminal

Answer: B - Barrage. A barrage regulates and diverts flow through gates.

M048. A village resident moves to a city because it offers better jobs. The jobs are a:

PS-09-C2-02

A. Rural climatic zone

B. Pull factor

C. Birth-rate measure

D. Seasonal crop disease

Answer: B - Pull factor. Attractive destination conditions are pull factors.

M049. Seasonal movement between high summer and low winter pastures is called:

PS-09-C2-02

A. Urban congestion

B. Transhumance

C. Aquaculture

D. Land reclamation

Answer: B - Transhumance. Transhumance follows seasonal changes in pasture and temperature.

M050. Which measure most directly develops youth employability?

PS-09-C2-03

A. Excluding youth from education

B. Ignoring labour-market needs

C. Removing all career guidance

D. Relevant skills training and apprenticeships

Answer: D - Relevant skills training and apprenticeships. Training linked to actual work develops practical employable capabilities.

M051. Which item is a farming process rather than an input?

PS-09-C3-01

A. Capital

B. Land

C. Seed

D. Harvesting

Answer: D - Harvesting. Harvesting is an activity converting production into usable output.

M052. What is the main purpose of subsistence farming?

PS-09-C3-01

A. Meeting the farm household's needs

B. Replacing all food with minerals

C. Operating international airlines

D. Producing only for foreign buyers

Answer: A - Meeting the farm household's needs. Subsistence output primarily supports household consumption.

M053. Which is a typical Rabi crop?

PS-09-C3-02

A. Cotton

B. Rice

C. A summer-only cotton variety

D. Wheat

Answer: D - Wheat. Wheat is normally grown during the cooler Rabi season.

M054. Which crop can function as both a food crop and an export cash crop?

PS-09-C3-02

A. Rock salt

B. Rice

C. Raw cotton fibre

D. Tobacco leaves

Answer: B - Rice. Rice feeds people and is also sold commercially and exported.

M055. Which industry receives its principal fibre raw material from cotton?

PS-09-C3-03

A. Ship repair

B. Textiles

C. Copper mining

D. Air traffic control

Answer: B - Textiles. Cotton fibre is processed into yarn and cloth.

M056. Which practice means growing different crops in sequence on the same land?

PS-09-C3-03

A. Unrestricted fishing

B. Permanent overgrazing

C. Crop rotation

D. Unplanned urban sprawl

Answer: C - Crop rotation. Rotation can help manage soil nutrients and interrupt pest cycles.

M057. Converting fertile farmland into unplanned housing most directly causes:

PS-09-C3-04

A. Loss of productive agricultural land

B. An automatic rise in crop area

C. Elimination of food demand

D. More irrigation water for every farmer

Answer: A - Loss of productive agricultural land. Construction removes land from agricultural production.

M058. Raising fish in managed ponds is called:

PS-09-C3-01

A. Monsoon circulation

B. Transhumance

C. Silviculture only

D. Aquaculture

Answer: D - Aquaculture. Aquaculture is controlled production of aquatic organisms.

M059. Why should fishing be restricted during spawning seasons?

PS-09-C3-03 / PS-09-C3-04

A. To prevent all fish growth

B. To remove every mature fish

C. To protect reproduction and future stocks

D. To increase destruction of nursery habitats

Answer: C - To protect reproduction and future stocks. Breeding protection helps populations replenish themselves.

M060. Which mode is generally suitable for large long-distance bulk freight on established inland routes?

PS-09-C4-03

A. Helicopter taxi

B. Rail

C. Motorcycle courier

D. Passenger aircraft

Answer: B - Rail. Rail can efficiently carry large loads where dependable services exist.

M061. Why is air transport used for some perishable high-value goods?

PS-09-C4-03

A. It is always the cheapest bulk option

B. It produces no emissions

C. It requires no specialized facilities

D. Its speed can justify the higher cost

Answer: D - Its speed can justify the higher cost. Fast delivery can reduce loss or meet urgent market needs.

M062. What does an export earn for the exporting economy?

PS-09-C4-04

A. Freedom from every production cost

B. Automatic elimination of all imports

C. Guaranteed permanent trade surplus

D. Foreign exchange

Answer: D - Foreign exchange. Foreign buyers' payments help finance overseas purchases and obligations.

M063. What does CPEC stand for?

PS-09-C4-05

A. China-Pakistan Economic Corridor

B. Coastal Petroleum Export Committee

C. China-Pacific Engineering Colony

D. Central Pakistan Education Council

Answer: A - China-Pakistan Economic Corridor. The corridor concerns economic and infrastructure connectivity between China and Pakistan.

M064. Which internal condition most discourages reliable trade planning?

PS-09-C4-06

A. Reliable electricity

B. Stable delivery schedules

C. Clear procedures

D. Frequent unpredictable policy changes

Answer: D - Frequent unpredictable policy changes. Uncertainty increases risk for producers, buyers, and investors.

M065. Which collection best illustrates cultural elements?

PS-10-D1-01

A. Only rainfall totals

B. Only mineral reserves

C. Only road distances

D. Language, beliefs, arts, and customs

Answer: D - Language, beliefs, arts, and customs. Culture includes learned and shared meanings, practices, and expressions.

M066. A lingua franca is best described as:

PS-10-D1-02

A. A geological fault

B. A local weather station

C. A common language used between different language groups

D. A compulsory rejection of regional literature

Answer: C - A common language used between different language groups. A lingua franca enables communication across first-language differences.

M067. Which approach best supports linguistic integration?

PS-10-D1-02

A. Prevent translation

B. Suppress every regional language

C. Treat language difference as disloyalty

D. Promote common communication while respecting regional languages

Answer: D - Promote common communication while respecting regional languages. Inclusive recognition and communication can reinforce one another.

M068. Heer Ranjha is most closely associated with which regional tradition?

PS-10-D1-03

A. Western depression forecasts

B. Aquaculture manuals

C. Makran sea navigation

D. Punjabi folklore

Answer: D - Punjabi folklore. It is a celebrated tale in Punjabi oral and literary heritage.

M069. Pakistan Television began in which year?

PS-10-D1-03

A. 1940

B. 1906

C. 1930

D. 1964

Answer: D - 1964. PTV's establishment expanded the audience and platform for drama.

M070. Which is a possible cultural risk of globalization?

PS-10-D1-04

A. Dominant global styles overshadowing local traditions

B. Elimination of all cultural contact

C. Automatic protection of every language

D. Permanent equality of digital access

Answer: A - Dominant global styles overshadowing local traditions. Unequal global influence can weaken local cultural expression.

M071. Feudal social power is most directly associated with:

PS-10-D1-05

A. Universal equality of land access

B. Concentrated landownership and dependent rural relationships

C. Absence of agricultural property

D. A type of sports competition

Answer: B - Concentrated landownership and dependent rural relationships. Land concentration can support unequal economic and social influence.

M072. Social stratification refers to:

PS-10-D1-06

A. Seasonal movement of herds

B. Growing winter wheat

C. Measuring atmospheric pressure

D. Ranking people and groups in social layers

Answer: D - Ranking people and groups in social layers. Social layers differ in status, power, and access to resources.

M073. Which Sufi order is especially associated with silent Dhikr?

PS-10-D1-07

A. Suhrawardi only

B. Naqshbandi

C. Chishti only

D. Qadiri only

Answer: B - Naqshbandi. Silent remembrance is a distinctive emphasis of the Naqshbandi tradition.

M074. Baha-ud-Din Zakariya of Multan is associated with which order?

PS-10-D1-07

A. Chishti only

B. Suhrawardi

C. Qadiri only

D. Naqshbandi only

Answer: B - Suhrawardi. The textbook connects him with the Suhrawardi tradition.

M075. What does Tazkiyah refer to in Sufi teaching?

PS-10-D1-07

A. Port cargo storage

B. Purification of the self

C. Seasonal harvesting

D. A wrestling arena

Answer: B - Purification of the self. Tazkiyah concerns spiritual and moral purification.

M076. Which activity best combines leisure with cultural preservation?

PS-10-D2-01

A. Community storytelling and traditional crafts

B. Blocking all recreational access

C. Destroying local games

D. Preventing cultural participation

Answer: A - Community storytelling and traditional crafts. These activities share traditions and skills across generations.

M077. Malakhra is a traditional wrestling form particularly associated with:

PS-10-D2-02

A. Sindh

B. Airports

C. The Mediterranean Sea

D. The highest glacier zone only

Answer: A - Sindh. Malakhra is an important Sindhi traditional sport.

M078. Which sport is identified in the textbook as Pakistan's national game?

PS-10-D2-02

A. Squash

B. Hockey

C. Tennis

D. Cricket

Answer: B - Hockey. The book distinguishes hockey's national-game status from cricket's greater popular following.

M079. Pakistan won its first men's Hockey World Cup in which year?

PS-10-D2-02

A. 1992

B. 1971

C. 2017

D. 2009

Answer: B - 1971. Pakistan won the inaugural men's Hockey World Cup in 1971.

M080. Pakistan won the ODI Cricket World Cup in which year?

PS-10-D2-02

A. 1992

B. 1984

C. 1964

D. 1971

Answer: A - 1992. The 1992 victory is a major milestone in Pakistan's cricket history.

M081. Which pair is best known for Pakistan's squash achievements?

PS-10-D2-02

A. Jahangir Khan and Jansher Khan

B. Wasim Akram and Waqar Younis

C. Sohail Abbas and Shahbaz Ahmed

D. Aisam-ul-Haq and Aqeel Khan

Answer: A - Jahangir Khan and Jansher Khan. The other pairs are associated respectively with hockey, cricket, and tennis.

M082. Which action best supports sustainable sports development?

PS-10-D2-02

A. Selection based only on personal connections

B. Grassroots coaching and fair access to maintained facilities

C. Closing school playing fields

D. Funding only one publicity event

Answer: B - Grassroots coaching and fair access to maintained facilities. Long-term participation and fair talent development require regular, accessible support.

Final priority revision - start here if time is short

Priority is based on breadth of SLO coverage, conceptual importance, common question forms, and usefulness across several answers. It is not evidence that these questions will appear in tomorrow's APS paper. Complete coverage remains safer than preparing only a guess list.

First-pass long answers: twelve core revision questions

L001 - Explain how Islamic values and Muslim deprivation together formed the ideological basis of Pakistan. (p. 7)

L006 - Explain how political developments between 1927 and 1930 strengthened Muslim demands for safeguards. (p. 16)

L009 - Explain the final stages leading to the establishment of Pakistan during 1946-47. (p. 18)

L011 - Describe Pakistan's major landforms and explain their economic importance. (p. 23)

L015 - Explain Pakistan's main sources of rainfall and their seasonal importance. (p. 29)

L017 - Evaluate Pakistan's irrigation system and suggest sustainable improvements. (p. 33)

L019 - Analyze rural-urban and seasonal migration in Pakistan, including causes, consequences, and responses. (p. 37)

L023 - Evaluate agriculture's economic role and propose sustainable ways to improve output. (p. 44)

L025 - Compare Pakistan's main modes of transport and explain their regional distribution. (p. 48)

L028 - Analyze how cultural elements and regional traditions can strengthen national integration. (p. 54)

L032 - Explain the major Sufi orders, their shared teachings, and their contribution to unity in Pakistan. (p. 57)

L038 - Discuss the significance of sports and the different categories played in Pakistan. (p. 62)

Priority short questions - chapter by chapter

Grade 9 - Unit 1: Ideological Basis of Pakistan

S002 - Explain the ideological basis of Pakistan in five points. (p. 4)

S003 - How did economic deprivation encourage the demand for Pakistan? (p. 4)

S006 - Explain Pakistan's ideology with reference to Quaid-e-Azam's vision. (p. 5)

S009 - Explain five contributions of Sir Syed Ahmad Khan's reform movement. (p. 6)

Grade 9 - Unit 2: Establishment of Pakistan

S011 - Explain the significance of the Simla Deputation of 1906. (p. 9)

S014 - Describe five important features or results of the Lucknow Pact of 1916. (p. 10)

S018 - Explain any five main demands of Quaid-e-Azam's Fourteen Points. (p. 11)

S021 - Why was the Day of Deliverance observed on 22 December 1939? (p. 11)

S022 - State five important aspects of the Lahore Resolution of 1940. (p. 12)

S025 - Explain the importance of the elections of 1945-46 for the Pakistan Movement. (p. 13)

S026 - State five main features of the Cabinet Mission Plan of 1946. (p. 13)

S027 - Explain five provisions or consequences of the 3 June Plan of 1947. (p. 13)

Grade 9 - Unit 3: Land of Pakistan

S034 - Describe Pakistan's geographical location in five points. (p. 19)

S035 - Explain five economic advantages of Pakistan's location. (p. 19)

Grade 9 - Unit 4: Natural Topography and Vegetation

S039 - Explain the importance of the northern mountains for Pakistan. (p. 21)

S040 - Compare life in mountainous areas with life in the Indus Plain. (p. 21)

S043 - Explain how vegetation differs across Pakistan's landforms. (p. 22)

Grade 9 - Unit 5: Climate and Environmental Hazards

S050 - Explain how summer monsoon rainfall develops and affects Pakistan. (p. 26)

S051 - Why are western depressions important for Pakistan? (p. 27)

S053 - Explain five causes of river flooding in Pakistan. (p. 27)

S054 - Explain five effects of drought on Pakistan's economy. (p. 27)

S055 - Suggest five measures to reduce damage from floods, storms, and droughts. (p. 28)

Grade 9 - Unit 6: Water Resources

S057 - Explain seasonal changes in the availability and quality of water. (p. 31)

S058 - State five advantages of Pakistan's irrigation system. (p. 31)

S059 - Explain five problems associated with extensive irrigation. (p. 32)

S060 - Suggest five sustainable ways to reduce water shortage and pollution. (p. 32)

S061 - Distinguish the functions of dams, barrages, canals, and reservoirs. (p. 32)

Grade 9 - Unit 7: Population - Included Migration and Youth Topics

S063 - Explain five causes of rural-to-urban migration. (p. 35)

S064 - Explain five consequences of rapid rural-to-urban migration. (p. 35)

S065 - Explain seasonal migration with suitable examples. (p. 35)

S067 - Identify five problems faced by young and dependent people and suggest responses. (p. 36)

Grade 9 - Unit 8: Agriculture, Livestock and Fisheries

S069 - Explain agriculture as a system of inputs, processes, and outputs. (p. 39)

S071 - Distinguish Rabi and Kharif crops and give examples. (p. 39)

S073 - Describe the growing requirements and main producing areas of wheat. (p. 40)

S074 - Describe the requirements, producing areas, and importance of rice. (p. 40)

S076 - Explain five contributions of agriculture to Pakistan's economy. (p. 41)

S077 - Suggest five sustainable agricultural practices. (p. 41)

S078 - Identify five agricultural challenges and match each with a solution. (p. 41)

S081 - Describe inland fisheries, marine fisheries, and aquaculture in five points. (p. 42)

S082 - Suggest five measures for sustainable development of fisheries. (p. 42)

Grade 9 - Unit 9: Transport and Trade

S086 - Compare road and rail transport in five points. (p. 46)

S088 - Explain five benefits of trade for Pakistan's economy. (p. 46)

S089 - Explain the commercial importance of CPEC, Gwadar, and Karachi Port. (p. 47)

S091 - Identify five internal trade challenges and give a solution for each. (p. 47)

Grade 10 - Unit 1: Society and Culture of Pakistan

S094 - Explain five ways languages and dialects affect national integration. (p. 50)

S096 - Explain the origin and development of Pakistani folklore. (p. 51)

S098 - Explain five stages or influences in the development of drama in Pakistan. (p. 51)

S099 - Explain five positive and negative effects of globalization on Pakistani culture. (p. 52)

S100 - Explain the changing position of women in Pakistani society. (p. 52)

S103 - Explain social stratification and its effects on inequality. (p. 53)

S105 - State five common principles of Pakistan's Sufi mystical traditions. (p. 53)

S107 - Explain how Sufi traditions encourage unity in Pakistani society. (p. 54)

Grade 10 - Unit 2: Recreation - Sports

S108 - Explain five benefits of leisure activities for individuals and communities. (p. 60)

S111 - Explain five ways sports benefit young people and national life. (p. 60)

S112 - Describe five traditional games or sports of Pakistan. (p. 61)

S113 - Explain the importance of hockey, cricket, and squash in Pakistan. (p. 61)

Additional long answers to secure wider coverage

L003 - Assess Sir Syed Ahmad Khan's role as a reformer and the Aligarh Movement's contribution to Muslim advancement. (p. 8)

L008 - Trace the progress of the Pakistan Movement from the Lahore Resolution to the elections of 1945-46. (p. 17)

L010 - Explain Pakistan's location and assess its geographical and economic importance. (p. 20)

L012 - Compare the environment and lifestyles of mountain, plain, and dry-plateau regions. (p. 24)

L016 - Assess the effects of seasonal weather and hazards on Pakistan's economy and suggest responses. (p. 29)

L018 - Explain the role of dams, barrages, canals, and reservoirs, including their benefits and adverse effects. (p. 33)

L020 - Discuss the problems of youth and dependent people and measures for sustainable human-resource development. (p. 37)

L022 - Discuss Pakistan's major food and cash crops, their requirements, areas, and economic significance. (p. 44)

L024 - Explain the importance, problems, and sustainable development of Pakistan's fisheries. (p. 45)

L027 - Analyze internal obstacles to export growth and propose sustainable solutions. (p. 49)

L030 - Evaluate the positive and negative effects of globalization on Pakistani society and culture. (p. 55)

L033 - Analyze social stratification, its causes and consequences, and ways to reduce inequality. (p. 57)

L037 - Explain the importance of leisure and compare recreational activities in rural and urban Pakistan. (p. 62)

Priority MCQs - fact and concept recall

Use these as oral recall prompts. The full four-option questions and explanations are in the MCQ section.

M008 The Muhammadan Anglo-Oriental College at Aligarh was established in which year? **1877**

M009 The Simla Deputation met which Viceroy in 1906? **Lord Minto**

M010 Who led the Simla Deputation? **Aga Khan**

M012 Which reforms recognized separate Muslim electorates in 1909? **Morley-Minto Reforms**

M014 What share of central legislative seats did the Lucknow Pact envisage for Muslims? **One-third**

M019 Quaid-e-Azam presented his Fourteen Points in which year? **1929**

M020 Iqbal delivered the Allahabad Address in which year? **1930**

M021 The Day of Deliverance was observed on which date? **22 December 1939**

M022 Who moved the Lahore Resolution? **A. K. Fazlul Huq**

M023 The Lahore Resolution was presented on which date? **23 March 1940**

M024 How many Muslim central legislative seats did the League win in the 1945 election? **All 30**

M025 Which plan proposed a limited union and three provincial groups in 1946? **Cabinet Mission Plan**

M028 Which country lies to Pakistan's north-east? **China**

M029 Which sea lies along Pakistan's southern coast? **Arabian Sea**

M031 K2 is located in which mountain range? **Karakoram**

M034 Which vegetation is suited to saline tidal coastal environments? **Mangroves**

M037 What creates the summer monsoon's landward movement of moist air? **Rapid land heating and relatively low pressure over land**

M038 Western depressions mainly bring which useful seasonal precipitation? **Winter rain and mountain snow**

M039 Relief rainfall is most directly caused by which process? **Moist air being forced up a mountain slope**

M043 Tarbela Dam is built on which river? **Indus**

M044 Mangla Dam is built on which river? **Jhelum**

M046 What commonly causes soil salinity in poorly drained irrigated land? **Accumulation of salts as water evaporates**

M047 Which structure primarily raises river level to divert water into canals? **Barrage**

M049 Seasonal movement between high summer and low winter pastures is called: **Transhumance**

M051 Which item is a farming process rather than an input? **Harvesting**

M053 Which is a typical Rabi crop? **Wheat**

M056 Which practice means growing different crops in sequence on the same land? **Crop rotation**

M058 Raising fish in managed ponds is called: **Aquaculture**

M063 What does CPEC stand for? **China-Pakistan Economic Corridor**

M066 A lingua franca is best described as: **A common language used between different language groups**

M069 Pakistan Television began in which year? **1964**

M072 Social stratification refers to: **Ranking people and groups in social layers**

M073 Which Sufi order is especially associated with silent Dhikr? **Naqshbandi**

M074 Baha-ud-Din Zakariya of Multan is associated with which order? **Suhrawardi**

M077 Malakhra is a traditional wrestling form particularly associated with: **Sindh**

M078 Which sport is identified in the textbook as Pakistan's national game? **Hockey**

M079 Pakistan won its first men's Hockey World Cup in which year? **1971**

M080 Pakistan won the ODI Cricket World Cup in which year? **1992**

M081 Which pair is best known for Pakistan's squash achievements? **Jahangir Khan and Jansher Khan**

Final facts to keep clear

Day of Deliverance: 22 December 1939; Lahore Resolution presented: 23 March 1940.

Lucknow Pact: 1916; Fourteen Points: 1929; Allahabad Address: 1930.

Tarbela: Indus River; Mangla: Jhelum River. A barrage mainly regulates/diverts water; it is not equivalent to a large storage dam.

Summer monsoon: relatively low pressure over strongly heated land draws in moisture-bearing winds. Relief rain occurs on windward slopes; rain shadows are leeward.

Rabi example: wheat. Kharif examples: rice and cotton. A food crop can also be grown for cash.

Hockey is the textbook's national game; cricket is the most popularly followed game. Do not interchange the two descriptions.

Social stratification means ranked social layers; transhumance means seasonal pasture movement; aquaculture means managed aquatic farming.

Sufi shared principles: divine love, self-purification, remembrance, compassion, and spiritual guidance.

A practical final revision sequence

1. Recall the twelve core long answers by their five headings.
2. Close the guide and reconstruct the five points of each priority short answer.
3. Test the priority MCQs, then revisit every wrong answer.
4. Locate the physical features on your textbook map.
5. Scan the SLO coverage table for weak areas and revise those answers before stopping.

In the exam: follow the command word. Explain causes for a why question, compare both sides in a comparison, and give advantages plus limitations for an evaluation. Write relevant facts and explanations; five repeated or unsupported statements do not automatically earn five marks.
