SECTION – B (Marks 36)

Q. 2 Read the following passage carefully and answer the questions appended to it.

Note: Question No. (i) about summary writing is carrying 06 marks while rest of the questions carry 03 marks each. (6 + 4x3= 18)

There was time when any student's future plans revolved around becoming a doctor, pilot or an engineer. These few disciplines were thought to be the only fields that could offer rewarding careers in terms of both respect and money. Resultantly, students were unaware of other opportunities that could, perhaps, have been more advantageous.

Today, life has become more dynamic and innovative. Gone are the days when the medical and engineering fields were the only available choices. Now a whole world of non-traditional careers, from IT, electronic media and web networking to online business portals and fashion designing, are available for the young people.

Career counsellors are generally well informed about such trends. They can play a key role in guiding the youth towards a rewarding profession. This highlights the importance of a full time career-counseling department at the school level. The job of this department should be to determine the personalities of students, to observe and analyze their interests and to suggest suitable careers according to their aptitude. Most of the parents and students find themselves in a fix when deciding on a career. Parents are unaware of market trends, educational systems and the scope of any particular discipline. Similarly 14-15 year old students are not mature enough to make such life-changing decisions. So it is widely felt that career counselling must be promoted from school level.

Questions:

- (i) Summarize the given passage. Also suggest a suitable title to it. (5+1=6)
