Q.2 Read the following passage carefully and answer any **SIX** questions including **Question No.(i)** appended to it.

Note: Question no. (i) about summary writing is compulsory carrying 08 marks while rest of the questions carry 04 marks each. **(8 + 5 × 4 = 28)**

It should, however, be kept in mind that nothing is constant except change. Everybody changes, as do our likes and dislikes. Something we loved doing two years ago may now give us displeasure. Always take time to reflect on the things in your life that you feel most strongly about. Make a list of your likes and dislikes, needs and wants. Reflect on your current career path. If your job and career fall under 'Like,' you know that you are still on the right path. Take time to understand your interest and the motives that drive your sense of success and happiness.

After you've identified your interests, search for occupations. For example, if you like children or reading, explore a career in early education or library sciences. Careers such as day care worker or paediatric nurse, elementary or Montessori teacher are also options that allow you to work with children. Similarly, if you take initiative in helping others and assist people in their critical state, you can opt for medical profession and so on.

Now that you've focused on a specific career based on your interests, identify the education, knowledge and skills it requires. Some careers may be started with a high school diploma; others may require a two-year or four-year degree. Some fields require certification for your chosen path. For example, if you chose a career in project management, you may find that certain positions require a certification. If you want to be engineer you will have to plan your career accordingly. Moreover, if you are good at Mathematics and numeracy better to opt for management accounting or finance.

It is worth noting that you should consider factors beyond personal preferences. What is the current demand for the field that you have chosen? If the demand is low or entry is difficult, are you comfortable with risk? Gather advice from friends, colleagues, and family members and also interact with those who are already in this field. Consider potential outcomes and barriers for each of your final options.
