Overpopulation has badly **hampered** the economic growth in the country. This leads to a **decline** in the purchasing power of the people. As the demand for the goods decreases, then by the "demand and supply" law, the investment in the country also suffers. Such a stagnant economy will lead to the closing of factories and businesses, and in return add to joblessness and poverty. Greater population means a greater number of hungry souls to feed.

Agriculture is also **adversely** affected by the rapid increase of over population. More population means smaller farms, and leads to a decline in productivity. People having small farms have no choice but to **migrate** in hope of a better life. This leads to urbanization, which itself is a major problem. Many social evils like lawlessness, crime and corruption are all the result of over population. Over population has also contributed to toxic pollution. A greater number of vehicles on the roads means the emitting of poisonous gas for people to inhale. Sewage problem and lack of clean drinking water can also be attributed to the population problem.

Proper measures and decisions should be taken to ensure increase in our literacy rate. Pakistan Government has made a very insignificant role in this regard. The role of media can help a lot in bringing awareness among the masses. Print media too needs to emphasize the problem of overpopulation on a more regular basis. It is a very serious problem because it leads to frustration, which means chaos. The problem must be tackled **pragmatically** for our country. As Pakistan stands at a crossroads, the future of the nation depends on multiple reforms. Addressing these **multifaceted** challenges is not just an option — it's a necessity.

Q. 2 Read the following passage carefully and answer the questions appended to it.
Note: Question No. (i) about summary writing is carrying 08 marks while rest of the questions carry 04 marks each. (8 + 5 x 4 = 28)

The next time you see a packet of cigarettes, notice there is a warning about the dangers of cigarette smoking to your health. In the past, people did not know about the dangers of cigarette smoking. But medical experts have learned that the smoke from tobacco contains poisonous **substances** that can damage your body. Smoking tobacco in pipes or cigars is just as harmful as smoking cigarettes. Three seconds after a person starts smoking a cigarette, his heart beats faster, his blood pressure rises, and a portion of the oxygen in his blood is replaced by a harmful gas. Cancer-causing chemicals also fill his lungs every time he **inhales** the smoke. Nicotine, carbon monoxide, and tar are the most dangerous substances in cigarette smoke.

Nicotine narrows blood vessels, so the heart needs to work harder to pump blood through the body. Carbon monoxide is a **harmful** gas that replaces part of the oxygen in blood. The oxygen level in a smoker's blood is lowered by this **poisonous** gas. Tar damages lung tissues. It affects the hair-like parts of cells, called cilia, that line the breathing tubes. Cigarette smoke also causes a lung disease known as chronic bronchitis. It occurs when smoke **irritates** the lining of the bronchial tubes, making them produce too much mucus. The mucus blocks the air tubes, and a person with bronchitis coughs a lot to get rid of it. As tar builds up on the walls of the air tubes and lungs over the years, it can cause cancer cells to grow. Cancer cells multiply and destroy the healthy cells. The only way to treat lung cancer is to remove all or some part of the diseased lung. This type of cancer is the second-highest cause of death among people who smoke.

Smokers often find it very difficult to quit the habit. Smokers' bodies become so used to nicotine that they have a nervous reaction when they don't get it. The body tells the brain that it wants nicotine. It needs a lot of willpower and **resistance**. Some people think that chewing tobacco won't harm their health, but they are wrong. Nicotine makes the heart speed up, and chewing tobacco also leads to other health problems e.g mouth cancer or damage the gums and teeth.

Q. 2 Read the following passage carefully and answer the questions appended to it.

Try to imagine what your life would be like without any machines working for you. Make a list of the machines in your household and on your person; you may be surprised by the number.
Before the Industrial Revolution, humans relied on **immediate** energy sources like sunlight, biomass, and wind. This changed around 1750 with the discovery of fossil fuels (coal, oil, and natural gas). These fuels consist of solar energy stored in ancient biological remains over millions of years, providing an **immense** capacity for work that transformed human productivity.

The story of the Industrial Revolution begins on the small island of Great Britain. By the early 18th century, people there had used up most of their trees for building houses and ships and for cooking and heating. In their search for something else to burn, they turned to the hunks of black stone (coal) that they found near the surface of the earth. Soon they were digging deeper to mine it. Their coal mines filled with water that needed to be removed; horses pulling up bucketfuls proved slow going.

At the outset of the 19th century, British colonies in North America were producing lots of cotton, using machines to spin the cotton thread on spindles and to **weave** it into cloth on looms. When they attached a steam engine to these machines, they could easily out produce India, up until then the world's leading producer of cotton cloth. One steam engine could power many spindles and looms. This meant that people had to leave their homes and work together in factories.

Early in the 19th century the British also invented steam locomotives and steamships, which **revolutionized** travel. In 1851 they held the first world's fair, at which they exhibited telegraphs, sewing machines, revolvers, reaping machines, and steam hammers to **demonstrate** they that were the world's leading manufacturer of machinery. By this time the characteristics of industrial society — smoke rising from factories, bigger cities and **denser** populations, railroads — could be seen in many places in Britain.

Q. 2 Read the given passage and answer the questions including Question No. (i) appended to it.
Note: Question No. (i) about summary carries 08 marks while the rest of the questions carry 04 marks each.
(8+5 x 4 = 28)

The current state of Technical Vocation Educational Training (TVET) is not very encouraging. We need at least a million skilled workers every year to cater to our industry and other sectors. The strength of skilled workers in the country however remains just around 300,000. It is hurting to note that hardly 16.3 percent of the youth cohort completes secondary education, with the result that more than three-quarters leave educational institutions without **foundational** or life skills. The majority of Pakistan's emerging labour force is either without education and skills or has very little of both. Thus the **sustainable** delivery of quality TVET is critical to the attainment of Pakistan's economic development goals.

The other challenge of the system is that it does not give due importance to vocational and technical education. This resulted in the mismatch between the skilled manpower required and the skilled manpower available. Majority of the workers in the **tattered** economy have never been to vocational training institutions. Moreover, vocational training courses lack market responsiveness. The contribution of the industry in the development of curricula is also limited. Due to this reason there are insufficient linkages with industries and coverage of trades in the services sector which has higher employment potential.

A number of measures need to be taken for improving the technical education structure of Pakistan. The educational pattern at the school level needs to be redesigned to facilitate skill development. Integration of vocational education is needed at this level. It should be **subsidized** and scholarships should be awarded to **deserving** students. The course curricula should be revised periodically through **flexible** approaches based on the learning outcome. More and more popular and market-oriented courses need to be introduced. Vocational education should be more computer-based and computerized programmes should be part of the general curriculum.

If suitable and updated policies were implemented in letter and spirit in the field of vocational and technical education, it can sail the country through current rough waters to the bright future with high employment and sustainable economic growth

On August 11, 1947 Quaid-e-Azam Muhammad Ali Jinnah (ﷺ) delivered his **famous** speech before the constituent assembly of the newly established state of Pakistan. In his address, he gave vent to his vision of Pakistan. He dwelt on the primary function and responsibilities of the virgin Constituent Assembly, warned against certain evils that might befall the new country and spoke in defense of the partition of The sub-continent. His speech is as follows:

Mr President, Ladies and Gentlemen!

"I cordially thank you, with the utmost sincerity, for the **honour** you have conferred upon me – the greatest honour that is possible to confer – by electing me as your first President. I also thank those leaders who have spoken in **appreciation** of my services and their personal references to me. I sincerely hope that with your support and your co-operation, we shall make this Constituent Assembly an example to the world. The **Constituent** Assembly has got two main functions to perform. Islam has attached extraordinary value and importance to youth and the young age. The Rasool (ﷺ) (خاتم النبيين) had a high **esteem** for youth. He (ﷺ) (خاتم النبيين) valued them and reposed a strong confidence in them. In preparation for the battle of Uhud, for instance, the Rasool (ﷺ) (خاتم النبيين), in **reverence** to the passions and emotions of the youth, went even against his own opinion and decided to face the enemy outside the city in an open field. Similarly, he (ﷺ) (خاتم النبيين) preferred a teenager Osama bin Zaid (رضي الله عنه) even over the most respected elders like Abu Baker (رضي الله عنه) and Umar Ibn Al-Khattab (رضي الله عنه) to lead the military **expedition** to avenge upon the losses of the Muslim army in the battle of Mu'tah in Syria. This much love and confidence shown towards the youth necessitates that they must take the Rasool (ﷺ) (خاتم النبيين) as their role model and mould their lives in accordance with his teachings and practices.

The Rasool (ﷺ) (خاتم النبيين) spent his youth in a **dignified** and **sublime** way. Even before his accession to the position of prophethood, he (ﷺ) (خاتم النبيين) never indulged himself in vices that were prevalent in those days. During his youth, his nobility of soul, purity of heart, his strict **adherence** to truth and honesty and his stern sense of duty earned him the titles of "Al-Amin"–the trustworthy–and, "Al–Sadiq"–the true. Thus, he (ﷺ) (خاتم النبيين) set an example for the youth of the coming generations to follow the path of **rectitude** in all circumstances and always to lead a pious and pure life.

Gender inequality defines the practice of granting or denying rights or privileges to the people based on their gender. Despite the fact that women make more than 50% of the world population, gender based **discrimination** against women still remains an **undeniable** fact in Pakistan and across the globe, potentially **hampering** its socio-economic advancement and progress. The major half of the population is badly neglected in almost all the fields of life, especially education, health, economic opportunities and political participation.

The issue of gender inequality is, sometimes, wrongly **ascribed** to religion. As the matter of fact, its primary causes are the various cultural norms and the patriarchal mind set.

Males are considered physically powerful and females as psychologically sensitive or weak. From birth, male and female offsprings are raised differently. Since their babyhood, boys are let to play with toys like trucks or other sports related things. Girls, on the other hand, are introduced more commonly to dolls, dresses and playhouses, where they take care of dolls as if they were children. Women are supposed to be **submissive** to men and are viewed as a property. They are not allowed to take independent decisions even about some of their very **fundamental** and **sheerly** personal matters like education, marriage and job etc. These trends set by the society put men and women on certain paths, and throughout life, are seen as two very different species who have very different personalities and should always stay on separate paths.

(8+5 x 4 = 28)

The Gender inequality is more conspicuously **manifested** when it comes to schooling, particularly education at higher level. Cultural boundaries and various gender roles lead to different approaches towards male and female education. In Pakistan, for example, a family may consider it useless to **impart** education to girls because they are supposed to get married eventually and to take on their major responsibilities of house making and babysitting. Majority of rural girls drop out of primary school. According to the ministry of women development report 2007, only 5% of women have attained the Bachelor degree and only 1.4% have achieved a Master degree. Likewise the World Economic Forum report 2020 states that while the majority of countries have **bridged** or nearly bridged the educational gender gap, Pakistan still stands at 20%. It further says about Pakistan, "Less than half of women are literate, compared with 71% of men".

Poor or irrelevant academics of women along with some other factors like marriage and cultural **stereotypes** lead to their joblessness and economic backwardness. Mostly across the globe, women can't find equal work opportunities and, so, remain economically dependent on men. They are **barred** from owning land and their control over household economic resources is also limited. Women, therefore are more likely to be living at or below the poverty line. As regards Pakistan, only one-quarter of women participate in the labour force i.e. working or looking to work compared with 85% of men. In this connection, WEF 2020 report says, "Only 5% of senior and leadership roles are held by women, twice the rate of 2016. It is estimated that only 18% of Pakistan's labour income goes to women, one of the lowest share among the countries studied". Pakistan has to improve upon this alarming situation as soon as possible because raising women's participation in the workforce and advancing their financial **empowerment** is the key to boosting economic growth and sustainable development in the country.

Note: Question No. (i) about summary carries 08 marks while the rest of the questions carry 04 marks each. **(8+5 x 4 = 28)**

The Rasool (ﷺ)(خاتم النبیین) had given the banner of Islam to Massab Ibn Umayer (رضی اللہ عنہ). He was martyred by the enemy and the banner of Islam fell on the ground. Nevertheless, Hazrat Ali (رضی اللہ عنہ) **seized** the sacred banner and bore it aloft amidst the storm of battle. As Massab (رضی اللہ عنہ) resembled the Rasool (ﷺ)(خاتم النبیین) in person, a shout was put up by the enemy that Hazrat Muhammad (ﷺ)(خاتم النبیین) God forbid, was martyred. The morale of the **polytheists** of Makkah was **beefed up** by this shout but it **demoralized** the Muslim Army.

The beloved Rasool (ﷺ)(خاتم النبیین) was fighting in the other part of the battlefield, was wounded, and his head and holy face were bleeding. A few Muslims mainly the Ansar were defending him. It was this little group and its battle cries that caught Ali's (رضی اللہ عنہ) attention. He tore his way through enemy lines and came up to his comrade-in-arm. They stood surrounding the Rasool (ﷺ)(خاتم النبیین) led by Abu Dujana (رضی اللہ عنہ). They were doing their best to shield him from the weapons of the enemy. He was thrilled to see his master alive. The idolaters renewed their attacks, charged repeatedly but the strong defense of of Hazrat Ali (رضی اللہ عنہ) repulsed them each time. Hazrat Ali (رضی اللہ عنہ) and other Sahabas, therefore prevented the non-believers to take advantage of the victory and averted destruction. The battle that would have otherwise ended in **annihilation** of Muslims, ended in a draw.

The price of disregarding the commands of the Holy Rasool (ﷺ)(خاتم النبیین) and negligence of the duty and responsibility by the band of the archers was paid by Muslims with seventy martyrs, stress, woes and grief. This incident is an invaluable lesson for the Muslims, never to disobey the Holy Rasool (ﷺ)(خاتم النبیین) in their lives.

QUESTIONS:

(i) Write down summary of the passage and suggest a suitable title. **(7+1=08)**

(ii) In what circumstances, the banner of Islam fell on the ground?

OR

How was the morale of the Polytheists beefed up?

(iii) Where was the beloved Rasool (ﷺ)(خاتم النبیین) while the rumour of his martyrdom was spread by the enemy?

(iv) How did Hazrat Ali (رضی اللہ عنہ) get a clue about the presence of the beloved Rasool (ﷺ)(خاتم النبیین)?

OR

No one imagined that Hubble's photographs of deep space would be so utterly, jaw-droppingly beautiful or that the pictures would have a purely visceral appeal to an entire generation, making Hubble a household word synonymous with spectacular images of the cosmos.

Hubble – a joint project of NASA and the European Space Agency – orbits Earth 353 miles (569 km) above the planet's surface. Its position allows it to circle free of Earth's atmosphere, which distorts and blocks light from the cosmos. This gives Hubble a pristine view typically unmatchable by ground-based telescopes. If the man's eye was as sensitive as Hubble's, he could look from Islamabad and see the glow of a pair of fireflies in London. If the fireflies were six feet apart, he could resolve that there were two of them side by side. Hubble orbits Earth, moving at the speed of about five miles per second (8 km per second) – fast enough to travel from Chitral to Karachi in about three minutes. During the course of a year, Hubble circles Earth over 5,000 times. As the telescope whips around Earth once every 97 minutes, it collects light – much more light than human eyes can hope to capture on their own.

Hubble's super vision has shown us places in the cosmos that no generation of human before us has ever seen. Hubble's images have unveiled that beyond the starry sky we see on a clear night, there is another universe, an "undiscovered country" of discordant objects, violent explosions and cataclysmic collisions. A single Hubble snapshot can portray the universe as awesome, mysterious and breathtaking – and, at the same time, chaotic, overwhelming and foreboding.
